INDEX OF AUTHORS' NAMES.

TRANSACTIONS. 1897.

And also to Proceedings of the Session 1896—1897, Nos. 169 to 182, Nov., 1896—June, 1897 (marked P.).

Annable, *Henry.* See *George* **Young.**

Armstrong, *Henry Edward,* notes on nitration, P., **1896,** 230.

Armstrong, *Henry Edward,* and *William Alfred* **Davis,** 3′-bromo-β-naphthol, P., **1896,** 230.

Armstrong, *Henry Edward,* and *William Palmer* **Wynne,** studies on the constitution of tri-derivatives of naphthalene. No. 16. Conversion of chloronaphthalenedisulphonic acids into dichloronaphthalenesulphonic acids, P., **1897,** 152.

Armstrong, *Henry Edward,* and *William Palmer* **Wynne,** conversion of 1 : 1′- into 1 : 4′-dichloronaphthalene by hydrogen chloride. The products of hydrolysis of 1 : 1′-dichloronaphthalene-3-sulphonic acid, P., **1897,** 154.

Aston, *Emily* (*Alicia*), and *John Norman* **Collie,** oxidation products of αγ-dimethyl-α-chloropyridine, 653; P., **1897,** 89.

B.

Baker, *Julian Levett.* See *Arthur Robert* **Ling.**

Ball, *John,* on the circumstances which affect the rate of solution of zinc in dilute acids, with especial reference to the influence of dissolved metallic salts, 641; P. **1896,** 235.

Bentley, *William Henry,* and *William Henry* **Perkin,** *jun.,* the reduction of xylic acid, of paraxylic acid, and of methylterephthalic acid, and the preparation of methylterephthalic acid and methylisophthalic acid, 157; P., **1896,** 79.

Bevan, *Edward John.* See *Charles Frederick* **Cross.**

Blake, *Robert Frederick.* See *Edmund Albert* **Letts.**

Bolam, *Herbert William,* on the hydrolysis of ethylic dicarboxyglutaconate, P., **1896,** 184.

Bone, *William Arthur,* and *John Cannell* **Cain,** the explosion of acetylene with less than its own volume of oxygen, 26; P., **1896,** 176.

Bone, *William Arthur,* and *David Smiles* **Jerdan,** the direct union of carbon and hydrogen, 41; P., **1896,** 175.

Brooke, *Arthur.* See *Henry Lloyd* **Snape.**

Brown, *Horace T., George Harris* **Morris,** and *James Hill* **Millar,** experimental methods employed in the examination of the products of starch-hydrolysis by diastase, 72; P., **1896,** 241; discussion, P., 244.

—— —— —— specific rotation of maltose and of soluble starch. 109; P., **1896,** 242; discussion, P., 244.

—— —— —— relation of the specific rotatory and cupric-reducing powers of the products of starch-hydrolysis by diastase, 115; P., **1896,** 243; discussion, P., 244.

—— —— —— the solution-density and cupric-reducing power of dextrose, levulose, and invert-sugar, 275; P., **1897,** 4.

Brown, *Horace T.,* and *Spencer Umfreville* **Pickering,** thermal phenomena attending the change in rotatory power of freshly prepared solutions of certain carbohydrates, with some remarks on the cause of multirotation, 756; P., **1897,** 129; discussion, P., 131.

—— —— thermochemistry of carbohydrate hydrolysis, 783; P., **1897,** 130; discussion, P., 131.

Bull, *Benjamin Samuel*, on β-oxycellulose, 1090; P., **1897**, 168.

C.

Cain, *John Cannell*. See *William Arthur* **Bone**.
Caldecott, *William Arthur*, on the decomposition of iron-pyrites, P., **1897**, 100.
Calvert, *Harry Thornton*. See *Julius Berend* **Cohen**.
Carr, *Francis Howard*. See *Wyndham Rowland* **Dunstan**.
Chattaway, *Frederick D.*, and *Henry Potter* **Stevens**, hydrolysis of perthiocyanic acid, 607; P., **1897**, 87; discussion, P., 88.
—— —— reduction of perthiocyanic acid, 833; P., **1897**, 149.
Clark, *Ernest*. See *George* **Young**.
Cockburn, *George Bertram*. See *John Addyman* **Gardner**.
Cohen, *Julius Berend*, and *Harry Thornton* **Calvert**, the action of nitrogen trioxide and tetroxide on alcohols, 1050; P., **1897**, 166.
Cohen, *Julius Berend*, and *William Hudson* **Harrison**, the action of nitrogen tetroxide on ortho- and para-nitrobenzylic alcohols, 1057; P., **1897**, 166.
—— —— the action of aromatic amines on diacetyltartaric anhydride, 1060; P., **1897**, 167.
Collie, *John Norman*, production of pyridine derivatives from ethylic β-amidocrotonate, 299; P., **1897**, 43; discussion, P., 44.
—— a space formula for benzene, 1013; P., **1897**, 143; discussion, P., 145.
Collie, *John Norman*. See also *Emily Alicia* **Aston**, *Arthur* **Lapworth**.
Cook, *Ernest H.*, note on a method for determining melting points, P., **1897**, 74.
Crompton, *Holland*, the theory of osmotic pressure and the hypothesis of electrolytic dissociation, 925; P., **1897**, 109; discussion, P., 112.
—— molecular rotations of optically active salts, 946; P., **1897**, 111; discussion, P., 112.
—— heats of neutralisation, of acids and bases in dilute aqueous solution, 951; P., **1897**, 111; discussion, P., 112.
Cross, *Charles Frederick*, *Edward John* **Bevan**, and *Claud* **Smith**, the carbohydrates of the cereal straws, 1001; P., **1897**, 150.
Crossley, *Arthur William*, note on Wechsler's method for the separation of fatty acids, 580; P., **1897**, 21.

D.

Davis, *William Alfred*, derivatives of nitro-β-naphthols, P., **1896**, 231.
—— morphotropic relations of β-naphthol derivatives, P., **1896**, 233.
Davis, *William Alfred*. See also *Henry Edward* **Armstrong**.
Deeley, *R. M.*, the periodic law, P., **1896**, 185.
Dewar, *James*. See *Henri* **Moissan**.
Dixon, *Augustus Edward*, halogen substituted acidic thiocarbimides, and their derivatives; a contribution to the chemistry of thiohydantoins, 617; P., **1897**, 6.
Dixon, *Harold Baily*, and *Edward John* **Russell**, explosion of chlorine peroxide with carbonic oxide, 605; P., **1897**, 99, discussion, P., 100.
Dobbie, *James Johnstone*, and *Fred.* **Marsden**, corydaline, part V., 657; P., **1897**, 101.
Dootson, *Frederick William*. See *William James* **Sell**.
Dunstan, *Wyndham Rowland*, and *Francis Howard* **Carr**, contributions to our knowledge of the aconite alkaloids. Part XIV., on pseudaconitine, 350; P., **1895**, 154.
Dunstan, *Wyndham Rowland*, and *Ernest* **Goulding**, action of alkyl haloids on aldoximes and ketoximes, 573; P., **1897**, 76.
Durrant, *Reginald G.*, the action of hydroxen peroxide and other oxidising agents on cobaltous salts in presence of alkali bicarbonates, P., **1896**, 244.
Dymond, *Thomas S.*, and *Frank* **Hughes**, formation of dithionic acid by the oxidation of sulphurous acid with potassium permanganate, 314; P., **1897**, 42; discussion, P., 42.

E.

Edwards, *William Buckland*. See *Frederic Stanley* **Kipping**.
Evans, *Clare de Brereton*, studies on the chemistry of nitrogen: enantiomorphous forms of ethylpropylpiperidonium iodide, 522; P., **1897**, 64.
—— researches on tertiary benzenoid amines, II., P., **1896**, 234.

F.

Fenton, *Henry John Horstman*, a new synthesis in the sugar group, 375; P., **1897**, 63.

Findlay, *Alexander*. See *Francis Robert* **Japp**.

Forster, *Martin Onslow*, camphoroxime, part I., conversion of camphoroxime into methylcamphorimine and into camphenylnitramine, 191; P., **1897**, 21.

—— camphoroxime, part II., the ethers of camphoroxime, 1030; P., **1897**, 165.

Fortey, *Emily C.*, hexanaphthene and its derivatives. Preliminary note, P., **1897**, 161.

Francis, *Francis E.*, the dinitrosamines of ethyleneaniline, the ethylenetoluidines and their derivatives, 422; P., **1897**, 63.

Frankland, *Percy Faraday*, Pasteur memorial lecture, 683; P., **1897**, 79.

Frankland, *Percy Faraday*, and *Thomas Slater* **Price**, the amyl (secondary butylmethyl) derivatives of glyceric, diacetylglyceric and dibenzoylglyceric acids, active and inactive, 253; P., **1897**, 9.

French, *William*, studies on the interaction of highly purified gases in the presence of catalytic agents, P., **1897**, 52.

Friswell, *Richard John*, on the properties of nitrobenzene, 1010; P., **1897**, 147, 148; discussion, P., 149.

—— the action of light on a solution of nitrobenzene in concentrated sulphuric acid, P., **1897**, 148.

G.

Gardner, *John Addyman*, and *George Bertram* **Cockburn**, action of phosphorus pentachloride on fenchone, 1156; P., **1897**, 173.

—— —— preliminary note on the oxidation of fenchene, P., **1897**, 137.

Gardner, *John Addyman*. See also *James Ernest* **Marsh**.

Gilles, *William Setten*, and *Frank Forster* **Renwick**, further note on ketopinic acid: pinophanic acid, P., **1897**, 64.

—— —— δ-ketopinic acid and camphoic acid, P., **1897**, 158.

Gladstone, *John Hall*, and *Walter* **Hibbert**, the molecular refraction of dissolved salts and acids. Part II. 822; P., **1897**, 141; discussion, P., 142.

Goulding, *Ernest*. See *Wyndham Rowland* **Dunstan**.

Gray, *Thomas*, the isomeric dibromethylenes, 1023; P., **1897**, 140.

Green, *Arthur George*, constitution and colour, P., **1896**, 226.

H.

Hake, *Henry Wilson*, further experiments on the absorption of moisture by deliquescent substances, P., **1897**, 147.

Hall, (*Capt.*) *Marshall*, obituary notice of, 1294.

Hambly, *Frederick John*. See *James* **Walker**.

Hanes, *Edgar S.* See *Arthur H.* **McConnell**.

Harcourt, *Augustus George Vernon*, presidential address, 592; P., **1897**, 80.

—— a few thoughts on the question whether the changes which matter undergoes are different in their nature, 595; P., **1897**, 81.

Harrison, *William Hudson*. See *Julius Berend* **Cohen**.

Hartley, *Walter Noel*, and *Hugh* **Ramage**, the wide dissemination of some of the rarer elements and the mode of their association in common ores and minerals, 533; P., **1897**, 11.

—— —— on the spectrographic analysis of some commercial samples of metals, of chemical preparations, and minerals from the Stassfurth potash beds, 547; P., **1897**, 46; discussion, *ibid.*, 48.

Hemmy, *A. S.* See *Siegfried* **Ruhemann**.

Henderson, *George Gerald*, and *Matthew Archibald* **Parker**, the action of bromodiphenylmethane on ethylic sodioacetoacetate, 676; P., **1897**, 119.

Hewitt, *John Theodore*, *T. S.* **Moore**, and *A. E.* **Pitt**, derivatives of phenetolazo-phenols, P., **1897**, 157.

Hewitt, *John Theodore*, and *Frank G.* **Pope**, the condensation of chloral with resorcinol, part II., 1084; P., **1897**, 167.

Heycock, *Charles Thomas*, and *Francis Henry* **Neville**, the freezing points of alloys containing zinc and another metal, 383; P., **1897**, 60; discussion, P., 62.

—— —— X-ray photographs of solid alloys, P., **1897**, 105.

Hibbert, *Walter*. See *John Hall* **Gladstone**.

Holland, *Thomas H.*, crystallography of the monhydrated mercurous nitrite, 346; P., **1896**, 218.

Hughes, *Frank.* See *Thomas S.* **Dymond.**

J.

Jackson, *Percy G.* See *John James* **Sudborough.**

Japp, *Francis Robert*, supposed condensation of benzil with ethylic alcohol: a correction, 297; P., **1897**, 48.

Japp, *Francis Robert*, and *Alexander* **Findlay**, phenanthrone, 1115; P., **1897**, 169.

Japp, *Francis Robert*, and *George Druce* **Lander**, synthesis of pentacarbon rings, Part I. Anhydracetonebenzil and its homologues, 123; P., **1896**, 107.

—— ——, synthesis of pentacarbon rings. Part II. Condensation of benzil with acetonedicarboxylic acid, 139; P., **1896**, 109.

—— ——, reduction of desyleneacetic acid and the constitution of Zinin's pyroamaric acid, 154; P., **1896**, 109.

Japp, *Francis Robert*, and *Thomas Smith* **Murray**, synthesis of pentacarbon rings. Part III. Condensation of benzil with levulinic acid, 144; P., **1896**, 146.

Japp, *Francis Robert*, and *Alfred* **Tingle**, ammonia and phenylhydrazine derivatives of $\alpha\beta$-dibenzoylcinnamene (anhydracetophenonebenzil), 1138: P., **1897**, 170.

Jenkins, *Henry C.*, and *Ernest A.* **Smith**, the reactions between lead and the oxides of sulphur, 666; P., **1897**, 104; discussion, P., 105.

Jerdan, *David Smiles*, a new synthesis of phloroglucinol, 1106; P., **1897**, 168.

Jerdan, *David Smiles.* See also *William Arthur* **Bone.**

Jowett, *Hooper Albert Dickinson*, some gold salts of hyoscine, hyoscyamine, and atropine, 679; P., **1897**, 136.

K.

Kay, *Sydney A.* See *James* **Walker.**

Kipping, *Frederic Stanley*, dimethylketohexamethylene, P., **1896**, 247.

Kipping, *Frederic Stanley*, and *William Buckland* **Edwards**, preparation of dimethylketohexamethylene, and experiments on the synthesis of dimethylhexamethenylmalonic acid, P., **1896**, 188.

Kipping, *Frederic Stanley*, and *William Jackson* **Pope**, optical inversion of camphor, 956; P., **1897**, 132.

—— ——, derivatives of camphoric acid. Part II. Optically inactive derivatives, 962; P., **1897**, 133.

Kipping, *Frederic Stanley*, and *William Jackson* **Pope**, racemism and pseudoracemism, 989; P., **1897**, 135; discussion, P., 136.

Kipping, *Frederic Stanley.* See also *Arthur* **Lapworth**, *William Jackson* **Pope**, *Cecil* **Revis.**

L.

Lander, *George Druce.* See *Francis Robert* **Japp**; *Thomas* **Purdie.**

Lapworth, *Arthur*, and *John Norman* **Collie**, production of some nitro- and amido-hydroxypicolines, 838; P., **1897**, 146.

Lapworth, *Arthur*, and *Frederic Stanley* **Kipping**, sulphocamphoric acid and other derivatives of camphorsulphonic acid, 1; P., **1896**, 215.

Lawrence, *William Trevor*, a synthesis of citric acid, 457; P., **1897**, 65.

Lean, *Bevan*, and *Frederic H.* **Lees**, interaction of ethylenic chloride, ethylic malonate and sodium ethoxide, 1062; P., **1897**, 160.

Lees, *Frederic H.* See *Bevan* **Lean.**

Letts, *Edmund Albert*, and *Robert Frederick* **Blake**, on Pettenkofer's method for determining carbonic anhydride in air, P., **1896**, 192.

Linder, *S. Ernest.* See *Harold* **Picton.**

Ling, *Arthur Robert*, and *Julian Levett* **Baker**, action of diastase on starch, III., 508; P., **1897**, 3; discussion, P., 4.

Littleton, *Fannie T.*, note on the heat of formation of the silver amalgam Ag_2Hg_8, P., **1896**, 220.

Liversidge, *Archibald*, presence of gold in natural saline deposits and marine plants, 298; P., **1897**, 22.

——, the crystalline structure of gold and platinum nuggets and gold ingots, 1125; P., **1897**, 22.

Lloyd, *Lorenzo L.* See *John J.* **Sudborough.**

Lowry, *T. M.*, note on stereoisomeric di-derivatives of camphor, and on nitrocamphor, P., **1897**, 159.

Lumsden, *John S.* See *James* **Walker.**

M.

McConnell, *Arthur H.*, and *Edgar S.* **Hanes**, researches on the oxides of cobalt. Cobalt dioxide or cobaltous anhydride, cobaltous acid and cobaltites, 584; P., **1897**, 62.

Mallet, *John William*, note on the constitution of the so-called "nitrogen iodide," P., **1897**, 55.
Marsden, *Fred.* See *James Johnstone* **Dobbie**.
Marsh, *James Ernest*, and *John Addyman* **Gardner**, researches on the terpenes, VII. Halogen derivatives of camphor and their reactions, 285; P., **1896**, 187.
—— —— production of camphenol from camphor, P., **1897**, 137.
Martin, *H. W.* See *Arthur George* **Perkin**.
Matthews, *Francis Edward*, apparatus for "steam distillation," 318; P., **1897**, 18.
Millar, *James Hills.* See *Horace T.* **Brown**.
Moore, *T. S.* See *John Theodore* **Hewitt**.
Morris, *George Harris.* See also *Horace T.* **Brown**.
Mott, *Henry Augustus*, obituary notice of, 1204.
Murray, *Thomas Smith.* See *Francis Robert* **Japp**.
Myers, *Henry C.*, monochlorodiparaconic acid, 614; P., **1897**, 100.

N.

Neville, *Francis Henry.* See *Charles Thomas* **Heycock**.

P.

Parker, *Matthew Archibald.* See *George Gerald* **Henderson**.
Pasteur, *Louis*, memorial lecture on, 683; P., **1897**, 80.
Perkin, *Arthur George*, derivatives of malcurin, part II., 186; P., **1897**, 5.
—— apiin and apigenin, 805; P., **1897**, 53, 138.
—— the yellow colouring principles of various tannin matters, 1131; P., **1897**, 170.
—— azobenzene derivatives of phloroglucinol, 1154; P., **1897**, 172.
—— yellow colouring matters obtained from *Rhus rhodanthema*, *Berberis aetnensis*, and *Rumex obtusifolius*, 1194; P., **1897**, 198.
Perkin, *Arthur George*, and *H. W.* **Martin**, rhamnazin, 818; P., **1897**, 139.
—— —— derivatives of cotoin and phloretin, 1149; P., **1897**, 171.
Perkin, *William Henry, jun.*, sulphocamphylic acid ($C_9H_{14}SO_5$) with remarks on the constitution of camphoric acid and camphoronic acid, P., **1896**, 189.
Perkin, *William Henry, jun.*, and *Jocelyn Field* **Thorpe**, synthesis of *i*-camphoronic acid, 1169; P., **1897**, 72.
Perkin, *William Henry, jun.* See also *William Henry* **Bentley**.
Pickering, *Percival Spencer Umfreville.* See *Horace T.* **Brown**.
Picton, *Harold*, and *S. Ernest* **Linder**, solution and pseudo-solution. Part III. The electrical convection of certain dissolved substances, 568.
Pitt, *A. E.* See *John Theodore* **Hewitt**.
Pope, *Frank G.* See *John Theodore* **Hewitt**.
Pope, *William Jackson*, the localisation of deliquescence in chloral hydrate crystals, P., **1896**, 249.
—— the refraction constants of crystalline salts. A correction, P., **1897**, 11.
Pope, *William Jackson*, and *Frederic Stanley* **Kipping**, "enantiomorphism," P., **1896**, 249.
Pope, *William Jackson.* See also *Frederic Stanley* **Kipping**.
Price, *Thomas Slater.* See *Percy* **Frankland**.
Purdie, *Thomas*, and *G. Druce* **Lander**, preliminary note on the action of alkyl iodides on silver malate, P., **1896**, 221.

R.

Ramage, *Hugh.* See *Walter Noel* **Hartley**.
Ramsay, *William*, presentation of Longstaff medal to, 591; P., **1897**, 80.
Ray, *Prafulla Chandra*, the nitrites of mercury and the varying conditions under which they are formed, 337; P., **1896**, 217.
—— mercury hyponitrites, 348; P. **1896**, 217.
—— on the action of sodium hyponitrite on mercuric solutions, 1097.
—— on a new method of preparing mercuric hyponitrite, 1105.
—— the interaction of mercurous nitrite and the alkyl iodides, P., **1896**, 218.
Rayleigh, *John William* **Strutt** (*Lord*), observations on the oxidation of nitrogen gas, 181; P., **1897**, 17; discussion, P., 18.
Renwick, *Frank Forster.* See *William Setten* **Gilles**.
Rettie, *Theodore*, compounds of metallic hydroxides with iodine, P., **1896**, 178.
Revis, *Cecil*, and *Frederic Stanley* **Kipping**, derivatives of α-hydrindone, 238; P., **1896**, 229.

Revis, *Cecil*, and *Frederic Stanley* **Kipping**, "α-bromocamphorsulpholactone," P., 1896, 247.

Rodger, *James Wyllie*. See *Thomas Edward* **Thorpe**.

Ruhemann, *Siegfried*, contributions to the knowledge of the β-ketonic acids, part III., 323; P., **1897**, 52.

Ruhemann, *Siegfried*, and *A. S.* **Hemmy**, contributions to the knowledge of the β-ketonic acids, parts IV. and V., 329, 334; P., **1897**, 53, 64.

Russell, *Edward John*. See *Harold Baily* **Dixon**.

Scott, *Alexander*, the atomic weight of carbon, 550; P., **1897**, 70; discussion, P., 71.

—— a new series of mixed sulphates of the vitriol group, 564; P., **1897**, 71; discussion, P., 71.

Sell, *William James*, and *Frederick William* **Dootson**, studies on citrazinic acid, part V., 1068; P., **1897**, 167.

Shenstone, *William Ashwell*, observations on the properties of some highly purified substances, 471; P., **1897**, 2; discussion, P., 3.

Shimidzu, *Tetsukichi*, obituary notice of, 1205.

Smith, *Claud*. See *Charles Frederick* **Cross**.

Smith, *Ernest A*. See *Henry C.* **Jenkins**.

Snape, *Henry Lloyd*, magnesium nitride as a reagent, 526; P., **1897**, 50.

Snape, *Henry Lloyd*, and *Arthur* **Brooke**, Laurent's amarone, 528; P., **1897**, 51.

Sonstadt, *Edward*, the oxidation of ferrous sulphate by sea water, and on the detection of gold in sea water, P., **1896**, 236.

Spiller, *John*, the platinum silver alloys; their solubility in nitric acid, P., **1897**, 118.

Sprankling, *Charles H. G.*, ketolactonic acid and its homologues, 1159; P., **1897**, 173.

Stevens, *Henry Potter*. See *Frederick D.* **Chattaway**.

Sudborough, *John James*, researches in the stilbene series, I., 218; P., **1897**, 19.

Sudborough, *John James*, *Percy G.* **Jackson**, and *Lorenzo L.* **Lloyd**, di-ortho-substituted benzoic acids, part III., hydrolysis of substituted benzamides, 229; P., **1897**, 20.

T.

Thomas, *George L*. See *Sydney* **Young**.

Thorpe, *Jocelyn Field*. See *William Henry* **Perkin**, *jun*.

Thorpe, *Thomas Edward*, the so-called hydrates of isopropylic alcohol, 920; P., **1897**, 150.

Thorpe, *Thomas Edward*, and *James Wyllie* **Rodger**, the viscosity of mixtures of miscible liquids, 360; P., **1897**, 49.

Tingle, *Alfred*. See *Francis Robert* **Japp**.

Titherley, *Arthur W.*, sodamide and some of its substitution derivatives, 460; P., **1897**, 45.

—— rubidamide, 469; P., **1897**, 46.

Tutton, *Alfred Edwin*, the refraction constants of crystalline salts, 235; P., **1897**, 10.

—— connection between the crystallographical characters of isomorphous salts and the atomic weight of the metals contained. A comparative crystallographical study of the normal selenates of potassium, rubidium, and cæsium, 846; P., **1897**, 115; discussion, P., 118.

V.

Vernon Harcourt. See **Harcourt**.

W.

Walenn, *William Henry*, obituary notice of, 1206.

Walker, *James*, and *Frederick John* **Hambly**, electrical conductivity of diethylammonium chloride in aqueous alcohol, 61; P., **1896**, 246.

Walker, *James*, and *Sydney A.* **Kay**, velocity of urea-formation in aqueous alcohol, 489; P., **1897**, 75.

Walker, *James*, and *John S.* **Lumsden**, dissociation pressure of alkylammonium hydrosulphides, 428; P., **1897**, 48.

Wildermann, *Meyer*, Dalton's law in solution (molecular depression of mixtures of two non-electrolytes, 743; P., **1897**, 19.

—— experimental verification of van't Hoff's constant in very dilute solution (law of molecular depression), 796; P., **1897**, 139.

Williams, *Miss Katherine I.*, the composition of cooked fish, 649; P., **1897**, 88; discussion, P., 89.

Wormley, *Theodore George*, obituary notice of, 1206.

Wynne, *William Palmer*. See *Henry Edward* **Armstrong**.

Y.

Young, *George*, oxidation of phenylstyrenyloxytriazole, 311; P., **1897**, 53.

—— note on the formation of diacetanilide, P., **1897**, 156.

Young, *George*, and *Henry* **Annable**, formation of substituted oxytriazoles from phenylsemicarbazide, 200; P., **1896**, 246.

Young, *George*, and *Ernest* **Clark**, naphthylcarbamides, 1200; P., **1897**, 199.

Young, *Sydney*, the vapour pressures, specific volumes, and critical constants of normal pentane, with a note on the critical point, 446; P., **1897**, 58; discussion, P., 59.

Young, *Sydney*, and *George L.* **Thomas**, some hydrocarbons from American petroleum, I., normal and iso-pentane, 440; P., **1897**, 58; discussion, P., 59.

INDEX OF SUBJECTS.

TRANSACTIONS. 1897.

And also to Proceedings of the Session 1896—1897, Nos. 169 to 182, Nov., 1896—June, 1897 (marked P.).

A.

Acacia catechu, the composition of catechu from (PERKIN), 1136.

Acetaldehyde, formation of (COHEN and CALVERT), 1051.
action of water on, of ammonia and water on, and the thermal values for its hydration (BROWN and PICKERING), 775.

Acetaldoxime, action of methylic iodide and bromide and of ethylic iodide on (DUNSTAN and GOULDING), 577; P., 1897, 76.

Acetamide, action of sodamide on (TITHERLEY), 467; P., 1897, 46.
chlor-, action of phenylallylthiocarbimide on (DIXON), 632; P., 1897, 8.

m- and *p*-**Acetamidohydroxydiphenyltriazole** (YOUNG and ANNABLE), 209, 212; P., 1896, 246.

1 : 2-Acetamidomethoxynaphthalene, its behaviour towards SO_2Cl_2, and its 3′-bromo-derivative (DAVIS), P., 1896, 232.

1′ : 2-Acetamidomethoxnaphthalene (DAVIS), P., 1896, 231.

Acetanilide, chlor- and brom-, action of thiourea on (DIXON), 626; P., 1897, 6.

Acetic acid, brom-, condensation of ethylic salt, with ethylic dimethylacetoacetate (PERKIN and THORPE), 1178; P., 1896, 72.

Acetic acid, brom-, ethylic salt, action of ethylic sodioacetoacetate on (SPRANKLING), 1165; P., 1897, 173.
action of zinc and ethylic oxalylacetate on (LAWRENCE), 458; P., 1897, 65.
chlor-, ethylic salt, action of ethylic acetoacetate on (RUHEMANN and HEMMY), 329.
action of *αα*-phenylmethylthiourea and of *o*-tolylthiourea on (DIXON), 623, 631; P., 1897, 8.

Acetic chloride, chlor-, action of lead thiocyanate on (DIXON), 620.

Acetoacetic acid, ethylic salt, action of ethylic chloracetate on (RUHEMANN and HEMMY), 329.
condensation of, with ethylic *α*-bromi*so*butyrate (PERKIN and THORPE), 1192; P., 1896, 72.

Acetoacetic acid, sodio-, ethylic salt, action and rate of action of ethylic bromacetate *α*-bromobutyrate, bromopropionate and bromisovalerate (SPRANKLING), 1160—1167; P., 1897, 173, 174.
action of, on bromodiphenylmethane and bromotriphenylmethane (HENDERSON and PARKER), 676; P., 1897, 119.

1 : 2- Acetonaphthalide, 3′-bromo- (DAVIS), P., 1896, 232.

Aceto-α-naphthylcarbamide (YOUNG and CLARK), 1201; P., 1897, 199.

Acetone, freezing points of dilute aqueous solutions of (WILDERMANN), 800; P., **1897,** 139.
influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P., **1897,** 76.
Acetonedicarboxylic acid, reduction of (BOLAM), P., **1896,** 184.
ethylic salt, action of ethylic α-chlorocrotonate on (RUHEMANN), 327; P., **1897,** 52.
condensation of, by means of sodium (JERDAN), 1107; P., **1897,** 168.
Acetonylmalic acid, crystallography of (RUHEMANN), 324.
Acetophenone, from hydrolysis of methylacetophenoxime hydriodide (DUNSTAN and GOULDING), 579.
Acetophenoneoxime, action of methylic and ethylic iodides on, and of methylic iodide in presence of sodium methoxide (DUNSTAN and GOULDING), 580.
Aceto-*p*-toluidide, chlor- (DIXON), 629.
Acetoxime, sodium derivative of (TITHERLEY), 461; P., **1897,** 45.
action of methylic bromide and iodide and of ethylic iodide on (DUNSTAN and GOULDING), 577, 579; P., **1897,** 77.
Acetoxydiphenyltriazole, *m*-nitro- (YOUNG and ANNABLE), 211; P., **1896,** 246.
3-Acetoxyphenyl-*m*-tolyltriazole (YOUNG and ANNABLE), 214; P., **1896,** 246.
Acetylalkylsuccinic acids, alkylic salts, action of heat on (SPRANKLING), 1167; P., **1897,** 174.
Acetylallylenedicarboxylic acid, ethylic salt, and the action of aniline on it (RUHEMANN), 326; P., **1897,** 52.
Acetylapigenin dimethyl ether and diethyl ether, preparation of (PERKIN), 812, 815; P., **1897,** 138.
Acetylazobenzene-cotoin, properties of (PERKIN and MARTIN), 1150; P., **1897,** 172.
Acetylcamphoroxime (FORSTER), 1040; P., **1897,** 165.
Acetyl*iso*cinnamenylmandelic acid (JAPP and LANDER), 138; P., **1896,** 107.
Acetyldimethylbutyric acid, semicarbazone (W. H. PERKIN, jun.), P., **1896,** 191.
α-Acetyl-β-diphenylpropionic acid and its ethylic salt (HENDERSON and PARKER), 676, 677; P., **1897,** 119.
Acetyldiphenyltriazole, *p*-nitro- (YOUNG and ANNABLE), 206; P., **1896,** 246.
Acetylene, formation of, from carbon and hydrogen BONE and JERDAN), 55; P., **1896,** 175.
Acetylene, action of the electric arc on (BONE and JERDAN), 60; P., **1896,** 177.
behaviour of an aqueous solution of, towards bromine (GRAY), 1027; P., **1897,** 140.
explosion of, with insufficient oxygen (BONE and CAIN), 26; P., **1896,** 176.
a Bunsen burner for (MUNBY), P., **1897,** 103.
Acetylene, brom-, behaviour of, towards hydrogen bromide (GRAY), 1029; P., **1897,** 140.
β-Acetylnaphthylcarbamide (YOUNG and CLARK), 1203; P., **1897,** 199.
Acetylosyritrin (PERKIN), 1133.
Acetyl-*p*-phenetolazophenol (HEWITT, MOORE and PITT), P., **1897,** 159.
Acetylphloretindisazobenzene (PERKIN and MARTIN), 1152.
Acetylphloroglucinolazobenzene, preparation of (PERKIN), 190.
β-Acetyl-α-*iso*propylpropionic acid (SPRANKLING), 1165.
Acetyl-β-*iso*propylsuccinic acid, ethylic salt (SPRANKLING), 1163.
Acetylsuccinic acid, ethylic salt and methylic salt (SPRANKLING), 1162, 1165.
molecular refraction of, and the action of ammonia, aniline, phenylhydrazine and of bromine on (RUHEMANN and HEMMY), 329, 332; P., **1897,** 53.
phenylhydrazone of, and action of heat on (RUHEMANN and HEMMY), 332.
Acetylsuccinic acid, γ-brom-, ethylic salt, and the action of heat on (RUHEMANN and HEMMY), 333; P., **1897,** 53.
Acetyltartranilide, preparation of (COHEN and HARRISON), 1060.
Acetylthiocarbimide, brom-, action of *p*-toluidine methylaniline and benzylaniline on (DIXON), 629.
chlor-, and the action of aniline *o*-toluidine, *p*-toluidine, methylaniline and benzylaniline on (DIXON), 620, 621, 629; P., **1897,** 8.
Acid, $C_9H_{12}O_2$ from chlorodiparaconic acid, by the action of sodium amalgam (MYERS), 616, 617.
$C_{12}H_{16}O_8Br_2$, methylic salt of, obtained from the condensation product of ethylic acetonedicarboxylate (JERDAN), 1112.
$C_{12}H_{12}O_8$, obtained by the action of sodium on ethylic acetonedicarboxylate, methylic and ethylic salts of (JERDAN), 1111; P., **1897,** 168.

Acid, $C_{16}H_{13}NO_5$, from the action of hydriodic acid on corydic acid (DOBBIE and MARSDEN), 663; P., **1897**, 101.

$C_{17}H_{15}NO_8$, from the oxidation of corydic acid (DOBBIE and MARSDEN), 663; P. **1897**, 102.

Acids, fatty, separation of mixtures of (CROSSLEY), 580; P., **1897**, 21.

ψ-Aconine, properties of, and its salts (DUNSTAN and CARR), 357; P., **1895**, 154.

ψ-Aconitine, extraction of, from *A. ferox* roots, effect of heat on it, its hydrolysis, its properties, and its salts (DUNSTAN and CARR), 351, 352, 356, 358; P., **1895**, 154.

crystallographic character of (POPE), 352.

Aconitum ferox, the alkaloids of (DUNSTAN and CARR), 351; P., **1895**, 154.

Acridine dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.

Address, Presidential (HARCOURT), 592; P., **1897**, 80.

Adipic acid, ethylic salt, from interaction of ethylic sodiomalonate and ethylenic chloride (LEAN and LEES), 1067; P., **1897**, 161.

Agarobilla, composition and dyeing properties of (PERKIN), 1137; P., **1897**, 170.

Aluminium, commercial, composition of (HARTLEY and RAMAGE), 547; P., **1897**, 47.

Aluminium alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 389; P., **1897**, 61.

Aluminium salts, spectroscopic analysis of (HARTLEY and RAMAGE), 548; P., **1897**, 47.

Aluminium oxide (*alumina*), composition of (HARTLEY and RAMAGE), 547; P., **1897**, 47.

Aluminium minerals and ores, composition of (HARTLEY and RAMAGE), 538; P., **1897**, 12.

Amides of alkali metals, melting points of (TITHERLEY), 470.

Ammonium iodide, refractive power of, when dissolved in ethylic alcohol (GLADSTONE and HIBBERT), 827; P., **1897**, 142.

hydrosulphide, dissociation pressure and heat of dissociation of (WALKER and LUMSDEN), 432; P., **1897**, 48.

***i*-Amylic alcohol** (*isobutylcarbinol*), discovery of (PASTEUR LECT.), 705.

Amylic alcohol (*sec-butylcarbinol*, *methylethylcarbincarbinol*) **racemisation** of (FRANKLAND and PRICE), **255**.

Anhydracetonebenzil and the action of acetic anhydride on it (JAPP and LANDER), 130; P., **1896**, 107.

Anhydracetonebenzilcarboxylic acid (JAPP and LANDER), 140; P., **1896**, 107.

Anhydracetophenonebenzil. See Dibenzoylcinnamene.

α-Anhydrobenzillevulinic acid, its barium salt, and the action of hydroxylamine on (JAPP and MURRAY), 146; P., **1896**, 146.

α- and **β-Anhydrobenzillevulinic acids**, action of permanganate on (JAPP and MURRAY), 148.

β-Anhydrobenzillevulolactone (JAPP and MURRAY), 148; P., **1896**, 146.

***i*-Anhydrocamphoronic acid** (PERKIN and THORPE), 1191; P., **1896**, 73.

Anhydro-oxalaconitic acid, triethylic salt (RUHEMANN and HEMMY), 336; P., **1897**, 64.

Aniline (*phenylamine*), freezing points of dilute aqueous solutions of (WILDERMANN), 800; P., **1897**, 139.

action of sodamide on (TITHERLEY), 464; P., **1897**, 45.

oxidation of, by chromic acid (COLLIE), 1022.

Aniline-blue, electrical convection of, in solutions (PICTON and LINDER), 571.

Anisic acid from the hydrolysis of apigenin dimethyl ether (PERKIN), 814; P., **1897**, 138.

Annual General Meeting, 591; P., **1897**, 80.

Anthrax, inoculation for, and bacillus of (PASTEUR LECT.), 735, 740; P., **1897**, 80.

Apigenin, preparation, properties, constitution, derivatives, and decomposition products; action of nitric acid on (PERKIN), 806, 817; P., **1897**, 54, 138.

comparative dyeing experiments with (PERKIN), 818; P., **1897**, 138.

dimethyl ether and diethyl ether, preparation and properties of, and their acetyl derivatives (PERKIN), 815; P., **1897**, 138.

Apigenin, *di*brom- (PERKIN), 808; P., **1897**, 54.

Apium petroselium, the glucoside from (PERKIN), 805; P., **1897**, 53.

Argon, separation of, from the atmosphere (RAYLEIGH), 184; P., **1897**, 18.

Arsenic *tri*sulphide, electrical convection of, in solutions (PICTON and LINDER), 571.

β-Asparagine, pseudoracemism of (KIPPING and POPE), 1001; P., **1897**, 136.

i-**Aspartic acid**, synthesis of (PASTEUR LECT.), 704.

Association, molecular, and rotatory power of optically active compounds (CROMPTON), 950; P., **1897**, 111.

dielectric constant, dissociating power, and osmotic pressure, connection of (CROMPTON), 943; P., **1897**, 110.

and heats of neutralisation of acids and bases (CROMPTON), 951; P., **1897**, 111.

Asymmetric carbon atoms, superposition of the optical effects of (FRANKLAND and PRICE), 266; P., **1897**, 9.

Atmospheric air, carbonic anhydride in (LETTS and BLAKE), P., **1896**, 192.

Atomic weight of carbon (SCOTT), T., 550; P., **1897**, 70.

Atropine, auribromide, and hydrobromide gold chloride, the formation and properties of (JOWETT), 681.

Azine dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.

Azonium dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.

B.

Balance Sheet of the Chemical Society, March 27th, 1897, 600.

of the Research Fund, March 27th, 1897, 602.

Barium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

chloride, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 825.

Beer, researches on (PASTEUR LECT.), 727; P., **1897**, 80.

Benzaldehyde, formation of (COHEN and CALVERT), 1051; P., **1897**, 166.

from camphoroxime benzylic ether (FORSTER), 1032; P., **1897**, 165.

action of ammonium cyanide on (SNAPE and BROOKE), 529; P., **1897**, 51.

action of magnesium nitride on, (SNAPE), 527; P., **1897**, 50.

condensation of, with phenylazocarbamide (YOUNG and ANNABLE), 201; P., **1896**, 246.

Benzaldehyde, *o*-nitro-, preparation of (COHEN and HARRISON), 1058; P., **1897**, 166.

estimation of, by phenylhydrazine (COHEN and HARRISON), 1059.

m-nitro-, acid obtained in preparation of (COHEN and CALVERT), 1056.

Benzaldehyde, *m*- and *p*-nitro-, oxidation of the condensation product of, with phenylsemicarbazide (YOUNG and ANNABLE), 205; P., **1896**, 246.

p-nitro-, formation of (COHEN and HARRISON), 1058; P., **1897**, 166.

Benzaldehydephenylhydrazone, *o*- and *p*-nitro- (COHEN and HARRISON), 1058.

Benzamide, action of sodamide on (TITHERLEY), 468; P., **1897**, 46.

Benzamide, *o*-, *m*-, and *p*-bromo-, 2 : 4-, 2 : 6-, and 3 : 5-*di*bromo-, hydrolysis of (SUDBOROUGH, JACKSON, and LLOYD), 232; P., **1897**, 20.

3 : 5-*di*bromo-, and 2 : 4 : 6- and 3 : 4 : 5-*tri*bromo-, preparation and properties of (SUDBOROUGH, JACKSON and LLOYD), 230; P., **1897**, 20.

2 : 4 : 6-*tri*chloro- (SUDBOROUGH, JACKSON and LLOYD), 231; P., **1897**, 21.

Benzamidohydrindene (REVIS and KIPPING), 251; P., **1896**, 229.

Benzene, formation of, from hexanaphthene (FORTEY), P., **1897**, 162.

a space formula for (COLLIE), 1013; P., **1897**, 143.

viscosity of mixtures of carbon tetrachloride and (THORPE and RODGER), 362; P., **1897**, 49.

Benzene, di-substitution derivatives of (COLLIE), 1018.

*tri*bromo-, from bromacetylene (GRAY), 1029; P., **1897**, 140.

chloro-, nitration of (COLLIE), 1020; P., **1897**, 144.

nitro-, colour and spectrum of vapour of (FRISWELL), 1013; P., **1897**, 148.

freezing and boiling points of, specific gravity of solid and liquid (FRISWELL), 1011; P., **1897**, 148.

coloration of a solution of, in sulphuric acid by the action of light (FRISWELL), P., **1897**, 148.

chlorination of (COLLIE), 1019; P., **1897**, 144.

Benzil, preparation of (SUDBOROUGH), 219; P., **1897**, 19.

Benzo-α-naphthylcarbamide (YOUNG and CLARK), 1202; P., **1897**, 199.

Benzonitrile, 2 : 4 : 6-*tri*bromo- (SUDBOROUGH, JACKSON, and LLOYD), 230; P., **1897**, 21.

2 : 4 : 6-*tri*chloro- (SUDBOROUGH, JACKSON, and LLOYD), 231; P., **1897**, 21.

Benzophenylsemicarbazide, the two probable isomerides of (YOUNG and ANNABLE), 202; P., **1896**, 246.

Benzoyl, nitro-, probable identity of, with α-nitrobenzylic alcohol (*phenylnitrocarbinol*) (COHEN and CALVERT), 1055; P., **1897**, 166.

Benzoylacetic acid, ethylic salt, action of ethylic α-chlorocrotonate on (RUHEMANN), 327; P., **1897**, 52.

Benzoylazotide and its dry distillation (SNAPE and BROOKE), T., 529; P., **1897**, 51.

Benzoyl-β-butylenedicarboxylic acid, ethylic salt (RUHEMANN), 327; P., **1897**, 52.

Benzoylcamphoroxime, (FÖRSTER), 1041; P., **1897**, 166.

β-Benzoylcinnamic acid (*desylenacetic acid*) and its reduction (JAPP and LANDER), 133, 155; P., **1896**, 107, 109.

β-Benzoylnaphthylcarbamide (YOUNG and CLARK), 1203; P., **1897**, 199.

Benzoyloxydiphenyltriazole, *m*- and *p*-nitro- (YOUNG and ANNABLE) 207, 211; P., **1896**, 246.

Benzoyloxyphenylstyryltriazole, (YOUNG and ANNABLE), 216; P., **1896**, 246.

3-Benzoyloxyphenyl-*m*-tolyltriazole (YOUNG and ANNABLE), 214; P., **1896**, 246.

Benzoyl-*o*- and -*p*-phenetolazophenol (HEWITT, MOORE, and PITT), P., **1897**, 157.

β-Benzoyl-β-phenylpropionic acid (*desylacetic acid*) (JAPP and LANDER), 136, 155; P., **1896**, 107, 109.

Benzoylsuccinic acid, ethylic salt, and the action of ammonia on it (RUHEMANN and HEMMY), 333, 334; P., **1897**, 53.

Benzylamine, formation of (COHEN and CALVERT), 1054; (DELÉPINE), A., i, 394.

Benzylglutaconic acid (BOLAM), P., **1896**, 185.

α-Benzylhydroxylamine, from camphoroxime benzylic ether, platinochloride (FORSTER), 1039; P., **1897**, 165.

Benzylic alcohol, action of nitrogen tetroxide on (COHEN and CALVERT), 1052; P., **1897**, 166.

α-nitro- (*phenylnitrocarbinol*) (COHEN and CALVERT), 1054; P., **1897**, 166.

o- and *p*-nitro-, action of nitrogen tetroxide on (COHEN and HARRISON), 1057; P., **1897**, 166.

nitrite, preparation of (COHEN and CALVERT), 1050; P., **1897**, 166.

Benzylideneaminohydrindene (REVIS and KIPPING), 251; P., **1896**, 229.

Benzylidenic nitrosate (COHEN and CALVERT), 1055; P., **1897**, 166.

Benzylpropylenetetracarboxylic acid, ethylic salt, action of alkalis on (BOLAM), P., **1896**, 184, 185.

Berberine,, occurrence of, in *Berberis Oetnensis* (PERKIN), 1198; P., **1897**, 198.

Berberis Oetnensis, occurrence of berberine in (PERKIN), 1198; P., **1897**, 198.

Beryllium sulphate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.

Bismuth, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

Bismuth alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 390; P., **1897**, 61.

Bittern, gold in (LIVERSIDGE), 298; P., **1897**, 22.

Blende, composition of (HARTLEY and RAMAGE), 540; P., **1897**, 13.

Boiling point of normal pentane (YOUNG), 446; P., **1897**, 58.

Borneol, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 286; P., **1896**, 187.

Bromine, action of highly purified, on mercury (SHENSTONE), 485; P., **1897**, 2.

Butanetetracarboxylic acid, ethylic salt, action of sodium ethoxide on (LEAN and LEES), 1067; P., **1897**, 161.

aaa_1-Butanetricarboxylic acid (*adipocarboxylic acid*), ethylic salt (LEAN and LEES), 1065; P., **1897**, 161.

aaa_1-Butanetricarboxylic acid, sodio-, ethylic salt, action of ethylic iodide on (LEAN and LEES), 1065.

Butyric acid, α-bromo-, action of ethylic sodioacetoacetate on (SPRANKLING), 1160; P., **1897**, 173.

Butyric bromide, α-bromo-, action of lead thiocyanate on (DIXON), 635.

***iso*-Butyric acid**, bromo-, ethylic salt, condensation of, with ethylic acetoacetate (PERKIN and THORPE), 1192; P., 72.

Butyrolactonecarboxylic acid (BOLAM), P., **1896**, 184.

Butyrylthiocarbimide, -α-bromo-, and the action of aniline, and of *o*-toluidine on (DIXON), 635; P., **1897**, 9.

C.

Cadmium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

Cadmium alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 387; P., **1897**, 61.

Cadmium hydroxide, precipitation of iodine along with (RETTIE), P., **1896**, 178.
Cæsalpina brevifolia and *C. coriaria*, composition of the fruit of (PERKIN), 1137; P., **1897**, 170.
Cæsium, selenate, crystallography and physical properties of (TUTTON), 846; P., **1897**, 115.
Calcium, occurrence of, in common minerals (HARTLEY and RAMAGE), 583; P., **1897**, 11.
i-cis-π-**Camphanic acid**, comparison of, with the active acid (KIPPING and POPE), 983; P., **1897**, 133.
trans-π-**Camphanic acid**, crystallographic comparison of, with the inactive acid (KIPPING and POPE), 973; P., **1897**, 133.
trans- and *cis*-π-**Camphanic acids**, racemic and pseudoracemic (KIPPING and POPE), 990.
Camphene, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 287; P., **1896**, 187.
derivatives, crystallography of (MIERS and BOWMAN), 293.
*di*chloride, from camphor (MARSH and GARDNER), 288; P., **1897**, 187.
Camphene, *tri*bromo-, and its α- and β-tribromides (MARSH and GARDNER), 285—287; P., **1896**, 187.
chloro-, and its α- and β-hydrochlorides (MARSH and GARDNER), 288, 289; P., **1896**, 187.
and its behaviour toward concentrated sulphuric acid (MARSH and GARDNER), P., **1897**, 137.
Camphenylnitramine, from camphoroxime (FORSTER), 197; P., **1897**, 21.
Camphoic acid, from the oxidation of ketopinic acid (GILLES and RENWICK), P., **1897**, 158.
Campholenonitrile, from the ethers of camphoroxime (FORSTER), 1031.
cis-**Camphopyric acid**, from oxidation of fenchene (GARDNER and COCKBURN), P., **1897**, 137.
Camphor, optical inversion of (KIPPING and POPE), 956; P., **1897**, 132.
behaviour of, towards phosphorus trichloride and bromine, and towards phosphorus pentachloride (MARSH and GARDNER), 285, 288; P., **1896**, 187.
Camphor, α-bromo-, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 286; P., **1896**, 187.
Camphor, inactive π-bromo-, and π-chloro-, melting points and racemism of (KIPPING and POPE), 996.
αα-chlorobromo-, stereoisomeric forms (LOWRY), P., **1897**, 159.
nitro-, birotation of (LOWRY), P., **1897**, 160.
nitrobromo-, reduction of (LOWRY), P., **1897**, 160.
Camphoric acid, constitution of (W. H. PERKIN, jun.), P., **1896**, 191.
Camphoric acid, *i*-π-bromo-, crystalline form of anhydride (KIPPING and POPE), 969; P., **1897**, 133.
π-chloro- and its anhydride (LAPWORTH and KIPPING), 15; P., **1896**, 216.
i-π-chloro- and its anhydride (KIPPING and POPE), 967; P., **1897**, 133.
Camphoric anydride, ω-bromo-, racemism of (KIPPING and POPE), 999.
active and inactive π-bromo-, melting points of (KIPPING and POPE), 996.
Camphorimine, from camphoroxime benzyl ether (FORSTER), 1032; P., **1897**, 165.
i-**Camphoronanilic acid** (PERKIN and THORPE), 1192.
Camphoronic acid, behaviour of, at high temperatures (W. H. PERKIN, jun.), P., **1896**, 192.
synthesis of (W. H. PERKIN, jun., and THORPE), P., **1897**, 73.
i-**Camphoronic acid**, synthesis of, and its anilic acid (PERKIN and THORPE), 1169, 1192; P., **1896**, 72.
Camphoroxime, behaviour of, towards bromine (FORSTER), 1045.
behaviour of, towards methylic iodide, nitric acid, nitric peroxide, and potassium permanganate (FORSTER), 191; P., **1897**, 21.
hydrobromide, platinochloride, methyl, ethyl, benzyl ethers, acetyl and benzoyl derivatives (FORSTER), 1030; P., **1897**, 165.
i-**Camphoroxime** (FORSTER), 1048; P., **1897**, 166.
Camphorsulpholactone, α-bromo- (REVIS and KIPPING), P., **1896**, 247.
Camphorsulphonic acid, α-bromo-, oxidation of ammonium salt (LAPWORTH and KIPPING), 7; P., **1896**, 215.
chlorides and bromides, active and inactive, melting points and pseudoracemism of (KIPPING and POPE), 996.
trans-**Camphotricarboxylic acid** and **anhydride**, racemic and pseudoracemic KIPPING and POPE), 990.
i-trans-**Camphotricarboxylic anhydride**, crystalline form (KIPPING and POPE), 985; P., **1897**, 133.

trans-**Camphotricarboxylic anhydride**, melting point and racemism of (KIPPING and POPE), 996.

α-Camphylic acid, chloride, anilide, ethylic salt, dibromide, dihydrobromide, and bromo-derivative of (W. H. PERKIN, jun.), P., **1896**, 189, 190.

β-Camphylic acid, and its dibromide, hydrobromide, bromo-, and *iso*-bromo-derivatives (W. H. PERKIN, jun.), P., **1896**, 190.

iso-**β-Camphylic acid**, and its chloride, anilide and ethylic salt (W. H. PERKIN, jun.), P., **1896**, 190.

Carbamide, (*urea*) velocity of formation of, from ammonium cyanate dissolved in aqueous alcohol (WALKER and KAY), 489; P., **1897**, 75.

influence of glycerol, cane-sugar, glycol, methylic alcohol, and acetone on the rate of formation of (WALKER and KAY), 506; P., **1897**, 76.

freezing points of dilute aqueous solutions of (WILDERMANN), 802; P., **1897**, 139.

freezing points of solutions of mixtures of resorcinol, cane-sugar, dextrose, and alcohol with (WILDERMANN), 750; P., **1897**, 119.

Carbimidoglycolide, thio- (*Dioxythiazole*) (DIXON), 632; P., **1897**, 8.

Carbon, preparation of pure (BONE and JERDAN), 45; P., **1896**, 61.

atomic weight of (SCOTT), 550; P., **1897**, 70.

direct union of, with hydrogen (BONE and JERDAN), 41; P., **1896**, 175.

Carbon tetrachloride, viscosity of mixtures of benzene and (THORPE and RODGER), 362; P., **1897**, 49.

Carbon *mon*oxide (*carbonic oxide*) and hydrogen, mutual action of, at high temperatures (BONE and JERDAN), 52.

explosion of mixtures of chlorine peroxide and (DIXON and RUSSEL), 605; P., **1897**, 99.

Carbon *di*oxide (*carbonic anhydride*), estimation of, by PETTENKOFER'S method (LETTS and BLAKE), **1896**, P., 192.

Carbon *bi*sulphide, viscosity of mixtures of methylic iodide and (THORPE and RODGER), 367; P., **1897**, 50.

Carbotetrinic acid, ethylic salt (RUHEMANN and HEMMY), 333; P., **1897**, 53.

Carnallite, gold in (LIVERSIDGE), 299.

Carvone tribromide, pseudoracemism of (KIPPING and POPE), 1000; P., **1897**, 136.

Carvoxime, density of the active and inactive forms of (KIPPING and POPE), 999; P., **1897**, 136.

Catechu, colouring matters of, from different sources (PERKIN), 1135.

Celluloses, hydrolysis of pure, and fermentation of the hydrolytic products (CROSS, BEVAN, and SMITH), 1005; P., **1897**, 150.

Change, chemical and physical, identity of different kinds of (HARCOURT), 595.

Chloral hydrate, deliquescence of crystals of (POPE), P., **1896**, 249.

Chlorine, pure, preparation of, by the electrolysis of silver chloride (SHENSTONE), 479; P., **1897**, 2.

action of sunlight and of the silent electric discharge on highly purified (SHENSTONE), 486, 487; P., **1897**, 2.

action of highly purified, on mercury (SHENSTONE), 485; P., **1897**, 2.

Hydrochloric acid (*hydrogen chloride*), refractive power of, when dissolved in methylic, ethylic, amylic, and octylic alcohol, ethylic and amylic ether (GLADSTONE and HIBBERT), 827; P., **1897**, 142.

Chlorine peroxide, explosion of mixtures of carbonic anhydride and (DIXON and RUSSEL), 605; P., **1897**, 99.

Chloroform, viscosity of mixtures of ethylic ether with (THORPE and RODGER), 370; P., **1897**, 50.

action of magnesium nitride on (SNAPE), 527; P., **1897**, 50.

Chromium occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

double sulphate of zinc and (SCOTT), 568; P., **1897**, 71.

Chrysin monomethylic ether, dyeing property of (PERKIN and MARTIN), 822.

Cinnamaldehyde, oxidation of the condensation product of, with phenylsemicarbazide (YOUNG and ANNABLE), 215; P., **1896**, 246.

iso-**Cinnamenylmandelic acid**, and its acetyl derivative (JAPP and LANDER), 135, 138; P., **1896**, 107.

Citrazinic acid (2:6-*dihydroxypyridine*-3-*carboxylic acid*), action of phosphorus pentachloride and phosphorus oxychloride on (SELL and DOOTSON), 1068; P., **1897**, 167.

Citric acid, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.

ethylic salt, synthesis of (LAWRENCE), 458; P., **1897**, 65.

Cobalt, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

Cobalt, action of hydrogen peroxide on solutions containing (DURRANT), P., **1896**, 244.
Cobalt *di*oxide (MCCONNELL and HANES), 586; P., **1897**, 62.
double sulphate of copper, nickel, and (SCOTT), 567; P., **1897**, 71.
Cobaltic salts (DURRANT), P., **1896**, 244.
Cobalt ores and minerals, composition of (HARTLEY and RAMAGE), 541; P., **1897**, 13.
Colloids, dissolved, electrical convection of (PICTON and LINDER), 568.
Colour, relation of *o*- and *p*-quinonoid structure to (GREEN), P., **1896**, 226.
Colouring matters, *o*- and *p*-quinonoid structure in (GREEN), P., **1896**, 226.
relationship of vegetable, to accompanying tannins (PERKIN), 1137.
Colpoon compressum, (*Osyris compressa*, *Fusanus compressus*, *Thesium Colpoon*), leaves of, used as a substitute for sumach (PERKIN), 1132.
Copper, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
Copper alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 419; P., **1897**, 61.
Cupric chloride, refractive power of, when dissolved in ethylic alcohol (GLADSTONE and HIBBERT), 827; P., **1897**, 142.
sulphate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 825.
double sulphates of iron, nickel, zinc, magnesium, manganese, cobalt, and (SCOTT), 565; P., **1897**, 71.
Corydaline, action of nitric acid on (DOBBIE and MARSDEN), 657, 658; P., **1897**, 101.
nitrate, properties of (DOBBIE and MARSDEN), 657; P., **1897**, 101.
Corydaline, optically inactive (DOBBIE and MARSDEN), T., 660.
Corydic acid, properties of, salts of, and its behaviour with hydriodic acid (DOBBIE and MARSDEN), 662; P., **1897**, 101.
Cotoin, constitution of, and its acetyl derivatives (PERKIN and MARTIN), 1149, 1152; P., **1897**, 172.
Cotoinazobenzene, and its acetyl derivative (PERKIN and MARTIN), 1150; P., **1897**, 172.
Cotoinazo-*o*- and-*p*-**toluene** (PERKIN and MARTIN), 1150; P., **1897**, 172.
Critical pressure and critical volume, of normal pentane (YOUNG), 448; P., **1897**, 58.
Critical temperature, behaviour of substances near the (YOUNG), 453; P., **1897**, 58.
of normal pentane (YOUNG), 448; P., **1897**, 58.
Crotonic acid, α-chloro-, ethylic salt, action of ethylic benzoylacetate and of ethylic acetonedicarboxylate on (RUHEMANN), 324, 327; P., **1897**, 52.
Crystalline and dissolved salts, refractive powers of (GLADSTONE and HIBBERT), 823; P., **1897**, 141.
structure of externally compensated and optically active forms of a substance (KIPPING and POPE), 992; P., **1897**, 135.
Crystallographic characteristics of pseudoracemic substances (KIPPING and POPE), 994; P., **1897**, 136.
Crystallography of cæsium, potassium, and rubidium selenates (TUTTON), 852, 857, 859; P., **1897**, 115.
of hydrated mercurous nitrite (HOLLAND), 346; P., **1896**, 218.
Enantiomorphism (POPE and KIPPING), P., **1896**, 249.
Optical axes of cæsium, potassium, and rubidium selenates (TUTTON), 874, 881, 887; P., **1897**, 116.
Selective deliquescence in chloral hydrate (POPE), P., **1896**, 249.
ψ-Cumene (1:3:4-*trimethylbenzene*), oxidation of (BENTLEY and PERKIN), 161; P., **1896**, 79.
Cyanamide, sodium derivative of (TITHERLEY), 460; P., **1897**, 45.
Cyanogen:—
Perthiocyanic acid, its hydrolysis with water or strong sulphuric acid, and its oxidation (CHATTAWAY and STEVENS, 607, 611, 612, 613; P., **1897**, 88.
reduction of (CHATTAWAY and STEVENS), 834; P., **1897**, 150.
Cyanomaclurin, diazobenzene derivative of (PERKIN), 187; P., **1897**, 5.

D.

Dehydrocorydaline and its salts (DOBBIE and MARSDEN), 658; P., **1897**, 101.
reduction of (DOBBIE and MARSDEN), 660.
Deliquescence of salts in moist air (HAKE), P., **1897**, 147.
selective, of crystals of chloral hydrate (POPE), P., **1896**, 249.
Density, heat of fusion, and melting point, connection between (CROMPTON), 929; P., **1897**, 110.

Density of amylic glycerates, diacetyl- and dibenzoyl-glycerates (FRANKLAND and PRICE), 268.
of mixtures of liquids (THORPE and RODGER), 360; P., **1897**, 49.
of normal pentane, liquid, and gaseous (YOUNG), 449; P., **1897**, 58.
of potassium, rubidium, and cæsium selenates (TUTTON), 868; P., **1897**, 116.
of mixtures of *iso*propylic alcohol with water (THORPE), 924; P., **1897**, 150.
of racemic and pseudoracemic substances (KIPPING and POPE), 999; P., **1897**, 136.
of deliquescent salts, determination of the (TUTTON), 865.
Deoxybenzoin (*phenyl benzyl ketone*), from desyleneactic acid and alcoholic potash (JAPP and LANDER), 157.
preparation of, and action of phosphorus pentachloride on (SUDBOROUGH), 218, 219; P., **1897**, 20.
Desylacetic acid. See β-Benzoyl-β-phenylpropionic acid.
Desyleneacetic acid. See β-Benzoylcinnamic acid.
Dextrose (d-*glucose*, *grape-sugar*), heat of transformation of the α- into the β- variety (BROWN and PICKERING), 757; P., **1897**, 129, 130.
heat of dissolution of (BROWN and PICKERING), 769.
freezing points of dilute aqueous solutions of (WILDERMANN), 800, 803; P., **1897**, 139.
freezing points of solutions of mixtures of carbamide and (WILDERMANN), 751; P., **1897**, 119.
anhydrous, solution-density of (BROWN, MORRIS, and MILLAR), 78, 276; P., **1896**, 242, **1897**, 14.
anhydrous, cupric-reducing power of (BROWN, MORRIS, and MILLAR), 279, 284; P., **1897**, 4.
Diacetanilide, preparation of (YOUNG), P. **1897**, 156.
Diacetyl-*m*-aminohydroxydiphenyltriazole and **Diacetyl-*p*-aminohydroxydiphenyltriazole** (YOUNG and ANNABLE), 208, 212; P., **1896**, 246.
d- and *i*-**Diacetylglyceric acids**, *l*- and *i*-amylic salts, rotatory power of (FRANKLAND and PRICE), 257, 262, 265; P., **1897**, 9.
Diacetyltartaric anhydride, action of aniline on (COHEN and HARRISON), 1060; P., **1897**, 167.
Diazobenzene, action of, on natural colouring matters (PERKIN), 187.
Dibenzamide, production of, from dibenzoylcinnamenimide (JAPP and TINGLE), 1145; P., **1897**, 170.
αβ-Dibenzoylcinnamene (*anhydracetophenonebenzil*, *benzoylstyrene*), modification of the formula of (JAPP and TINGLE), 1138; P., **1897**, 170.
Dibenzoylcinnamenimide, reduction of; oxidation of; conversion of, into dibenzamide (JAPP and TINGLE), 1145; P., **1897**, 170.
d- and *i*-**Dibenzoylglyceric acids**, *l*- and *i*-amylic salts, rotatory power of (FRANKLAND and PRICE), 258, 262, 266; P., **1897**, 9.
Dibenzoylstyrene. See Dibenzoylcinnamene.
Dicamphylic acid (W. H. PERKIN, jun.), P., **1896**, 189.
Dicarboxyglutaconic acid (*methenylbismalonic acid*, *propylenetetra-carboxylic acid*), ethylic salt action of alkalis and of acids on (BOLAM), P., **1896**, 184.
Dicyanodiamide, from perthiocyanic acid (CHATTAWAY and STEVENS), 613.
Diethylammonium chloride, electrolytic conductivity of (WALKER and HAMBLY), 61; P., **1896**, 246.
Diethylaniline, *penta*bromo- (EVANS), P., **1896**, 235.
as-**Diethylcarbamide**, rate of formation of (WALKER and KAY), 506.
Dihydro-α-camphylic acid (W. H. PERKIN, jun.), P., **1896**, 190.
2:4-Dihydroxydiphenylacetic lactone (HEWITT and POPE), 1086.
αβ-Dihydroxy-αβ-diphenylglutaric acid (JAPP and LANDER), 133; P., **1896**, 107.
Dihydroxymaleic acid, action of heat on aqueous solutions of (FENTON), 375; P., **1897**, 63.
4:6-Dihydroxy-2-methylpyridine, 5-amino- and 5-nitro- (LAPWORTH and COLLIE), 840, 842; P., **1897**, 146.
Dimethylacetoacetic acid, ethylic salt, condensation of, with ethylic bromacetate (PERKIN and THORPE), 1178; P., **1896**, 72.
Dimethylammonium hydrosulphide, dissociation, pressure, and heat of dissociation of (WALKER and LUMSDEN), 433; P., **1897**, 48.
Dimethylaniline, *tetra*bromo- (EVANS), P., **1896**, 235.
Dimethylaniline-*o*-sulphonic acid (EVANS), P., **1896**, 234.
αα-Dimethylglutaric acid (*pentanedicarboxylic acid*) from β-camphylic acid (W. H. PERKIN, jun.), P., **1896**, 191.

1:3-Dimethylcyclohexane (*dimethylhexamethylene*), bromide of (KIPPING and EDWARDS), P., **1896**, 189.

1:2-Dimethylcyclohexane-4-carboxylic acid (*hexahydro-p-xylic acid*) and its chloride anilide, ethylic salt, and bromo- and *di*bromo-derivatives (BENTLEY and PERKIN), 161, 169, 170, 171 ; P., **1896**, 79.

1:3-Dimethylcyclohexane-4-carboxylic acid (*hexahydroxylic acid*) and its anilide and ethylic salt; bromo-derivative, and its ethylic salt (BENTLEY and PERKIN), 173 ; P., **1896**, 79.

1:3-Dimethylcyclohexanone-2 (*dimethylketohexamethylene*) (KIPPING and EDWARDS), P., **1896**, 188.

oxime and semicarbazone (KIPPING), P., **1896**, 248.

1:2-Dimethylcyclohexene-4-carboxylic acid (*tetrahydro-p-xylic acid*) and its ethylic salt (BENTLEY and PERKIN), 157, 172 ; P., **1896**, 79.

Dimethylketohexamethylene. See Dimethylcyclohexanone.

Dimethylpimelic acid (*heptanedicarboxylic acid*), formation of (KIPPING and EDWARDS), P., **1896**, 188.

2:4-Dimethylpyridine(*lutidine*),chloro-, oxidation of (ASTON and COLLIE), 653 ; P., **1897**, 89.

α-chloro- (COLLIE), 309; P., **1897**, 43.

2:4-Dimethylpyridine-3-carboxylic acid, metallic and ethylic salts of (COLLIE), 306 ; P., **1897**, 43.

as-**Dimethylsuccinic acid** (*isobutanedicarboxylic acid*), from sulphocamphylic and β-camphylic acids (W. H. PERKIN, jun.), P., **1896**, 189.

Dimethyl-*o*-toluidine, *tetra*bromo- (EVANS), P., **1896**, 235.

1 : 2 : 5-Dimethyl-*o*-toluidine-*m*-sulphonic acid, action of bromine on (EVANS), P., **1896**, 235.

α- and β-**Dinaphthylcarbamides** (YOUNG and CLARK), 1201, 1203; P., **1897**, 199.

m-**Dioxyphenylcoumarin**, acetyl derivative of the methylic ether of (PERKIN and MARTIN), 1149.

Diparaconic acid, chloro-, and the action of sodium amalgam on (MYERS), 614, 616 ; P., **1897**, 100.

Dipentene, *tetra*bromide, densities of active and inactive forms of (KIPPING and POPE), 999.

hydrochloride nitrolanilide, pseudoracemism of (KIPPING and POPE), 1000 ; P., **1897**, 136.

β-**Diphenanthrylamine** (JAPP and FINDLAY), 1124 ; P., **1897**, 169.

Diphenylamine, action of sodamide on (TITHERLEY), 465 ; P., **1897**, 45.

βγ-**Diphenylbutyric acid** (JAPP and LANDER), 156.

βγ-**Diphenyl-γ-butyrolactone** (JAPP and LANDER), 156 ; P. **1896**, 109.

Diphenylcarbamide, from aniline and ethylic acetosuccinate (RUHEMANN and HEMMY), 331.

Diphenylcrotolactone (JAPP and LANDER), 136, 156 ; P., **1896**, 107.

2′ : 3′-Diphenyleneindole (JAPP and FINDLAY), 1124 ; P., **1897**, 170.

s-**Diphenylethane** (*dibenzyl*), chloro-*di*nitro- (SUDBOROUGH), 223 ; P., **1897**, 20.

Diphenylfumaric acid (JAPP and LANDER), 142 ; (JAPP and MURRAY), 152.

Diphenylmaleic acid (JAPP and LANDER), 132, 142 ; P., **1896**, 107.

Diphenylmaleic anhydride (JAPP and MURRAY), 152.

Diphenylmethane, bromo-, action of ethylic sodio-acetoacetate on (HENDERSON and PARKER), 676, 677 ; P., **1897**, 119.

δ-Diphenylmethyl ethyl ketone, and its oxime and semicarbazone (HENDERSON and PARKER), 677, 678 ; P., **1897**,120.

1 : 2 : 3-Diphenylmethylcyclopentane (JAPP and MURRAY), 153.

1 : 2-Diphenlcyclopentane (*diphenylpentamethylene*) (JAPP and LANDER), 131 ; P., **1896**, 107.

Diphenylcyclopentanone (JAPP and LANDER), 131, 141 ; P., **1896**, 107.

Diphenylcyclopentenonethyloic acid, and its silver salt and oxime (JAPP and MURRAY), 151 ; P., **1896**, 146.

β-**Diphenylpropionic acid** (HENDERSON and PARKER), 677.

Disazobenzeneapigenin, the properties of (PERKIN), 808 ; P., **1897**, 54.

Dissociation and decomposition (HARCOURT), 597.

Distillation, apparatus for automatic steam (MATTHEWS), 318 ; P., **1897**, 18.

fractional, of volatile liquids, apparatus for (YOUNG and THOMAS), 440 ; P., **1897**, 58.

n-**Di-*m*-tolylpiperazine** (FRANCIS), 426, 427.

Dividivi, composition and dyeing properties of(PERKIN), 1137; P., **1897**,170.

E.

ELECTROCHEMISTRY :—

Conductivity of solutions, connection of freezing point and (CROMPTON), 942 ; P., **1897**, 110.

ELECTROCHEMISTRY :—
Conductivity of aqueous and alcoholic solutions of diethylammonium chloride (WALKER and HAMBLY), 61 ; P., **1896**, 246.
Dielectric constant, dissociating power, and molecular association (CROMPTON), 943 ; P., **1897**, 110.
Electric discharge, silent, action of the, on pure chlorine (SHENSTONE), 486 ; P., **1897**, 2.
Electrical convection of dissolved colloids (PICTON and LINDER), 568.
Electrical furnace for heating glass apparatus (SHENSTONE), 478 ; P., **1897**, 3.
Electrolysis, of water exposed to the atmosphere (RAYLEIGH), 181 ; P., **1897**, 17.
Electrolytic dissociation (CROMPTON), 941 ; P., **1897**, 110.
and optical activity (CROMPTON), 946 ; P., **1897**, 111.
and heats of neutralisation of acids and bases (CROMPTON), 951 ; P., **1897**, 111.
Elements, connection between the heats of fusion, densities, and melting points of the (CROMPTON), 932 ; P., **1897**, 110.
Ellagic acid, occurrence of, in various tanning materials, and dyeing properties of (PERKIN), 1137 ; P., **1897**, 170.
Ellagitannic acid, occurrence of, in various tanning materials (PERKIN), 1137.
Enantiomorphism (POPE and KIPPING), P., **1896**, 249.
of optically active crystals (POPE and KIPPING), P., **1896**, 249.
Epsomite, spectroscopic analysis of (HARTLEY and RAMAGE), 550 ; P., **1897**, 47.
Ethane, *hexa*chlor-, action of magnesium nitride on (SNAPE), 527 ; P., **1897**, 50.
3-Ethoxy-1 : 5-diphenyltriazole, *m*-nitro- and *p*-nitro- (YOUNG and ANNABLE), 210 ; P., **1896**, 246.
2-Ethoxynaphthalene, crystallography of derivatives of (DAVIS), P., **1896**, 233.
*di*brom-, *tri*brom-, 3′ : 1-bromamino-, 3′ : 1-bromonitro- (DAVIS), P., **1896**, 232.
3-Ethoxy-1-phenyl-5-styryltriazole (YOUNG and ANNABLE), 216 ; P., **1896**, 246.
3-Ethoxy-1-phenyl-5-*m*-tolyltriazole (YOUNG and ANNABLE), 214 ; P., **1896**, 246.
3-Ethoxy-1-phenyltriazole (YOUNG), 314 ; P., **1897**, 53.
3-Ethoxy-1-phenyltriazole-5-carboxylic acid, ethylic salt of, and amide (YOUNG), 312 ; P., **1897**, 53.
Ethylacetoxime, periodide of, and hydrolysis of (DUNSTAN and GOULDING), 579.
α-Ethyl-β-acetylpropionic acid (SPRANKLING), 1161.
β-Ethylacetylsuccinic acid, ethylic salt (SPRANKLING), 1160 ; P., **1897**, 173.
α-Ethyladipic acid (*hexanedicarboxylic acid*) (LEAN and LEES), 1067 ; P., **1897**, 161.
Ethylamine, action of potassium on (TITHERLEY), 463 ; P., **1897**, 45.
Ethylammonium hydrosulphide, dissociation, pressure, and heat of dissociation of (WALKER and LUMSDEN), 433 ; P., **1897**, 48.
α-Ethylbutane-*aaa*$_1$-tricarboxylic acid (*hexanetricarboxylic acid*) and its ethylic salt (LEAN and LEES), 1065, 1066 ; P., **1897**, 161.
Ethyldeoxybenzoin, action of phosphorus pentachloride on (SUDBOROUGH), 218 ; P., **1897**, 20.
Ethyldibenzoin, a correction (JAPP), 297 ; P., **1897**, 48.
Ethylene, *di*brom- (symmetrical) from acetylene and bromacetylene (GRAY), 1027 ; P., **1897**, 140.
*α-di*brom-, from vinylic tribromide (GRAY), 1025 ; P., **1897**, 140.
Ethyleneaniline, *p-di*nitroso-, and its hydrochloride (FRANCIS), 423 ; P., **1897**, 63.
Ethylenedibenzylidenediphenylene-*p*-tetramine and its hydrochloride (FRANCIS), 424.
Ethylenedibenzylidenedi-*o*-tolylene-*p*-tetramine and its hydrochloride (FRANCIS), 426.
Ethylenediphenylene-*p*-tetramine and its hydrochloride (FRANCIS), 423 ; P., **1897**, 63.
Ethylenedisalicylidenediphenylene-*p*-tetramine and its hydrochloride (FRANCIS), 424.
Ethylenedi-*o*-tolylene-*p*-tetramine and its hydrochloride (FRANCIS), 425 ; P., **1897**, 64.
Ethylenedi-*m*-tolylene-*p*-tetramine (FRANCIS), 427 ; P., **1897**, 64.
Ethylene-*o*-toluidine, its dinitrosamine and *p*-dinitroso-derivative (FRANCIS), 425 ; P., **1897**, 64.
Ethylene-*m*-toluidine, preparation of, and its hydrochloride and dinitrosamine (FRANCIS), 426, 427 ; P., **1897**, 64.

Ethylene-*p*-toluidine dinitrosamine (FRANCIS), 428; P., **1897**, 64.
Ethylenic glycol, influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P. **1897**, 76.
Ethylic alcohol, freezing points of solutions of mixtures of carbamide with (WILDERMANN), 752; P., **1897**, 119.
influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P., **1897**, 76.
Ethylic ether, viscosity of mixtures of chloroform with (THORPE and RODGER), 370; P., **1897**, 50.
Ethylic iodide, action of mercurous nitrite on (RÂY), P., **1896**, 218.
Ethylidenesuccinamide, amino-, and action of potash on (RUHEMANN and HEMMY), 331.
Ethylpiperidine and its picrate (EVANS), 524; P., **1897**, 64.
Ethylpropylpiperidonium iodide, and its enantiomorphous crystals (EVANS), 524; P., **1897**, 64.
Ethylstilbene, chlor*di*bromide, and *di*chloride (SUDBOROUGH), 227; P., **1897**, 20.
β-chlor- (SUDBOROUGH), 218, 226; P., **1897**, 20.
Ethylsulphuric chloride, action of lead thiocyanate on (DIXON), 640.
Ethylthioglycollic acid (*α-thiobutyric acid*) (DIXON), 637; P., **1897**, 9.

F.

Fenchone, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 286; P., **1896**, 187.
behaviour of, towards phosphorus pentachloride (GARDNER and COCKBURN), 1157; P., **1897**, 173.
Fenchonephosphoric acid, chlorosodium, lead, barium, copper salts (GARDNER and COCKBURN), 1157; P., **1897**, 173.
Ferment, butyric, effect of oxygen on (PASTEUR LECT.), 714.
lactic, nature of (PASTEUR LECT.), 712.
Fermentation, chemical theory of (PASTEUR LECT.), 725; P., **1897**, 79.
acetic (PASTEUR LECT.), 721.
alcoholic (PASTEUR LECT.), 712.
butyric (PASTEUR LECT.), 714.
lactic (PASTEUR LECT.), 712.
Fisetin, occurrence of, in *Rhus Cotinus* and *R. rhodanthema* (yellow cedar), (PERKIN), 1195, 1197; P., **1897**, 198.
Fish, composition of cooked (WILLIAMS), 649; P., **1897**, 88.
Flacherie. See Silkworm diseases.
Fluorine, liquefaction of, and properties of liquid (MOISSAN and DEWAR), P., **1897**, 175.
Food, composition of cooked fish used as (WILLIAMS), 649; P., **1897**, 88.
Formaldehyde, formation of (COHEN and CALVERT), 1051.
Formaldehyde, thio-, from the action of hydrogen sulphide on the hydrolytic products of cellulose (CROSS, BEVAN and SMITH), 1006.
Formaldoxime, action of methylic iodide and bromide on (DUNSTAN and GOULDING), 575; P., **1897**, 76.
methiodide, and the action of heat on it; its hydrolysis, and reduction (DUNSTAN and GOULDING), 575, 576, 577.
Formamide, action of sodamide on (TITHERLEY), 466; P., **1897**, 46.
Formic acid, barium, calcium, and strontium salts, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 825.
Fowl cholera, investigation of (PASTEUR LECT.), 739.
Freezing point, of solutions, influence of molecular association on (CROMPTON), 928; P., **1897**, 110.
in dilute solutions, molecular depression of the (WILDERMANN), 796; P., **1897**, 139.
of solutions containing two substances (WILDERMANN), 745; P., **1897**, 119.
of solutions of volatile substances (CROMPTON), 937; P., **1897**, 110.
of alloys of zinc with another metal (HEYCOCK and NEVILLE), 383; P., **1897**, 60.
Fumaric acid, chloro-, ethylic salt, action of ethylic sodiomethylacetoacetate on (RUHEMANN), 324, 325; P., **1897**, 52.
action of ethylic sodio-oxalacetate on (RUHEMANN and HEMMY), 335; P., **1897**, 64.
Furfuraldehyde (*furfurol*) amounts of, produced by hydrolysing various celluloses (CROSS, BEVAN and SMITH), 1005.
influence of fermentation on (CROSS, BEVAN and SMITH), 1007.
Furfuroids, constitution of (CROSS, BEVAN and SMITH), 1001; P., **1897**, 151.

Furnace, electric, for heating delicate glass apparatus (SHENSTONE), 478; P., **1897**, 3.
Fustin, formula of (PERKIN), 1197.

G.

Galactic acid, calcium salts, racemism of (KIPPING and POPE), 999.
Galena, composition of (HARTLEY and RAMAGE), 542; P., **1897**, 13.
Gallium, occurrence of, in common minerals (HARTLEY & RAMAGE), 533; P., **1897**, 11.
Gallnuts, composition and dyeing properties of (PERKIN), 1137; P., **1897**, 170.
Gallotannic acid, occurrence of, in *Rhus rhodanthema* (PERKIN), 1197.
d-**Glucose**. See Dextrose.
Glucoside, $C_{36}H_{30}O_{16}$, occurring in *Rhus rhodanthema* (PERKIN), 1196; P., **1897**, 198.
Glutaconic acid (*propylenedicarboxylic acid*), preparation of (BOLAM), P., **1896**, 184.
d- and *i*-**Glyceric acids**, *l*- and *i*-amylic salts, rotatory power of (FRANKLAND and PRICE), 256, 261, 264; P., **1897**, 9.
Glycerol produced in alcoholic fermentation (PASTEUR LECT.), 713.
influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P., **1897**, 76.
Glycollic acid, thio- (DIXON), 630; P., **1897**, 8.
Glycollic aldehyde from dehydroxymaleic acid, its oxidation, the action of heat and the action of phenylhydrazine on it (FENTON), 375; P., **1897**, 63.
Glyoxal, osazone of (FENTON), 375.
Gold in natural saline deposits and marine plants (LIVERSIDGE), 298; P., **1897**, 22.
presence of, in sea-water, and a method for its detection (SONSTADT), P., **1896**, 238.
nuggets and ingots, crystalline structure of (LIVERSIDGE), 1125; P., **1897**, 22.
origin of (LIVERSIDGE), 1125, P., **1897**, 22.
Gold alloys with sodium, structure of (HEYCOCK and NEVILLE), P., **1897**, 105.
with zinc, freezing points of (HEYCOCK and NEVILLE), 419; P., **1897**, 61.
Grape sugar. See Dextrose.
Gulonic lactones, melting points and racemism of (KIPPING and POPE), 997.

H.

Hæmatites, composition of (HARTLEY and RAMAGE), 536; P., **1897**, 12.
Hæmoglobin, electrical convection of, in solutions (PICTON and LINDER), 571.
1:2:3:4-Hemipinic acid from oxidation of corydic acid (DOBBIE and MARSDEN), 664; P., **1897**, 102.
1:2:4:5-Hemipinic acid (*metahemipinic acid*) from oxidation of corydic acid (DOBBIE and MARSDEN), 664.
Hexahydro-xylic acids. See Dimethyl-*cyclo*hexanecarboxylic acids.
Hexanaphthene, from American petroleum, identity of with *cyclo*-hexane (FORTEY), P., **1897**, 161.
cyclo-**Hexane** (*hexamethylene*, *hexanaphthene*), and its *di*-, *tri*-, and *tetra*-chloro-derivatives (FORTEY), P., **1897**, 161.
Hofmann's violet, electrical convection of, in solutions (PICTON and LINDER), 571.
Hydantoic acids, thio- nomenclature and constitution of (DIXON), 633, 637; P., **1897**, 9.
Hydantoins, thio-, nomenclature of (DIXON), 637; P., **1897**, 9.
Hydrazobenzene, sodium derivative of (TITHERLEY), 462; P., **1897**, 45.
Hydrindene, amino-, and its salts, and benzoyl derivative (REVIS and KIPPING), 250; P., **1896**, 229.
α-Hydrindone, derivatives of, and its oxidation with nitric acid (REVIS and KIPPING), 238; P., **1896**, 229.
bromo-, oxidation of (REVIS and KIPPING), 242; P., **1896**, 229.
iso-nitroso-, alkali derivatives of (REVIS and KIPPING), 248; P., **1896**, 229.
α-Hydrindoneazine (REVIS and KIPPING), 248; P., **1896**, 229.
α-Hydrindone-oxime, action of mineral acids on (REVIS and KIPPING), 248; P., **1896**, 229.
α-Hydrindonesemicarbazone (REVIS and KIPPING), 241.
α-Hydrindonylbromhydrindone (REVIS and KIPPING), 243; P., **1896**, 229.
Hydrocarbon, $C_{14}H_{12}$, from camphoroxime benzyl ether (FORSTER), 1032; P., **1897**, 165.
Hydrogen, direct union of, with carbon (BONE and JERDAN), 41; P., **1896**, 175.

Hydrogen, reaction of, with carbon monoxide at high temperatures (BONE and JERDAN), 52.
influence of platinum on the combination of oxygen with (FRENCH), P., **1897**, 52.
p-**Hydroxyacetophenone** from the decomposition of apigenin (PERKIN), 810; P., **1897**, 138.
Hydroxyanthraquinone dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
p-**Hydroxybenzoic acid**, from the decomposition of apigenin (PERKIN), 810; P., **1897**, 138.
ethylic salt, from hydrolysis of apigenin diethyl ether (PERKIN), 815.
Hydroxycamphene (*camphenol*) (MARSH and GARDNER), 290; P., **1896**, 137, 187.
Hydroxycamphorsulphonic acid, *di*-bromo-, and its lactone and bromide (LAPWORTH and KIPPING), 19; P., **1896**, 215.
o-**Hydroxydiphenylacetic lactone** (HEWITT and POPE), 1086.
3-Hydroxy-1:5-diphenyltriazole, *m*-amino-, *p*-amino-, *m*-nitro-, and *p*-nitro-, and their acetyl and benzoyl derivatives (YOUNG and ANNABLE), 205, 207, 209, 211; P., **1896**, 246.
Hydroxyindonylhydrindone (REVIS and KIPPING), 247; P., **1896**, 229.
Hydroxymethylcoumalin and the action of methylic alcohol and hydrochloric acid on it (RUHEMANN), 326.
Hydroxy*iso*nicotinic acid, chloro- (SELL and DOOTSON), 1073; P., **1897**, 167.
3-Hydroxy-1-phenyl-5-styryloxytriazole, and its benzoyl derivative (YOUNG and ANNABLE), 215; P., **1896**, 246.
3-Hydroxy-1-phenyl-5-styryltriazole, oxidation of (YOUNG), 311; P., **1897**, 53.
3-Hydroxy-1-phenyl-5-*m*-tolyltriazole, and its acetyl and benzoyl derivatives (YOUNG and ANNABLE), 212; P., **1896**, 246.
Hydroxytriazoles, formation of, from phenylsemicarbazide (YOUNG and ANNABLE), 200; P., **1896**, 246.
β-Hydroxy-αaβ-trimethylglutaric acid, ethylic salt, synthesis of (PERKIN and THORPE), 1178; P., **1897**, 72.
Hydroxytriphenylpyrrolone, hydrolysis of, and production of benzilic and benzoic acids (JAPP and TINGLE), 1146; P., **1897**, 171.
Hyoscine auribromide and hydrobromide gold chloride, formation and properties of (JOWETT), 679, 680; P., **1897**, 136.
Hyoscyamine hydrobromide gold chloride, the formation and properties of (JOWETT), 681; P., **1897**, 136.

I.

Indamine dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
Indigo, electrical convection of, in solutions (PICTON and LINDER), 571.
Indigo dyes, oxidation of leuco-compound of (GREEN), P., **1896**, 226.
Indium, occurrence of, in common minerals (HARTLEY and RAMAGE), T., 533; P., **1897**, 11.
Indonylbromhydrindone (REVIS and KIPPING), 245; P., **1896**, 229.
Indophenol-dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
Iodine, electrical convection of, in solution (PICTON AND LINDER), 571.
action of highly purified, on mercury (SHENSTONE), 485; P., **1897**, 2.
precipitation of, together with metallic hydroxides (RETTIE), P., **1896**, 178.
Iron:—
Ferric chloride, refractive power of, when dissolved in ethylic alcohol or ethylic acetate (GLADSTONE and HIBBERT), 827; P., **1897**, 142.
hydroxide, electrical convection of, in solutions (PICTON and LINDER), 571.
Ferrous sulphate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 825.
double sulphates of copper, zinc, manganese, and (SCOTT), 565; P., **1897**, 71.
Iron ores, composition of (HARTLEY and RAMAGE), 534; P., **1897**, 12.
Steel-rails, composition of (HARTLEY and RAMAGE), 548; P., **1897**, 47.

K.

Kainite, gold in (LIVERSIDGE), 299.
spectroscopic analysis of (HARTLEY and RAMAGE), 549; P., **1897**, 47.
Ketohydrindene. See Hydrindone.
Ketolactonic acid and its homologues (SPRANKLING), 1159; P., **1897**, 173.
Ketolactonic acids, ethylic salts, rate of hydrolysis of (SPRANKLING), 1167; P., **1897**, 174.
Ketonic acid, $C_8H_{14}O_3$, from the oxidation of β-camphylic acid, and its semicarbazone (W. H. PERKIN, jun.), P., **1896**, 191.

d-**Ketopinic acid** (GILLES and RENWICK), P., **1897**, 158.

i-**Ketopinic acid**, its oxidation, and its oxime and bromo-derivative (GILLES and RENWICK), P., **1897**, 65.

Kieserite, spectroscopic analysis of (HARTLEY and RAMAGE), 550; P., **1897**, 47.

L.

Lactic acid (*inactive ethylidenelactic acid; α-hydroxypropionic acid*), separation of, into its active components (PASTEUR LECT.), 693.

Lactone, $C_{12}H_{10}O_7$, obtained by action of sodium on ethylic acetonedicarboxylate, and its hydrolysis (JERDAN), 1110, 1113; P., **1897**, 168.

Lactose (*milk-sugar*), heat of transformation of the α- into the β-variety (BROWN and PICKERING), 767; P., **1897**, 129, 130.

heat of dissolution of (BROWN and PICKERING), 769.

freezing points of dilute aqueous solutions of (WILDERMANN), 802; P., **1897**, 139.

Lead, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

reaction of lead sulphate and of sulphurous anhydride with (JENKINS and SMITH), 671, 672; P., **1897**, 104.

Lead alloy with zinc, freezing points of (HEYCOCK and NEVILLE), 394; P., **1897**, 61.

Lead sulphide, action of oxygen on heated (JENKINS and SMITH), 666; P., **1897**, 104.

reaction of lead sulphate with (JENKINS and SMITH), 669; P., **1897**, 104.

Lecture, memorial: Pasteur (FRANKLAND), 683; P., **1897**, 79.

Levulose (*d-fructose, fruit sugar*), heat of transformation of the α- and the β-variety (BROWN and PICKERING), 765; P., **1897**, 129, 130.

heat of dissolution of (BROWN and PICKERING), 769.

anhydrous, solution-density and cupric-reducing power of (BROWN, MORRIS and MILLAR), 277, 280, 284; P., **1897**, 4.

Levure lactique (PASTEUR LECT.), 712.

Limonites, composition of (HARTLEY and RAMAGE), 536; P., **1897**, 12.

Liquids, miscible, viscosity of mixtures of (THORPE and RODGER), 360; P., **1897**, 49.

Liquids, volatile, apparatus for the fractional distillation of (YOUNG and THOMAS), 440; P., **1897**, 58.

Lithium, chloride, refractive power of, when dissolved in ethylic and propylic alcohols (GLADSTONE and HIBBERT), 827; P., **1897**, 142.

Longstaff medal. Presentation of, to PROF. RAMSAY, 591; P., **1897**, 80.

Luteolin, triethylic ether (PERKIN), 191; (HERZIG), A., i, 94.

trimethylic ether, formation of (PERKIN), 191.

Lutidine. See 2 : 4-Dimethylpyridine.

ψ-Lutidostyril (2 : 4-*dimethylpyridone*) (COLLIE), 307; P., **1897**, 143; (ASTON and COLLIE), 653; P., **1897**, 89.

ψ-Lutidostyril-5-carboxylic acid and its ethylic salt (COLLIE), 310; P., **1897**, 43.

M.

Maclurin, derivatives of (PERKIN), 186; P., **1897**, 5.

Maclurinazobenzene, constitution of (PERKIN), 186; P., **1897**, 5.

Magdala red, electrical convection of, in solutions (PICTON and LINDER), 571.

Magnesium alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 395; P., **1897**, 61.

Magnesium hydroxide, precipitation of iodine together with (RETTIE), P., **1896**, 178.

nitride, action of benzaldehyde, of chloroform, and of hexachlorethane (SNAPE), 527; P., **1897**, 50.

sulphate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 825.

copper sulphate (SCOTT), 567; P., **1897**, 71.

Magnetites, composition of (HARTLEY and RAMAGE), 538; P., **1897**, 12.

Malic acid, silver salt, action of *iso*propylic iodide and ethylic iodide on (PURDIE and LANDER), P., **1896**, 221, 222.

ethylic salts, optical activity of (PURDIE and LANDER), P., **1896**, 221, 222.

*iso*propylic salt (PURDIE and LANDER), P., **1896**, 221.

i-**Malic acid**, synthesis of (PASTEUR LECT.), 704; P., **1897**, 79.

Malonic acid, formation of (JERDAN), 1108.

Malonic acid, sodio-, action of ethylenic chloride on (LEAN and LEES), 1062; P., **1897**, 161.

Malonyl-β-butylenetricarboxylic acid, ethylic salt, and the action of ammonia on it (RUHEMANN), 327, 328; P., **1897**, 52.

Maltodextrin-α, $C_{36}H_{62}O_{31}$, from action of diastase on starch, and the action of diastase on it (LING and BAKER), 510, 514; P., **1897**, 3.

Maltodextrin-β, identity of with Prior's achroodextrin III., and the action of diastase on it (LING and BAKER), 510, 517; P., **1897**, 3.

iso-**Maltosazone**, from action of phenylhydrazine acetate on a mixture of maltose and maltodextrin-β (LING and BAKER), 511, 519.

Maltose, specific rotation of (BROWN, MORRIS and MILLAR), 110; P., **1896**, 242, 243; (LING and BAKER), 512; P., **1897**, 3.

heat of transformation of the α- into the β-variety (BROWN and PICKERING), 764; P., **1897**, 129, 130.

heat of dissolution of (BROWN and PICKERING), 769.

freezing points of dilute aqueous solutions of (WILDERMANN), 802; P., **1897**, 139.

anhydrous, solution-density of (BROWN, MORRIS and MILLAR), 77; P., **1896**, 242.

cupric-reducing power of (BROWN, MORRIS and MILLAR), T., 99, 100; P., **1896**, 242; (LING and BAKER), 512; P., **1897**, 3.

*iso***Maltose**, its probable composition and the action of brewery yeast on it, its cupric-reducing and specific rotatory powers (LING and BAKER), 511, 513; 520, 521.

Manganese, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

double sulphates of copper, iron and (SCOTT), 567; P., **1897**, 71.

Manganese ores and minerals, composition of (HARTLEY and RAMAGE), 539; P., **1897**, 12.

Manometer with fused silver chloride (SHENSTONE), 486; P., **1897**, 3.

Medal, Longstaff, presentation of, to PROF. RAMSAY, 591; P., **1897**, 80.

Melting point, a method of determining (COOK), P., **1897**, 74.

of racemic and pseudoracemic substances (KIPPING and POPE), 994; P., **1897**, 136.

Memorial lecture: Pasteur (FRANKLAND), 683; P., **1897**, 79.

Menthone, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 286; P., **1896**, 187.

Mercury, purification of (SHENSTONE), 483; P., **1897**, 2.

molecular association in liquid (CROMPTON), 933.

action of highly purified chlorine, bromine, and iodine on (SHENSTONE), 485; P., **1897**, 2.

Mercury alloy with silver, heat of formation and specific heat of (LITTLETON), P., **1896**, 220.

Mercuric salts, constitution of (RÂY), 1103.

hyponitrite (RÂY), 349, 1097, 1105; P., **1896**, 217.

sulphate, basic (RÂY), 1098.

Mercuroso-mercuric nitrites (basic) (RÂY), 341; P., **1896**, 218.

Mercurous nitrates (RÂY), 342; P., **1896**, 218.

nitrite, hydrated, crystallography of (HOLLAND), 346; P., **1896**, 218.

nitrites and hyponitrites (RÂY), 337, 348; P., **1896**, 217.

Mesitylacetamide (SUDBOROUGH, JACKSON and LLOYD), 232; P., **1897**, 21.

Mesitylformamide (SUDBOROUGH, JACKSON and LLOYD), 233; P., **1897**, 21.

Methane, formation of, by direct union of carbon and hydrogen (BONE and JERDAN), 51, 55; P., **1896**, 175.

action of the electric arc on (BONE and JERDAN), 59; P., **1896**, 177.

1 : 2-Methoxyacetonaphthalide, 3′-bromo- (DAVIS), P., **1896**, 233.

2-Methoxynaphthalene, crystallography of derivatives of (DAVIS), P., **1896**, 233.

1-amino-, 3′-amino, 1′-amino- and its acetyl derivative, 3′ : 1-bromamino-, 1-nitro-, 1′-nitro-, 3′-nitro-, 1 : 1′-*di*nitro- and 1 : 3′-*di*nitro- (DAVIS), P., **1896**, 231, 232.

Methylacetaldoxime, and its hydrolysis (DUNSTAN and GOULDING), 577; P., **1897**, 77.

Methylacetoacetic acid, sodio-, ethylic salt, action of ethylic chlorofumarate on (RUHEMANN) 325; P., **1897**, 52.

Methylacetophenoxime, hydriodide of, and its hydrolysis (DUNSTAN and GOULDING), 579.

α-Methyl-β-acetopropionic acid (SPRANKLING), 1163.

Methylacetoxime, periodide of, and its hydrolysis (DUNSTAN and GOULDING), 578; P., **1897**, 77.

Methylamine, hydrochloride, hydriodide, and platinochloride (DUNSTAN and GOULDING), 576, 578.

Methylcamphorimine, hydrochloride, hydriodide, methiodide, platinochloride, picrate, chromate, mercurichloride, perbromide (FORSTER), 193; P., **1897**, 21.

Methyldeoxybenzoin, action of phosphorus pentachloride on (SUDBOROUGH), 218; P., **1897**, 20.

Methylene-blue dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 227.

Methylformaldoxime, hydriodide of, and the action of heat on an aqueous solution of it (DUNSTAN and GOULDING), 575; P., **1897**, 76.

1-Methyl*cyclo*hexene-2 : 5-dicarboxylic acid (*methyltetrahydroterephthalic acid*) and its methylic salt (BENTLEY and PERKIN), 178; P., **1896**, 79.

β-Methylhydroxylamine, from formaldoxime methiodide (DUNSTAN and GOULDING), 577.

Methylic alcohol, influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P., **1897**, 96.

Methylic iodide, viscosity of mixtures of carbon bisulphide with (THORPE and RODGER), 367; P., **1897**, 50.

Methylmannosides, melting points and racemism of (KIPPING and POPE), 997.

2-Methyl*iso*nicotinic acid, 6-chloro-, and its salts (ASTON and COLLIE), 656; P., **1897**, 89.

Methylparaconic acid, *di*chloro-, and the action of barium hydroxide on (MYERS), 614; P., **1897**, 100.

*tri*chloro-, action of acetic acid and zinc dust on (MYERS), 614; P., **1897**, 100.

Methyl*iso*phthalic acid [Me : $(COOH)_2$ = 1 : 2 : 4], preparation of, and its methylic salt (BENTLEY and PERKIN), 175, P., **1896**, 79.

4-Methylpicolinic acid, 2-chloro-, and its salts (ASTON and COLLIE), 655; P., **1897**, 89.

Methylpyridinetricarboxylic acid, from oxidation of corydic acid (DOBBIE and MARSDEN), 664; P., **1897**, 102.

Methylstilbene, chloro-, its constitution, and *di*bromide (SUDBOROUGH), 225; P., **1897**, 20.

β-chloro-, and its *di*bromide (SUDBOROUGH), 218, 224; P., **1897**, 20.

Methylterephthalic acid, preparation of, and its methylic salt (BENTLEY and PERKIN), 175; P., **1896**, 79.

Methyltetrahydroterephthalic acid (1-*methyl*cyclo*hexene*-2 : 5-*dicarboxylic acid*) and its methylic salt (BENTLEY and PERKIN), 178; P., **1896**, 79.

Methylthioglycollic acid (*α-thiolactic acid*) (DIXON), 634; P., **1897**, 8.

Methyl-violet, electrical convection of, in solutions (PICTON and LINDER), 571.

Morus tinctoria, maclurin from (PERKIN), 186; P., **1897**, 5.

Mucor mucedo, fermentation by (PASTEUR LECT.), 728.

Mycoderma aceti (PASTEUR LECT.), 721.

Myricetin, occurrence of, in the leaves of *Rhus Cotinus* (PERKIN), 1136, 1197; P., **1897**, 170.

Myrobalans, composition and dyeing properties of (PERKIN), 1137; P., **1897**, 170.

N.

Naphthalene, space formula for (COLLIE), 1017.

Naphthalene, 1 : 1′-*di*chloro-, conversion of, into 1 : 4′-dichloronaphthalene (ARMSTRONG and WYNNE), P., **1897**, 154.

1 : 2′-*di*chloro-, from 1 : 1′ : 3-dichloronaphthalenesulphonic acid (ARMSTRONG and WYNNE), P., **1897**, 155.

1 : 2 : 1′-*tri*chloro-, behaviour of, towards concentrated hydrochloric acid (ARMSTRONG and WYNNE), P., **1897**, 156.

2 : 3′ : 1′-*tri*chloro-, and 2 : 4′ : 2′-*tri*chloro- (ARMSTRONG and WYNNE), P., **1897**, 153.

Naphthalene-1′ : 3′-disulphonic acid, 2-chloro-, conversion of the chloride of, into 2 : 3′ : 1′-trichloronaphthalene (ARMSTRONG and WYNNE), P., **1897**, 153.

Naphthalene-4′ : 2′-disulphonic acid, 2-chloro-, conversion of chloride into 2 : 4′ : 2′-trichloronaphthalene (ARMSTRONG and WYNNE), P., **1897**, 153.

3-Naphthalenesulphonic acid, 1 : 1′-*di*chloro-, potassium salt, chloride, amide (ARMSTRONG and WYNNE), P., **1897**, 155.

2′-Naphthalenesulphonic acid, 2 : 4′-*di*chloro-, barium and potassium salts, chloride, amide (ARMSTRONG and WYNNE), P., **1897**, 153.

3′-Naphthalenesulphonic acid, 2 : 1′-*di*chloro-, and its potassium salt, chloride, and amide (ARMSTRONG and WYNNE), P., **1897**, 153.

α-Naphthalenesulphonic acids, effect of heat on (COLLIE), 1022.

β-Naphthol, nitration of (ARMSTRONG), P., **1896**, 230.

crystallography of derivatives of (DAVIS), P., **1896**, 233.

δ-Naphthol, 1-bromo-, nitration of (ARMSTRONG), P., **1896**, 230.

3′-bromo-, sulphonation of (ARMSTRONG and DAVIS), P., **1896**, 231.

β-Naphthol, 1:3′-*di*bromo-, conversion of, into 3′-bromo-β-naphthol (ARMSTRONG and DAVIS), P., **1896**, 230.
3′-bromo-1-nitro- (ARMSTRONG and DAVIS), P., **1896** 231.
α-Naphthylamine, action of sodamide on (TITHERLEY), 465; P., **1897**, 45.
β-Naphthylamine, yellow compound obtained by action of diacetyltartaric anhydride on (COHEN and HARRISON), 1061; P., **1897**, 167.
3′:1-bromonitro-, acetyl derivative (DAVIS), P., **1896**, 232.
1-nitro- (DAVIS), P., **1896**, 232.
α- and **β-Naphthylcarbamides** and their acetyl and benzoyl derivatives (YOUNG and CLARK), 1200, 1202; P., **1897**, 199.
Nickel, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
Nickel alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 403.
Nickel sulphate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.
double sulphates of copper, cobalt and (SCOTT), 566; P., **1897**, 71.
Nickel ores and minerals, composition of (HARTLEY and RAMAGE), 541; P., **1897**, 13.
iso-**Nicotinic acid**, 2:6-*di*chloro-, its acid chloride, amide, and ethylic salt, and its conversion into citrazinic acid, and the action of ammonia on it (SELL and DOOTSON), 1075, 1076; P., **1897**, 167.
*tetra*chloro-, its chloride, amide, and ethylic salt, and its conversion into trichloramino- and dichlorodiaminopyridine (SELL and DOOTSON), 1078, 1080, 1083; P., **1897**, 167.
iso-**Nicotinic acids**, chloro-, conversion of, into chloropyridines and chloraminopyridines (SELL and DOOTSON), 1081; P., **1897**, 167.
Nitratine, gold in (LIVERSIDGE), 299.
Nitration, notes on (ARMSTRONG), P., **1896**, 230.
Nitric acid, Nitric peroxide. See under Nitrogen.
Nitrogen oxidation of (RAYLEIGH), 181, 185; P., **1897**, 17.
Nitrogen iodide (MALLET), P., **1897**, 55.
Nitric peroxide, preparation of (COHEN and CALVERT), 1052.
molecular association in liquid (CROMPTON), 934.
Nitric acid, refractive power when dissolved in amylic nitrate or nitrobenzene (GLADSTONE and HIBBERT), 828; P., **1897**, 142.
Nitroso-compound, from camphoroxime (FORSTER), 199; P., 21.

O.

Phenylallylthiocarbimide, action of chloracetamide on (DIXON), 632; P., **1897**, 8.
Phenylallylthiohydantoin (DIXON), 632, 633; P., **1897**, 8.
Phenylazocarbamide, condensation of, with benzaldehyde (YOUNG and ANNABLE), 201; P., **1896**, 246.
Phenyl benzyl ketone. See Deoxybenzoin.
Phenylbenzylthiohydantoin (DIXON), 631; P., **1897**, 8.
Phenyl-αβ-dibromopropionic acid, pseudoracemism of (KIPPING and POPE), 1001; P., **1897**, 136.
Phenyldimethylthiohydantoin (DIXON), 635; P., **1897**, 9.
5-*p*-Phenylenebis-3-hydroxy-1-phenyltriazole (YOUNG and ANNABLE), 217; P., **1896**, 246.
Phenylethylthiohydantoin (DIXON), 636; P., **1897**, 9.
Phenylhydrazine, action of sodamide on (TITHERLEY), 461; P., **1897**, 45.
sodium derivative of (TITHERLEY), 461; P., **1897**, 45.
Phenylhydrazone, $C_{18}H_{16}O_6N_2$, from the condensation product of ethylic actonedicarboxylate (JERDAN), 1113.
1-Phenyl-3-methyl-5-pyrazolone-4-acetic acid and its ethylic salt (RUHEMANN and HEMMY), 332; P., **1897**, 53.
Phenylmethylthiohydantoin, its constitution, and the action of baryta water on it (DIXON), 629, 630; P., **1897**, 8.
aa-**Phenylmethylthiourea**, action of ethylic monochloracetate on (DIXON), 631; P., **1897**, 8.
Phenylnitrocarbinol. See Benzylic alcohol, α-nitro-.
Phenylsemicarbazide, benzoyl derivative of, the two probable isomerides of (YOUNG and ANNABLE), 202; P., **1896**, 246.
oxidation of the condensation products of, with *m*- and *p*-nitro-benzaldehyde, with *m*-toluic aldehyde, with cinnamaldehyde, and with terephthalic aldehyde (YOUNG and ANNABLE), 203; P., **1896**, 246.
Phenylsulphonic chloride, action of lead thiocyanate on (DIXON), 640.
Phenylthiocarbimide, from phenylthiohydantoin and carbon bisulphide (DIXON), 628; P., **1897**, 7.
Phenylthiocarbimidoglycolide (DIXON), 626; P., **1897**, 7.
Phenylthiohydantoin, its constitution, and the action of hydrochloric acid and of carbon bisulphide on (DIXON), 621, 626, 628, 629; P., **1897**, 7.
Phloretin, constitution of, and its acetyl derivative (PERKIN and MARTIN), 1152, 1153.
Phloretindisazobenzene and its acetyl derivative (PERKIN and MARTIN), 1151; P., **1897**, 172.
Phloretindisazo-*o*-toluene and **-*p*-toluene** (PERKIN and MARTIN), 1151, 1152; P., **1897**, 172.
Phloroglucinol, from the decomposition of apigenin (PERKIN), 809; P., **1897**, 54, 138.
synthesis of (JERDAN), 1108; P., **1897**, 168.
identification of (JERDAN), 1114.
Phloroglucinolazobenzene, melting point and acetylisation of (PERKIN), 189, 190; P., **1897**, 5.
Phloroglucinoldisazobenzeneazo-*m*-nitrobenzene (A. G. PERKIN), 1156; P., **1897**, 173.

Phloroglucinol-*o*-trisazoanisol and trisazobenzene (A. G. PERKIN), 1154, 1155; P., **1897**, 172.

PHOTOCHEMISTRY:—

Light, action of, on highly purified chlorine (SHENSTONE), 487; P., **1897**, 2.

coloration produced in a solution of nitrobenzene in sulphuric acid on exposure to (FRISWELL), P., **1897**, 148.

Röntgen rays, photographs of gold-sodium alloys (HEYCOCK and NEVILLE), P., **1897**, 105.

Rotatory power, of amylic glycerates, diacetylglycerates and dibenzoylglycerates (FRANKLAND and PRICE), 253; P., **1897**, 9.

of salts containing the same active group (CROMPTON), 946; P., **1897**, 111.

Multirotation, cause of (BROWN and PICKERING), 769; P., **1897**, 130.

Refraction of dissolved substances, influence of the nature of the solvent on the (GLADSTONE and HIBBERT), 826; P., **1897**, 142.

of potassium, rubidium, and cæsium selenates in solution (TUTTON), 911; P., **1897**, 117.

of potassium sulphate in solution (TUTTON), 913; P., **1897**, 117.

of crystalline salts (TUTTON), 235; P., **1897**, 10; (POPE), P., **1897**, 11.

of salts in the crystalline and dissolved states (GLADSTONE and HIBBERT), 823; P., **1897**, 141.

Refractive index of cæsium, rubidium, and potassium selenates (TUTTON), 876, 881, 888; P., **1897**, 116.

Spectroscopic analysis of aluminium compounds, steel, and Stassfurth minerals (HARTLEY and RAMAGE), 547; P., **1897**, 46.

of common ores and minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

Phthaleins, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.

γ-Picoline (4-*methylpyridine*), *penta*-chloro- (SELL and DOOTSON), 1080; P., **1897**, 167.

Pinene, hydrobromide, behaviour of, towards phosphorus trichloride and bromine (MARSH and GARDNER), 287; P., **1896**, 187.

***d*-Pinene**, behaviour of, towards phosphorous trichloride and bromine (MARSH and GARDNER), 287; P., **1896**, 187.

Pinophanic acid, silver salt (GILLES and RENWICK), P., **1897**, 65.

Plants, marine, gold in (LIVERSIDGE), 298; P., **1897**, 22.

Platinum, nuggets, crystalline structure of (LIVERSIDGE), 1129; P., **1897**, 22.

Platinum alloys with silver, solubility of, in nitric acid (SPILLER), P., **1897**, 118.

with zinc, freezing points of (HEYCOCK and NEVILLE), 421.

Polymerisation. (HARCOURT), 595.

Pomegranate, rind composition and dyeing properties of (PERKIN), 1137; P., **1897**, 170.

Porcelain, permeability of, to furnace gases (BONE and JERDAN), 43; P., **1896**, 61.

Potassium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.

Potassium cobaltite (MCCONNELL and HANES), 587; P., **1897**, 62.

permanganate action on sulphurous acid of (DYMOND and HUGHES), 314; P., **1897**, 42.

hydrogen phosphate, nitrate and dichromate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.

selenate, crystallography and physical properties of (TUTTON), 846; P., **1897**, 115.

thiocyanate, action of sulphuric acid on (CHATTAWAY and STEVENS), 610; P., **1897**, 87.

Presidential address (VERNON HARCOURT), 592; P., **1897**, 80.

Propaldehyde, formation of (COHEN and CALVERT), 1051.

Propionamide, action of sodamide on (TITHERLEY), 467; P., **1897**, 46.

Propionic acid, α-bromo-, ethylic salt, action of ethylic sodio-acetoacetate on (SPRANKLING), 1162; P., **1897**, 173.

Propionic bromide, α-bromo-, action of lead thiocyanate on (DIXON), 633.

Propionylthiocarbamide, α-bromo-, and action of aniline and *o*-toluidine, methylaniline, and benzylaniline on (DIXON), 633, 634, 635; P., **1897**, 8.

***iso*-Propoxysuccinic acid**, *iso*propylic salt (PURDIE and LANDER), P., **1896**, 221.

***iso*-Propylic alcohol**, hydrates of (THORPE), 920; P., **1897**, 150.

Protocatechuic acid, from the action of sodium hydroxide on apigenin (PERKIN), 811; P., **1897**, 138.

Punica Granatum, composition of the fruit rind of (PERKIN), 1137; P., **1897**, 170.

Pyridine, space formula for (COLLIE), 1018.
derivatives, production of, from ethylic β-aminocrotonate (COLLIE), 299; P., **1897**, 43.
Pyridine, 2 : 3 : 5 : 6-*tetra*chloro- and *penta*chloro-, *di*chloramino- and *tri*chloramino- (SELL and DOOTSON), 1081, 1082, 1083; P., **1897**, 167.
Pyrites (*iron pyrites*), composition of (HARTLEY and RAMAGE), 542; P., **1897**, 13.
the decomposition of (CALDECOTT), P., **1897**, 100.
Pyro-ψ-aconine and **Pyro-ψ-aconitine** (DUNSTAN and CARR), 358; P., **1895**, 154.
Pyroamaric acid. See βγ-Diphenylbutyric acid.
Pyronetricarboxylic acid, ethylic salt (RUHEMANN and HEMMY), 336, P., **1897**, 64.

Q.

Quercetin, from Gambier catechu and Acacia catechu (PERKIN), 1135.
occurrence of, in *Rumex obtusifolius* (PERKIN), 1199; P., **1897**, 198.
production of, by hydrolysis of osyritrin (PERKIN), 1133.
Quercus Ægilops, composition of the fruit of (PERKIN), 1137; P., **1897**, 170.
Quercus infectoria, composition of gall-nuts of (PERKIN), 1137; P., **1897**, 170.
Quinoline-dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
Quinone (*benzoquinone*), preparation of (FRANCIS), 423; P., **1897**, 63.
o- and *p*-**Quinonoid structure** in colouring matters (GREEN), P., **1896**, 226.

R.

Rabies, protective inoculation for (PASTEUR LECT.), 742; P., **1897**, 80.
Racemism and **Pseudoracemism** (KIPPING and POPE), 989; P., **1897**, 135.
Resorcinol, freezing points of solutions of carbamide and (WILDERMANN), 750; P., **1897**, 119.
condensation of chloral with (HEWITT and POPE), 1084; P., **1897**, 167.
Rhamnazin, constitution, dyeing properties, decomposition of by alkalis, and tetramethylic ether (PERKIN and MARTIN), 819—821; P., **1897**, 139.
Rhodanic acid, from phenylthiohydantoin and carbon bisulphide (DIXON), 628; P., **1897**, 7.
Rhus Cotinus, the composition of catech from (PERKIN), 1136; P., **1897**, 170.
the colouring matter and glucoside of (PERKIN), 1196, 1197; P., **1897**, 198.
Rhus rhodanthema (*yellow cedar*), occurrence of fisetin in (PERKIN), 1194; P., **1897**, 198.
Rhus tinctoria, colouring matter of (PERKIN), 1120; P., **1897**, 198.
Rock-salt, gold in (LIVERSIDGE), 298; P., **1897**, 22.
spectroscopic analysis of (HARTLEY and RAMAGE), 550; P., **1897**, 47.
Rosaniline (*triaminodiphenyltolylcarbinol*) hydrochloride, electrical convection of, in solutions (PICTON and LINDER), 571.
Rubidium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
action of ammonia on (TITHERLEY), 469; P., **1897**, 46.
Rubidamide, and the action of heat, of water, and of acetoxime on it (TITHERLEY), 469; P., **1897**, 46.
di-**Rubidammonium**, and the action of heat on it (TITHERLEY), 469.
Rubidium selenate, crystallography and physical properties of (TUTTON), 846; P., **1897**, 115.
Rumex obtusifolius, occurrence of quercetin in (PERKIN), 1199; P., **1897**, 198.

S.

Saffranine dyes, oxidation of leuco-compounds of (GREEN), P., **1896**, 227.
Salicylic acid, sodium salt of, formation of (COLLIE), 1022.
Salts, crystalline, refractive powers of (TUTTON), 235; P., **1897**, 10.
Selenium, estimation of, in alkali selenates (TUTTON), 848.
Shellac, electrical convection of, in emulsions (PICTON and LINDER), 571.
Siderites, composition of (HARTLEY and RAMAGE), 533; P., **1897**, 12.
Silicic acid, electrical convection of, in solutions (PICTON and LINDER), 571.
Silkworm diseases (PASTEUR LECT.), 733; P., **1897**, 80.
Silver, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
in natural saline deposits and marine plants (LIVERSIDGE), 298; P., **1897**, 22.
ingots, crystalline structure of (LIVERSIDGE), 1130; P., **1897**, 22.

Silver-alloys with platinum, solubility in nitric acid (SPILLER), P., **1897**, 118.
with zinc, freezing points of (HEYCOCK and NEVILLE), 407; P., **1897**, 61.
Silver amalgams, heat of formation and specific heat of (LITTLETON), P., **1896**, 220.
Silver hydroxide, electrical convection of, in solutions (PICTON and LINDER), 571.
Sodium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
Sodamide, action of ethylic iodide, of ethylenic dibromide, chlorobenzene, quinondichlorimide, carbon hexachloride, aniline, diphenylamine, β-naphthylamine, formamide, acetamide, propionamide, and benzamide on (TITHERLEY), 460—467; P., **1897**, 45, 46.
Sodium alloys with gold, structure of (HEYCOCK and NEVILLE), P., **1897**, 105.
Sodium, relative quantities of dextro- and lævo-crystals deposited from optically active solutions of (POPE and KIPPING), P., **1896**, 249.
nitrate, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.
Solanaceous alkaloids, gold salts of the (JOWETT), 679; P., **1897**, 136.
Solubility of racemic and pseudoracemic substances (KIPPING and POPE), 998; P., **1897**, 136.
of potassium, rubidium, and cæsium selenates in water (TUTTON), 850; P., **1897**, 115.
Solutions, Dalton's law in (WILDERMANN), 743; P., **1897**, 119.
influence of molecular association on the properties of (CROMPTON), 925; P., **1897**, 109.
molecular depression of freezing point in dilute (WILDERMANN), 796; P., **1897**, 139.
of colloidal substances, electrical convection in (PICTON and LINDER), 568.
of electrolytes, molecular association theory of the properties of (CROMPTON), 941; P., **1897**, 110.
Spontaneous generation (PASTEUR LECT.), 716; P., **1897**, 79.
Staphylococcus pyogenes, discovery of (PASTEUR LECT.), 737; P., **1897**, 80.
Starch, electrical convection of, in solutions (PICTON and LINDER), 571.
action of diastase on (LING and BAKER), 508, 513; P., **1897**, 3.
Starch, hydrolysis of, by diastase, experimental methods used in the estimation of the solid products from the solution-density, and limits of accuracy in the methods used (BROWN, MORRIS and MILLAR), 72, 99, 100, 106; P., **1896**, 241, 242.
hydrolysis of, by diastase products of, determination of specific rotatory power of; relation of $[\alpha]_j$ to $[\alpha]_D$, and of sp. rot. power and cupric-reducing powers, cupric-reducing power of, and solution densities of (BROWN, MORRIS and MILLAR), 79, 84, 90, 94, 115; P., **1896**, 242.
thermochemistry of hydrolysis of, by malt extract, taka diastase, saliva, and pancreatin (BROWN and PICKERING), 785; P., **1897**, 130.
soluble, specific-rotation of (BROWN, MORRIS and MILLAR), 114; P., **1896**, 243.
solution-density of (BROWN, MORRIS and MILLAR), 78; P., **1896**, 242.
Stassfurthite, spectroscopic analysis of (HARTLEY and RAMAGE), 550; P., **1897**, 47.
Stilbene (*s-diphenylethylene*), preparation of (SUDBOROUGH), 221.
dibromide, preparation of (SUDBOROUGH), 221.
Stilbene, *di*bromo-, chloro-, chlorobromo- and *di*nitro- (SUDBOROUGH), 218—223; P., **1897**, 20.
β-chloro-, preparation of, and its dibromide and dichloride (SUDBOROUGH), 220, 221, 222; P., **1897**, 20.
Straw, barley, fermentation of the hydrolytic products of (CROSS, BEVAN and SMITH), 1007.
Streptococcus pyogenes, discovery of (PASTEUR LECT), 737; P., **1897**, 80.
Strontium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
Substance, $C_{12}H_{22}O_{11}$, from fermentation of isomaltose, and osazone of (LING and BAKER), 521; P., **1897**, 3, 4.
$C_{16}H_{12}O_2$, from *iso*-cinnamenylmandelic acid on heating (JAPP and LANDER), 138; P., **1896**, 107.
$C_{18}H_{12}O_4$, from anhydracetonebenzilcarboxylic acid on oxidation (JAPP and LANDER), 143.
$C_{19}H_{18}O_3(N{\cdot}OH)$, from α-anhydrobenzillevulinic acid and hydroxylamine (JAPP and MURRAY), 149.
$C_{28}H_{18}O_3$, from the oxidation of phenanthrone (JAPP and FINDLAY), 1121; P., **1897**, 169.

Substance, $C_{28}H_{22}N_2$, from dibenzoylcinnamene and phenylhydrazine, destructive distillation of (JAPP and TINGLE), 1148; P., **1897**, 171.

$C_{34}H_{34}O_9$, from anhydracetonebenzil and acetic anhydride (JAPP and LANDER), 130; P., **1896**, 107.

$C_{48}H_{38}N_4O_5$, from anhydracetonebenzil carboxylic acid and phenylhydrazine, (JAPP and LANDER), 143; P., **1896**, 109.

Succinic acid produced in alcoholic fermentation (PASTEUR LECT.), 713.

Sucrose (*saccharose, cane-sugar*), heat of dissolution of (BROWN and PICKERING), 769.

heat of inversion of, by invertase (BROWN and PICKERING), **792**; P., **1897**, 131.

heat of transformation of the α- into the β- variety (BROWN and PICKERING), 768.

freezing points of solutions of mixtures of carbamide and (WILDERMANN), 750; P., **1897**, 119.

influence of, on the rate of formation of carbamide (WALKER and KAY), 506; P., **1897**, 76.

Sugar, $C_6H_{12}O_6$, from action of heat on glycollic aldehyde (FENTON), 376; P., **1897**, 63.

Sugar, invert-, anhydrous, solution-density and cupric-reducing power of (BROWN, MORRIS, and MILLAR), 278, 280; P., **1897**, 4.

Sulphanilic acid, action of bromine on (EVANS), P., **1897**, 235.

Sulphocamphoric acid, its salts, and anhydride, and bromide and chloride of the latter (LAPWORTH and KIPPING), 8; P., **1896**, 216.

Sulphocamphylic acid, fusion of, with potash (W. H. PERKIN, jun.), P., **1896**, 189.

Sulphur, electrical convection of, in solutions (PICTON and LINDER), 571.

Sulphurous anydride, reaction of lead with (JENKINS and SMITH), 672; P., **1897**, 104.

Dithionic acid, formation of, by the oxidation of sulphurous acid by potassium permanganate (DYMOND and HUGHES), 314; P., **1897**, 42.

Sumach, South African, composition of, and amount of catechcol-tannin in (PERKIN), 1132; P., **1897**, 170.

Swine measles, inoculation for (PASTEUR LECT.), 740; P., **1897**, 80.

Sylvite, gold in (LIVERSIDGE), 298; P., **1897**, 22.

spectroscopic analysis of (HARTLEY and RAMAGE), 550; P., **1897**, 47.

T.

Tachyhydrite, spectroscopic analysis of (HARTLEY and RAMAGE), 550; P., **1897**, 47.

Tannin glucoside, from South African sumach (PERKIN), 1132.

Tannins, relationship of, to accompanying colouring matters (PERKIN), 1137.

Tap, vacuum, improved (SHENSTONE), 480; P., **1897**, 3.

***d*-Tartaric acid**, refractive powers of solid and dissolved (GLADSTONE and HIBBERT), 824.

fermentation of (PASTEUR LECT.), 697.

***i*-Tartaric acid** (*mesotartaric acid*), formation of (PASTEUR LECT.), 702.

Racemic acid, formation of, from dextro- and lævo-tartaric acid (PASTEUR LECT.), 690.

resolution of, by means of the quinicine and cinchonicine salts (PASTEUR LECT.), 694.

ammonium salt of, fermentation of (PASTEUR LECT.), 697.

sodium ammonium salt, separation of, into active forms (PASTEUR LECT.), 688.

Tartaro-β-naphthyl-amide and **-anil** (COHEN and HARRISON), 1062.

Terephthalaldehyde, oxidation of the condensation product of, with phenylsemicarbazide (YOUNG and ANNABLE), 217; P., **1896**, 246.

Terminalia chebula, composition of the unripe fruit of (PERKIN), 1137; P., **1897**, 170.

Tetracet-ethylenediphenylene-*p*-tetramide (FRANCIS), 424.

2 : 4 : 2′ : 4′-Tetrahydroxydiphenylacetic acid, barium and zinc salts of (HEWITT and POPE), 1089; P., **1897**, 168.

lactone of; its molecular weight, and acetyl, benzoyl, and sodium derivatives (HEWITT and POPE), 1084, 1087, 1089; P., **1897**, 168.

Tetrahydro-*p*-xylic acid (1 : 2-*dimethylcyclohexene*-4-*carboxylic acid*) and its ethylic salt (BENTLEY and PERKIN), 157, 172; P., **1896**, 79.

Tetrahydroxylic acid (1 : 3-*dimethylcyclohexene*-4-*carboxylic acid*) and its ethylic salt (BENTLEY and PERKIN), 161, 173, 175; P., **1896**, 79.

Tetraphenylazine (*Laurent's Amarone*), preparation of, from benzaldehyde and magnesium nitride (SNAPE), 528; P., **1897**, 50.

Tetraphenylenefurfuran (JAPP and FINDLAY), 1120; P., **1897**, 169.

Thallium, occurrence of, in common minerals (HARTLEY and RAMAGE), 533; P., **1897**, 11.
Thallium alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 395; P., **1897**, 61.
THERMOCHEMISTRY:—
Heat, specific, of silver amalgam (LITTLETON), P., **1896**, 221.
Heat of fusion, connection of melting point, density and (CROMPTON), 929; P., **1897**, 110.
of zinc (HEYCOCK and NEVILLE), 403; P., **1897**, 61.
Dissociation pressure of alkylammonium hydrosulphides (WALKER and LUMSDEN), 428; P., **1897**, 48.
Thermochemical data, for acids and bases in dilute aqueous solution and electrolytic dissociation (CROMPTON), 951; P., **1897**, 111.
of alkylammonium hydrosulphides (WALKER and LUMSDEN), 439; P., **1897**, 48.
of formation of carbamide from ammonium cyanate (WALKER and KAY), 508; P., **1897**, 76.
of silver amalgam (LITTLETON), P., **1896**, 220.
of the hydrolysis of starch by vegetable and animal diastase, and of cane-sugar by invertase (BROWN and PICKERING), 783; P., **1897**, 131.
Heat of solution of dextrose, maltose, levulose, milk-sugar, and cane-sugar (BROWN and PICKERING), 769.
Thiazine-dyes and **Thiazole-dyes**, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
Thiourea, from action of sulphuric acid on potassium thiocyanate (CHATTAWAY and STEVENS), 611, 612; P., **1897**, 88.
action of chloracetanilide on (DIXON), 626; P., **1897**, 6.
Tin, ingots, crystalline structure of (LIVERSIDGE), 1130; P., **1897**, 22.
Tin alloys with zinc, freezing points of (HEYCOCK and NEVILLE), 392; P., **1896**, 61.
Tin ores, composition of (HARTLEY and RAMAGE), 541; P., **1897**, 13.
Tolane, and its dibromide, preparation of (SUDBOROUGH), 221.
dichloride, *cis* and *trans* forms of (SUDBOROUGH), 222.
m-**Tolualdehyde**, oxidation of the condensation products of, with phenylsemicarbazide (YOUNG and ANNABLE), 213; P., **1896**, 246.
Toluene, nitration of (FRISWELL), P., **1897**, 145.
p-**Toluidine**, yellow compound obtained by action of diacetyltartaric anhydride on (COHEN and HARRISON), 1061; P., **1897**, 167.
sodium derivative of (TITHERLEY), 465; P., **1897**, 45.
o-**Tolylethylthiohydantoin** and action of alkali on (DIXON), 636; P., **1897**, 9.
o-**Tolylmethylthiohydantoin** and action of alkali on (DIXON), 634; P., **1897**, 8.
o-**Tolylthiocarbimidoglycolide**, from *o*-tolylthiohydantoin (DIXON), 623; P., **1897**, 8.
o-**Tolylthiohydantoin**, constitution of, and action of hydrochloric acid on (DIXON), 622, 625; P., **1897**, 8.
o-**Tolylthiourea**, action of ethylic chloracetate on (DIXON), 623; P., **1897**, 8.
Triacetylmaclurinazobenzene, production of (PERKIN), 188; P., **1897**, 5.
Triacetylphloretylcoumarin (PERKIN and MARTIN), 1151; P., **1897**, 172.
Tribenzoylapigenin, the properties of (PERKIN), 809; P., **1897**, 54.
Triethylluteolin. See Luteolin triethylic ether.
4:5:6-Trihydroxypicoline and its salts (LAPWORTH and COLLIE), 843; P., **1897**, 146.
aaβ-**Trimethylglutaconic acid** (*hexylenedicarboxylic acid*), and its silver, copper, and ethylic salts (PERKIN and THORPE), 1182; P., **1897**, 72.
iso-**Trimethylglutaconic acid**, and its silver, barium, calcium, and copper salts, anhydride, anilic acid, anil (PERKIN and THORPE), 1184.
aaβ-**Trimethylglutaric acid** (*hexanedicarboxylic acid*), silver, lead, mercury salts, anilic acid, anhydride (PERKIN and THORPE), 1187; P., **1897**, 72.
β-bromo-, ethylic salt (PERKIN and THORPE), 1181.
α- and *β*-*di*bromo- (PERKIN and THORPE), 1184.
β-chloro-, ethylic salt (PERKIN and THORPE), 1180; P., **1897**, 73.
β-cyano-, ethylic salt (PERKIN and THORPE), 1189; P., **1897**, 73.
Trimethylluteolin. See Luteolin trimethyl ether.
2:4:6-Trimethylpyridine and its salts (COLLIE), 308; P., **1897**, 43.
aaβ-**Trimethyltricarballylic acid** (*hexanedicarboxylic acid*), synthesis of; identity of, with camphoronic acid (W. H. PERKIN, junr., and THORPE), P., **1897**, 73.

Triphenylmethane, bromo-, action of, on ethylic sodioacetoacetate and ethylic sodiomalonate (HENDERSON and PARKER), 676; P., **1897**, 119.
Triphenylmethane colours, oxidation of leuco-compounds of (GREEN), P., **1896**, 226.
1:3:4-Triphenylpyrazole (JAPP and TINGLE), 1148; P., **1897**, 171.
2:3:5-Triphenylpyrroline, formation of, from dibenzoylcinnamenimide, and its oxidation (JAPP and TINGLE), 1146; P., **1897**, 171.

U.

Ungarica gambier, the composition of catechu from (PERKIN), 1135.

V.

Valeraldehyde, formation of (COHEN and CALVERT), 1051.
iso-**Valeric acid**, α-bromo-, action of ethylic sodioacetoacetate on (SPRANKLING), 1164; P., **1897**, 173.
Valonia, composition and dyeing properties of (PERKIN), 1137; P., **1897**, 170.
Vanillic acid from the hydrolysis of rhamnazin (PERKIN and MARTIN), 820; P., **1897**, 139.
Vanillin from the hydrolysis of rhamnazin (PERKIN and MARTIN), 820; P., **1897**, 139.
Vapour pressures of normal pentane (YOUNG), 448; P., **1897**, 58.
Velocity of formation of carbamide from ammonium cyanate dissolved in aqueous alcohol (WALKER and KAY), 489; P., **1897**, 75.
of carbamide in presence of glycerol, cane-sugar, glycol, methylic alcohol, and acetone (WALKER and KAY), 506; P., **1897**, 76.
Velocity of solution of zinc in acids in presence of salts (BALL), 642; P., **1896**, 235.
Veratric acid (*dimethylprotocatechuic acid*), formation of, from hydrolysis of aconitine (DUNSTAN and CARR), 356; P., **1895**, 154.
Veratryl-ψ-aconine, properties of, and its salts (DUNSTAN and CARR), 356; P., **1895**, 154.
Vinegar, manufacture of (PASTEUR LECT.), 721.
Vinylic tribromide, behaviour of, towards sodium ethoxide (GRAY), 1024; P., **1897**, 140.
Virus, attenuation of (PASTEUR LECT.), 739.
Viscosity of mixtures of liquids (THORPE and RODGER), 360; P., **1897**, 49.
Volume, molecular, of potassium, rubidium, and cæsium selenates (TUTTON), 870; P., **1897**, 116.

W.

Water vapour, influence of, on the formation of ozone (SHENSTONE), 472; P., **1897**, 2.
Water, Sea, presence of oxidising agents (iodates) and gold in (SONSTADT), P., **1896**, 236.
Wechsler's method for separating fatty acids, criticism of (CROSSLEY), 580; P., **1897**, 21.
Wine, diseases of (PASTEUR LECT.), 723.

X.

Xylic acid, reduction of, and separation of, from *p*-xylic acid (BENTLEY and PERKIN), 157, 161; P., **1896**, 79.
p-**Xylic acid**, reduction of (BENTLEY and PERKIN), 157; P., **1896**, 79.
p-**Xylyl methyl ketone**, oxidation of (BENTLEY and PERKIN), 180; P., **1896**, 79.

Y.

Yeast, multiplication of, in a saccharine solution (PASTEUR LECT.), 729.
effect of oxygen on fermentation by (PASTEUR LECT.), 728.

Z.

Zinc, influence of dissolved salts on the rate of solution of, in acids (BALL), 642; P., **1895**, 235.
Zinc alloys with other metals, freezing points of (HEYCOCK and NEVILLE), 383; P., **1897**, 60.
Zinc hydroxide, precipitation of iodine along with (RETTIE), P., **1896**, 178.
double sulphates of iron, copper, chromium, and (SCOTT), 566; P., **1897**, 71.

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

I.—Sulphocamphoric Acid and other Derivatives of Camphorsulphonic Acid. By ARTHUR LAPWORTH, D.Sc., and FREDERIC STANLEY KIPPING, Ph.D., D.Sc. 1

II.—The Explosion of Acetylene with less than its Own Volume of Oxygen. By WILLIAM ARTHUR BONE and JOHN CANNELL CAIN 26

III.—The Direct Union of Carbon and Hydrogen. By WILLIAM ARTHUR BONE and DAVID SMILES JERDAN 41

IV.—Electrical Conductivity of Diethylammonium Chloride in Aqueous Alcohol. By JAMES WALKER, Ph.D., D.Sc., and FRED. J. HAMBLY, F.I.C. 61

V.—Experimental Methods employed in the Examination of the Products of Starch-hydrolysis by Diastase. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 72

VI.—Specific Rotation of Maltose and of Soluble Starch. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 109

VII.—The Relation of the Specific Rotatory and Cupric-reducing Powers of the Products of Starch-hydrolysis by Diastase. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and J. H. MILLAR 115

VIII.—Synthesis of Pentacarbon Rings. Part I. Anhydracetonebenzil and its Homologues. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. 123

IX.—Synthesis of Pentacarbon Rings. Part II. Condensation of Benzil with Acetonedicarboxylic Acid. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. . 139

X.—Synthesis of Pentacarbon Rings. Part III. Condensation of Benzil with Lævulic Acid. By FRANCIS ROBERT JAPP, F.R.S., and THOMAS SMITH MURRAY, D.Sc. 144

XI.—Reduction of Desyleneacetic Acid, and the Constitution of Zinin's Pyroamaric Acid. By FRANCIS ROBERT JAPP, F.R.S., and GEORGE DRUCE LANDER, B.Sc. 154

XII.—The Reduction of Xylic Acid, of Paraxylic Acid, and of Methylterephthalic Acid, and the preparation of Methylterephthalic Acid and of Methylisophthalic Acid. By WILLIAM HENRY BENTLEY and WILLIAM HENRY PERKIN, Jun. 157

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

	PAGE
HENRY (LOUIS). Mixed Trimethylene Compounds	i, 1
SCHOLL (ROLAND). [Preparation of Cyanogen Bromide, Bromonitromethane and Dibromonitromethane]	i, 1
TARUGI (N.). Preparation of Ammonium Ferricyanide	i, 2
KASSNER (GEORG). Ferricyanides and their use as Oxidising Agents	i, 2
SCHAER (EDUARD). Action of Morphine and of Acetanilide on Mixtures of Ferric Salts and Ferricyanides	i, 3
HOLLEMAN (ARNOLD FREDERIK). Fulminates	i, 3
BROCHET (ANDRÉ). Influence of the presence of acids on the Oxidation of Alcohols	i, 3
BROCHET, (ANDRÉ). Action of Chlorine on hot Isobutylic Alcohol	i, 4
ALBERDA VAN EKENSTEIN (W). Crystallised d-Mannose	i, 4
FRAMM (FRIEDRICH). Decomposition of Monosaccharides by Alkalis	i, 5
DAVIDIS (ERNST). Aldazines, Ketazines and Benzosazones of Aldoses and Ketoses	i, 5
JOHNSON (SAMUEL WILLIAM). Composition of Wood Gum	i, 5
FRANCHIMONT (ANTOINE PAUL NICOLAS) and H. VAN ERP. Action of Alkalis on Neutral Aliphatic Nitramines	i, 6
UMBGROVE (HERM.) and ANTOINE PAUL NICOLAS FRANCHIMONT). Methylallylnitramine, an Isomeride, and their Bromine Derivatives	i, 7
FRANCHIMONT (ANTOINE PAUL NICOLAS) and HERM. UMBGROVE. Methylnitramine, Dimethylnitramine and one of its Isomerides	i, 8
BRUYN (CORNELIS ADRIAAN LOBRY DE). Action of Alkylic Iodides on Hydroxylamine	i, 8
SCHOLL (ROLAND). Nitracetonitrile	i, 9
WERNER (ALFRED) and R. FALCK. α-Hydroxylaminebutyric acid	i, 9
ALTSCHUL (EMIL). Solubilities of Salts of Caproic and of Œnanthylic acids	i, 10
BACZEWSKI (MAX). Derivatives of Arachidic acid	i, 11
PRENTICE (BERTRAM). Derivatives of Dimethylacrylic acid	i, 12
FICHTER (FRITZ). General Synthetical Method for the Preparation of γδ-unsaturated acids	i, 13
BRUNEL, (H.). Thioglyoxylic (Ethanethiolic) acid	i, 14
FITTIG (RUDOLPH). Transformation of unsaturated α-Hydroxy-acids into the Isomeric γ-Ketonic acids	i, 14
BERTHELOT (MARCELLIN PIERRE EUGENE) and GUSTAVE ANDRÉ. Volatility of Levulinic acid	i, 15
BOËSEKEN (J.). Clausius' Condensation Method	i, 15

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

XXI.—The Amyl (Secondary Butyl Methyl) Derivatives of Glyceric, Diacetylglyceric, and Dibenzoylglyceric Acids, Active and Inactive. By PERCY FRANKLAND, Ph.D., B.Sc., F.R.S., and THOMAS SLATER PRICE, B.Sc., late Priestley Scholar in Mason College, Birmingham 253

XXII—The Solution-density and Cupric-reducing Power of Dextrose, Levulose, and Invert-Sugar. By HORACE T. BROWN, F.R.S., G. HARRIS MORRIS, Ph.D., and JAMES HILL MILLAR 275

XXIII.—Researches on the Terpenes, VII. Halogen Derivatives of Camphor and their Reactions. By JAMES ERNEST MARSH and JOHN ADDYMAN GARDNER 285

XXIV.—Supposed Condensation of Benzil with Ethylic Alcohol. A Correction. By FRANCIS ROBERT JAPP, F.R.S. . . 297

XXV.—Presence of Gold in Natural Saline Deposits and Marine Plants. By ARCHIBALD LIVERSIDGE, LL.D., F.R.S., Professor of Chemistry in the University of Sydney 298

XXVI.—Production of Pyridine Derivatives from Ethylic β-Amidocrotonate. By JOHN NORMAN COLLIE, Ph.D., F.R.S. . 299

XXVII.—Oxidation of Phenylstyrenyloxytriazole. By GEORGE YOUNG, Ph.D., Firth College, Sheffield 311

XXVIII.—Formation of Dithionic Acid by the Oxidation of Sulphurous Acid with Potassium Permanganate. By THOMAS S. DYMOND and FRANK HUGHES 314

XXIX.—Apparatus for "Steam Distillation." By FRANCIS EDWARD MATTHEWS 318

XXX.—Contributions to the Knowledge of the β-Ketonic Acids. Part III. By SIEGFRIED RUHEMANN, Ph.D., M.A. . . 323

XXXI.—Contributions to the Knowledge of the β-Ketonic Acids. Part IV. By SIEGFRIED RUHEMANN, Ph.D., M.A., and A. S. HEMMY, B.A., M.Sc., Hutchinson Student of St. John's College 329

XXXII.—Contributions to the Knowledge of the β-Ketonic Acids. Part V. By SIEGFRIED RUHEMANN, Ph.D., M.A., and A. S. HEMMY, B.A., M.Sc. 334

XXXIII.—The Nitrites of Mercury and the Varying Conditions under which they are formed. By P. C. RÂY, D.Sc. (Edin.). 337

XXXIV.—Crystallography of the Monhydrated Mercurous Nitrite. By THOMAS H. HOLLAND, A.R.C.S., F.G.S., Deputy-Superintendent, Geological Survey of India . . 346

XXXV.—Mercury Hyponitrites. By P. C. RÂY, D.Sc. (Edin.) 348

XXXVI.—Contributions to our Knowledge of the Aconite Alkaloids. Part XIV.—On Pseudaconitine. By WYNDHAM R. DUNSTAN, M.A., F.R.S., and FRANCIS H. CARR, A.I.C., Salters' Company's Research Fellow in the Laboratories of the Scientific Department of the Imperial Institute . . 350

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

PAGE

KONDAKOFF (IWAN L.). Preparation of Tetramethylethylene . . . i, 177
PERGAMI (A.). Action of Alcohols on Tetrachlorethylic Ether . . . i, 177
PERDRIX (LÉON). Action of Potassium Permanganate on the Polyhydric Alcohols and their Derivatives . . . . . i, 178
FISCHER (EMIL) and LEO BEENSCH. The two Optically Active Methylmannosides . . . . . i, 178
WIECHMANN (FERDINAND G.). Allotropy of Sucrose . . . . . i, 179
LOSANITSCH (SIMA M.) and MILORAD Z. JOVITSCHITSCH. Chemical Syntheses by aid of the dark Electric Discharge . . . . . i, 179
ODDO (GIUSEPPE) and C. MANUELLI. New method of preparing Anhydrides . . . . . i, 180
DARMSTAEDTER (L.) and ISAAC LIFSCHÜTZ. Composition of Wool Fat . i, 180
BROMBERG (OTTO). Compounds of Alloxan and Dimethylalloxan with Semicarbazide . . . . . i, 181
LUCAS (AD). Mesitylene from Acetone . . . . . i, 181
PAUL (LUDWIG). Technical uses of Ortho- and Para-nitrophenol . . . i, 181
MAZZARA (GIROLAMO) and MANFREDO LAMBERTI-ZANARDI. Mono- and Dichloroparacresols . . . . . i, 182
BOCCHI (O.). Chlorothymol and Dichlorocymene . . . . . i, 182
LEICESTER (JAMES). Blue Dye from Quinone . . . . . i, 183
BONDZYŃSKI (STANISLAS) and V. HUMNICKI. Fate of Cholesterol in the Animal Organism . . . . . i, 183
HÜRTHLE (KARL). Hæmosterol, a new Constituent of Blood . . . i, 183
PAAL (CARL) and HERMANN SPRENGER. Paranitrobenzyl Bases . . . i, 184
PAAL (CARL) and H. POLLER. Action of Orthonitrobenzylic Choride on Hydroxylamine . . . . . i, 184
BLOMSTRAND (CHRISTIAN WILHELM). The Diazo-controversy . . . i, 185
HANTZSCH (ARTHUR RUDOLF) and M. SCHMIEDEL. Diazosulphonates and free Diazosulphonic acids . . . . . i, 185
HANTZSCH (ARTHUR RUDOLF) and H. BORGHAUS. Action of Potassium Sulphite on Nitrodiazonium Salts . . . . . i, 186
HANTZSCH (ARTHUR RUDOLF) and H. BORGHAUS. Bis-diazonium Salts . i, 186
CLAUS (ADOLPH) and HERMANN HÄFELIN. Oximes of the Fatty-aromatic Ketones containing the higher Alkyls: Stereochemistry of Nitrogen . i, 187
CLAISEN (LUDWIG). A curious instance of Molecular Rearrangement . i, 188
GATTERMANN (LUDWIG) [and in part A. E. LOCKHART and C. WEINLIG]. Electrolytic Reduction of Aromatic Nitro-compounds . . . . i, 188
GATTERMANN (LUDWIG) [and ALWAY]. Electrolytic Reduction of Aromatic Nitro-compounds . . . . . i, 189
GATTERMANN (LUDWIG) [and with WÜRST and BOHN]. Electrolytic Reduction of Aromatic Nitro-compounds . . . . . i, 189
CLAUS (ADOLPH). Action of Hydroxylamine on Benzylideneacetophenone i, 189
SALZER (THEODOR). Calcium Orthoethylbenzoate, and the Author's Theory of Water of Crystallisation . . . . . i, 190
PAPE (CARL). Preparation of Mandelic acid . . . . . i, 190
BISTRZYCKI (AUGUSTIN) and JULIAN FLATAU. Condensation of Mandelic acid with Phenols, II. . . . . i, 190
SCHALL (CARL). Elimination of Sulphur from Resorcinoldithiocarboxylic acid . . . . . i, 191
BAUMANN (EUGEN) and EMIL FROMM. Action of Sulphur on Unsaturated Organic Compounds: Bisulphide of Thiobenzoylthioacetic acid . . i, 191
STOBBE (HANS). Condensation of Ethereal Salts of γ-substituted Itaconic acids with Aldehydes and Ketones . . . . . i, 192

PAGE

WILLGERODT (HEINRICH CONRAD CHRISTOPH). Action of Phenyliodosochloride on Mercury Diphenyl: Production of Phenyl Iodochloride, &c. i, 192
GATTERMANN (LUDWIG) and H. SCHULZE. Thiobenzophenone . . . i, 192
BARTOLOTTI (PIETRO). Derivatives of Benzophenone . . . . . i, 193
PAUL (LUDWIG). α-Amido-β-naphthylic Ethylic Ether . . . . . i, 193
WITT (OTTO NIKOLAUS) and JENS DEDICHEN. Naphthacetol . . . i, 193
PAUL (LUDWIG). 1 : 1′-Dihydroxynaphthalene-4-sulphonic acid . . . i, 195
GATTERMANN (LUDWIG) and H. SCHULZE. Colouring Matters derived from the Sulphonic Acids of α-Naphthol and α-Naphthylamine . . i, 195
SCHMIDT (ROBERT E.) and LUDWIG GATTERMANN. Hydroxylamine Derivatives of Anthraquinone . . . . . i, 196
CHARABOT (EUGÈNE) and G. CHIRIS. Oil of Roses . . . . . i, 197
TIEMANN (FERDINAND) and R. SCHMIDT. Artificial Production of Pulegone from Citronellaldehyde . . . . . i, 198
TIEMANN (FERDINAND) and R. SCHMIDT. Dextro- and Lævo-configurations in the Citronellal Series . . . . . i, 199
TIEMANN (JOHANN CARL WILHELM FERDINAND). Camphor . . . i, 199
BLANC (G.). Action of Aluminium Chloride on Camphoric Anhydride . i, 201
THOMS (HERMANN). Onocerin . . . . . i, 201
DACCOMO (GIROLAMO). Filicic acid . . . . . i, 202
MARCHLEWSKI (LEO). The Chemistry of Chlorophyll . . . . . i, 202
GRASSI-CRISTALDI (GIUSEPPE). Hyposantonous Acid and its Decomposition Products . . . . . i, 202
AHRENS (FELIX B.). Coal-tar Bases . . . . . i, 203
MENDE (FRITZ). Decomposition of Pipecolinic acid into its two Optical Components . . . . . i, 203
EDINGER (ALBERT). Action of Sulphur Bromide on Aromatic Amines . i, 204
EDINGER (ALBERT) and HANS LUBBERGER. Action of Sulphur Chloride on Quinoline . . . . . i, 204
CLAUS (ADOLPH) and ROBERT GIWARTOVSKY. 1-Hydroxyquinoline-4-sulphonic acid . . . . . i, 204
MARCKWALD (WILHELM) and AUG. BOTT. 1-Benzoyl-4-phenylthiosemicarbazide . . . . . i, 205
PELLIZZARI (GUIDO). Identity of Formopyrine and Methylenebiantipyrine i, 205
PELLIZZARI (GUIDO) and C. MASSA. Monosubstituted Triazoles . . . i, 205
OSBORNE (THOMAS BURR). The Proteids of the Kidney Bean (*Phaseolus vulgaris*) . . . . . i, 207
COHNHEIM (OTTO). Hydrochloric acid Compounds of Albumoses and Peptone i, 207
KRAWKOFF (N.). Carbohydrate Groups in the Albumin molecule . . i, 207
BIALOBRZESKI (M.). Chemical Structure of Hæmin and Hæmatin prepared by various methods . . . . . i, 207
KOSSEL (ALBRECHT CARL LUDWIG MARTIN LEONHARD). Phrenosin . . i, 208

PART II.

General and Physical Chemistry.

BRÜHL (JULIUS WILHELM). Stereochemical Spectrometric Researches, I. . ii, 129
ALBERDA VAN EKENSTEIN (W.), W. P. JORISSEN, and LODEWYK THEODORUS REICHER. Changes of Rotation in the passage from Amide to Lactone . ii, 129
ÉTARD (ALEXANDRE LÉON). Spectrum of Chlorophyll . . . . . ii, 130
HEMPTINNE (ALEXANDER VON). Chemical action of Röntgen Rays . . ii, 130
GLADSTONE (JOHN HALL) and WALTER HIBBERT. Action of Metals and their Salts on Röntgen Rays . . . . . ii, 131
TAYLOR (A. E.). Irreversible Cells . . . . . ii, 131
DELÉPINE (MARCEL). Hexamethylenetetramine Salts . . . . . ii, 131
METZNER (RENÉ). Heat of Formation of Selenic acid and Selenates . . ii, 132

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

XXXVII.—The Viscosity of Mixtures of Miscible Liquids. By Thos. Edward Thorpe, LL.D., F.R.S., and Jas. Wyllie Rodger, Assoc. R.C.S. 360

XXXVIII.—A New Synthesis in the Sugar Group. By Henry J. Horstman Fenton, M.A. 375

XXXIX.—The Freezing Points of Alloys containing Zinc and another Metal. By Charles Thomas Heycock and Francis Henry Neville 383

XL.—The Di-nitrosamines of Ethyleneaniline, the Ethylenetoluidines, and their Derivatives. By Francis E. Francis, Ph.D., B.Sc., Lecturer in Chemistry, University College, Bristol 422

XLI.—Dissociation-pressure of Alkylammonium Hydrosulphides. By James Walker, D.Sc., Ph.D., and John S. Lumsden, B.Sc., Ph.D. 428

XLII.—Some Hydrocarbons from American Petroleum. I. Normal and Iso-pentane. By Sydney Young, D.Sc., F.R.S., and George L. Thomas, B.Sc., University College, Bristol. . 440

XLIII.—The Vapour Pressures, Specific Volumes, and Critical Constants of Normal Pentane, with a Note on the Critical Point. By Sydney Young, D.Sc., F.R.S., University College, Bristol 446

XLIV.—A Synthesis of Citric Acid. By William Trevor Lawrence, B.A., Ph.D. 457

XLV.—Sodamide and some of its Substitution Derivatives. By Arthur W. Titherley, M.Sc., Ph.D. 460

XLVI.—Rubidamide. By Arthur W. Titherley, M.Sc., Ph.D. 469

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

	PAGE
WALTHER (REINHOLD). Preparation of Cyanamide	i, 209
HERTY (CHARLES H.) and J. G. SMITH. Mercuric Chlorothiocyanate	i, 209
LESPIEAU (ROBERT). 1:3-Dibromopropene [$\alpha\gamma$-Dibromopropylene]	i, 209
KONDAKOFF (IWAN L.). Polymerisation of Olefine Hydrocarbons, I. and II.	i, 209
HERON (JOHN). Invert-sugar, I. and II.	i, 211
TRILLAT (AUGUSTE). Preparation of Fatty Amines	i, 211
SZARVASY (EMERICH). Action of Methylic Alcohol on Magnesium Nitride	i, 211
HARRIES (CARL D.) and FRITZ LEHMANN. Action of Hydroxylamine on Phorone	i, 211
REFORMATSKY (SERGIUS N.). Synthesis of β-Hydroxy acids	i, 212
REFORMATSKY (SERGIUS N.). Decomposition of β-Hydroxy-acids	i, 213
JOVITSCHITSCH (MILORAD Z.). Stereoisomerism of Ethylic Isonitrosoacetoacetate	i, 213
BECKH (WALTER). Action of Fuming Nitric acid on Ethylic Acetoacetate	i, 213
BRUNNER (HEINRICH) and ERNEST CHUARD. Moniodosuccinic acid	i, 214
ARTH (GEORGES). Action of Phenylcarbimide on γ-Pimelic acid derived from Menthol	i, 214
KEHRER (EDUARD ALEXANDRE) and ERWIN HOFACKER. Normal Dilevulinic acid (4 : 7-Decandiondioic acid)	i, 214
WOLFF (LUDWIG) and FRITZ RÜDEL. Derivatives of Pentamethylene and R-Pentene	i, 215
BAUER (ALBERT) (THURGAU). Derivatives of Butyltoluene	i, 216
HANTZSCH (ARTHUR RUDOLF) and MARTIN SINGER. Benzoyldiazobenzene	i, 216
ALTSCHUL (JULIUS). Conversion of Phenylhydrazine into Diazobenzene by Nitrous acid	i, 216
ALTSCHUL (JULIUS). Diazotisation of Aniline in the presence of Acetic acid, or of an insufficient amount of Hydrochloric acid	i, 217
BRUNNER (HEINRICH) and LOUIS PELET. Action of Bleaching Powder solution on Phenylhydrazine. Formation of Azobenzene	i, 217
BAMBERGER (EUGEN) [and in part N. RONGGER]. Comparative experiments with Normal and Isodiazotates	i, 217
NIETZKI (RUDOLF) and F. BLUMENTHAL. Diquinoyltrioxime and Tetranitrophenol	i, 218
ANSCHÜTZ (RICHARD). A Law of Production of Phenolcarboxylic chlorides	i, 219
RIEDEL (FR.). Action of Ethylic Cyanacetate and of Benzylic Cyanide on Aldehydes, Ketones and Aldehyde-ammonia	i, 219
PECHMANN (HANS VON). Basic Coumarins	i, 220
BRÜLL (J.) and PAUL FRIEDLÄNDER. Flavone Derivatives, IV.	i, 221
BIÉTRIX (ALEXANDRE). A Dye derived from Dibromogallic acid	i, 221
LIMPRICHT (HEINRICH) [and PAROW]. Dinitrodiphenylethylenenedisulphone	i, 222
HANTZSCH (ARTHUR RUDOLF) and MARTIN SINGER. Action of Diazo-compounds on Benzenesulphonic acid	i, 222
TROEGER (JULIUS) and WALTHER VOIGTLÄNDER-TETZNER. Orthotoluenesulphinic acid	i, 223
LIEBERMANN (CARL THEODOR) and JULIAN FLATAU. Cœrulignone colouring matters	i, 224

PAGE

ROSENSTIEHL (AUGUSTE). Reactions distinctive of the Rosanilines and of Carbinols containing Amido-groups . . . . . i, 225
NIETZKI (RUDOLF) and EDUARD BURCKHARDT. Quinoidal Derivatives of Phenolphthalein . . . . . i, 225
REVERDIN (FRÉDÉRIC). A New Yellow Dye derived from Dinitrofluorescein i, 226
PERRIER (G.). β-Naphthyl Propyl Ketone . . . . . i, 226
NIETZKI (RUDOLF) and TH. KNAPP. Action of Nitrous acid on 2 : 3′-Naphtholsulphonic acid . . . . . i, 226
KONDAKOFF (IWAN L.) Ethereal Oil of Bucco Leaves . . . . . i, 227
HALLER (ALBIN). A Partial Synthesis of Camphor . . . . . i, 227
HILDEBRAND (K.). Xanthorrhœa Resins . . . . . i, 227
HOEHNEL (M.). Convolvulin the Glucoside of *Tubera Jalapæ* (*Ipomœa Purja Hayne*) . . . . . i, 228
CIAMICIAN (GIACOMO LUIGI) and PAUL G. SILBER. Curcumin . . . . i, 229
LIPP (ANDREAS). Synthesis of Tetrahydropyridine Derivatives and their Conversion into Piperidine Derivatives . . . . . i, 229
BRANDES (P.) and CARL STOEHR. Formation of Pyrazine and its Homologues from Glucose and Ammonia . . . . . i, 230
MARCKWALD (WILHELM) and E. SEDLACZEK. Derivatives of Methylhydrazine . . . . . i, 231
PELLIZZARI (GUIDO). Diphenyltetrazoline . . . . . i, 231
AHRENS (FELIX B.). Sparteine . . . . . i, 231
MILROY (T. H.). Compounds of Proteid with Nucleic acid and with Thymic acid . . . . . i, 232
KÜSTER (WILLIAM). Oxidation products of Hæmatoporphyrin and the Composition of Hæmin produced by different methods . . . . i, 232

PART II.

General and Physical Chemistry.

COOK (ELLEN P.). Optical Activity of Aspartic acid in Aqueous solution . i, 169
METZNER (RENÉ). Selenic Anhydride . . . . . i, 169
MICHAELIS (HUGO). Automatic cut-off of Gas on Stoppage of the Water Supply . . . . . i, 169
TASSILLY. Apparatus for filtering and drying Substances unstable in presence of Air . . . . . i, 170

Inorganic Chemistry.

SABANÉEFF (ALEXANDER P.). Structural Isomerism in Inorganic Compounds ii, 170
HABER (FRITZ) and A. WEBER. Combustion of Coal Gas in Gas Engines . ii, 170
GIESEL (FRITZ). Artificial colouring of Crystals of the Haloid Salts of the Alkali Metals by means of Sodium and Potassium Vapour . . . ii, 170
SENDERENS (JEAN BAPTISTE). Metallic Precipitation . . . . . ii, 171
DUDLEY (WILLIAM L.). Nickelonickelic Hydroxide . . . . . ii, 171
CHESNEAU (GABRIEL). Sulphides of Cobalt and Nickel . . . . . ii, 172
RECOURA (ALBERT). A new acid containing Chromium : Sulphochromic acid . . . . . ii, 172
WYROUBOFF (GREGOIRE N.). The Silicotungstates . . . . . ii, 173
HALLOPEAU (L. A.). Antimoniotungstates . . . . . ii, 178

Mineralogical Chemistry.

RETGERS (JAN WILLEM). Heavy Liquids for the Separation of Minerals . ii, 179
BAUER (MAX). Occurrence of Rubies in Burma . . . . . ii, 179

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

XLVI.—Rubidamide. By ARTHUR W. TITHERLEY, M.Sc., Ph.D. 469

XLVII.—Observations on the Properties of some Highly Purified Substances. By WILLIAM ASHWELL SHENSTONE, Lecturer on Chemistry in Clifton College 471

XLVIII.—Velocity of Urea Formation in Aqueous Alcohol. By JAMES WALKER, Ph.D., D.Sc., and SYDNEY A. KAY, B.Sc. 489

XLIX.—Action of Diastase on Starch. Third Notice. By ARTHUR R. LING and JULIAN L. BAKER 508

L.—Studies on the Chemistry of Nitrogen. Enantiomorphous forms of Ethylpropylpiperidonium Iodide. By CLARE DE BREREton EVANS 522

LI.—Magnesium Nitride as a Reagent. By H. LLOYD SNAPE, D.Sc., Ph.D. 526

LII.—Laurent's Amarone. By H. LLOYD SNAPE, D.Sc., Ph.D., and ARTHUR BROOKE, Ph.D. 528

LIII.—The Wide Dissemination of some of the Rarer Elements, and the Mode of their Association in Common Ores and Minerals. By WALTER NOEL HARTLEY, F.R.S., and HUGH RAMAGE, A.R.C.S.I., F.I.C. 533

LIV.—On the Spectrographic Analysis of some Commercial samples of Metals, of Chemical Preparations, and Minerals from the Stassfurth Potash Beds. By W. N. HARTLEY, F.R.S., and HUGH RAMAGE, F.I.C., A.R.C.Sci.I., Royal College of Science, Dublin 547

LV.—The Atomic Weight of Carbon. By ALEXANDER SCOTT, M.A., D.Sc. 550

LVI.—A New Series of Mixed Sulphates of the Vitriol Group. By ALEXANDER SCOTT, M.A., D.Sc. 564

LVII.—Solution and Pseudo-solution. Part III. The Electrical Convection of certain Dissolved Substances. By HAROLD PICTON and S. ERNEST LINDER 568

LVIII.—Action of Alkyl Haloids on Aldoximes and Ketoximes. By WYNDHAM R. DUNSTAN, F.R.S., and ERNEST GOULDING, Assistant Chemist in the Laboratories of the Scientific Department of the Imperial Institute 573

LIX.—Note on Wechsler's Method for the Separation of Fatty Acids. By ARTHUR W. CROSSLEY, M.Sc., Ph.D. . . . 580

LX.—Researches on the Oxides of Cobalt. Cobalt Dioxide or Cobaltous Anhydride, Cobaltous Acid and Cobaltites. By ARTHUR H. MCCONNELL and EDGAR S. HANES 584

Annual General Meeting 591

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

PAGE

FOURNIER (H.). Preparation of Diethylenic Hydrocarbons . . . . i, 233

IPATIEFF (WLADIMIR) and NICOLAUS VON WITTORF. Constitution of Isoprene . . . . . i, 233

IPATIEFF (WLADIMIR). Constitution and Synthesis of Isoprene . . . i, 233

LEMOULT (PAUL). Cyanuric Chloride . . . . . i, 234

LEMOULT (PAUL). Polymerisation of some Cyanic Compounds . . . . i, 234

HILLYER (HOMER WINTHROP) and O. E. CROOKER. Aluminium Ethoxide i, 235

HUGOUNENQ (LOUIS). Purification of Phenylglucosazone . . . . . i, 235

WITT (OTTO NIKOLAUS). Preparation of Pure Starch (Patented with SIEMENS and HALSKE) . . . . . i, 235

YOUNG (ROBERT A.). Precipitation of Carbohydrates by Neutral Salts . i, 235

HARRIES (CARL D.). A Correction [Action of Hydroxylamine on Mesityl oxide] . . . . . i, 236

URBAIN (G.). Thorium [Derivative of Acetylacetone] . . . . . i, 236

DYES (WILHELM A.). Preparation of pure Ethylidenelactic acid and experiments on Distillation in a Vacuum . . . . . i, 236

ZELINSKY (NICOLAI D.). Researches in the Hexamethylene Series, V. The Isomerisation of Hexamethylene . . . . . i, 237

JACKSON (CHARLES LORING) and MARTIN H. ITTNER. Parabromometadinitrotoluene and some of its Derivatives . . . . . i, 237

SCHOBER (WILLIAM B.). Action of Sulphuric acid on Anisoil . . . . i, 239

LIEBMANN (LOUIS). Electrolysis of Quinol . . . . . i, 239

SECRÉTANT (HONORÉ). Phosphates of Diatomic Phenols . . . . . i, 239

GENVRESSE (E.). Aromatic Bisulphides . . . . . i, 240

HANTZSCH (ARTHUR RUDOLF). Normal Diazo-compounds . . . . . i, 240

WEDEKIND (EDGAR). Behaviour of Aromatic Diazo-chlorides towards benzylidineamidoguanidine . . . . . i, 241

BAMBERGER (EUGEN). Acidyl-nitrosamines . . . . . i, 241

BAMBERGER (EUGEN) and ALEXANDER MEYENBERG. Potassium Phenylhydrazinedisulphonate . . . . . i, 242

WALTHER (REINHOLD). Isomeric Amidines . . . . . i, 242

BRADLEY (WALTER PARKE) and F. KNIFFEN. Paraisobutylphenoxyacetic acid . . . . . i, 243

WHEELER (HENRY LORD). Non-existence of two Orthophthalic acids . i, 243

REMSEN (IRA). Two Isomeric Chlorides of Orthosulphobenzoic acid . i, 243

REMSEN (IRA) and S. R. MCKEE. Purification of the Chlorides of Orthosulphobenzoic acid and the action of various reagents on them . . i, 243

REMSEN (IRA) and J. R. HUNTER. Relations of the Anilides of Orthosulphobenzoic acid . . . . . i, 244

REMSEN (IRA) and W. J. KARSLAKE. Orthocyanobenzenesulphonic acid . i, 244

VOSWINKEL (ARNOLD). Benzoylcarbinol . . . . . i, 245

URBAIN (G.). Schiff's Reaction for Aldehydes . . . . . i, 245

KAUFMANN (VICTOR). Diphthalylethylene: an analogue of Indigo in the Indene series . . . . . i, 245

REYCHLER (ALBERT). Terpenes . . . . . i, 246

WALLACH (OTTO). The Thugone Series . . . . . i, 246

TIEMANN (FERDINAND) and FRIEDRICH W. SEMMLER. Tanacetoketonic acid (Thujaketonic acid) . . . . . i, 247

PAGE

REYCHLER (ALBERT). Geranyl chloride . . . . . i, 248
BECKMANN (ERNST OTTO). The Camphor Series, VI. Menthol, and the reduction of Menthone . . . . . i, 248
BECKMANN (ERNST OTTO). The Camphor Series, VII. Borneol, and the reduction of Camphor . . . . . i, 249
TIEMANN (JOHANN CARL WILHELM FERDINAND). Camphor, III. and IV. i, 249
TIEMANN (JOHANN CARL WILHELM FERDINAND). Campholene . . . i, 252
BALBIANO (LUIGI). Products of Oxidation of Camphoric Acid . . . i, 253
RIMBACH (EBERHARD). Occurrence of Pine-resin Acids . . . . . i, 254
HERZIG (JOSEF) and F. SCHIFF. Guaiacum Resin . . . . . i, 254
GADAMAR (J.). Glucosides of black and white Mustards . . . . i, 254
HESSE (OSWALD). Compounds from Lichens . . . . . i, 255
FISCHER (OTTO) and EDUARD HEPP. Relations of the Azonium Bases to the Safranines . . . . . i, 257
ANSCHÜTZ (RICHARD). Constitution of Tartrazine . . . . . i, 258
BAMBERGER (EUGEN) and ALFRED EINHORN. Bases in Fusel Oil . . i, 259
FISCHER (EMIL) and OTTO BROMBERG. Caffeidinecarboxylic Acid . . i, 259
VONGERICHTEN (EDUARD). Methyl-ψ-morphine, and its relation to ψ-morphine and morphine . . . . . i, 260

PART II.

General and Physical Chemistry.

TAMMANN (GUSTAV). Change of the Refractive Index by the Neutralisation, the Formation, and the Dilution of Solutions . . . . . ii, 197
TRAUBE (ISIDOR). Atomic Refractions of Carbon, Hydrogen, Oxygen, and the Halogens . . . . . ii, 197
TRAUBE (ISIDOR). Atomic Refractions of Nitrogen . . . . . ii, 197
BRÜHL (JULIUS WILHELM). Spectrometric Determinations . . . . . ii, 198
BRÜHL (JULIUS WILHELM). Hydrazine, Hydrogen Peroxide, Water . . ii, 198
GUYE (PHILIPPE A.) and P. A. MELIKIAN. Normal Rotatory Dispersions . ii, 198
TROWBRIDGE (JOHN) and THEODORE WILLIAM RICHARDS. Spectra of Argon . . . . . ii, 199
TROWBRIDGE (JOHN) and THEODORE WILLIAM RICHARDS. Multiple Spectra of Gases . . . . . ii, 199
WIEDEBURG (OTTO). Potential Differences between Metals and Electrolytes ii, 200
SOKOLOFF (ALEXEI P.). Experimental Investigations on the Electrolysis of Water . . . . . ii, 200
CARRARA (GIACOMO). Electrolytic Behaviour of Solutions of some Salts and Acids in Methylic Alcohol . . . . . ii, 200
BERTHELOT (MARCELLIN PIERRE EUGENE). Specific Heat of gaseous Elements and their Atomic Constitution . . . . . ii, 200
DEMERLIAC (R.). Variation of Melting Points with the Pressure . . ii, 201
BERTHELOT (MARCELLIN PIERRE EUGENE). Thermochemical Method for the Determination of the Equivalents of Acids and Bases . . . . ii, 201
BERTHELOT (MARCELLIN PIERRE EUGENE). Thermochemical Relations between the Different Modifications of Ordinary Glucose . . . . ii, 202
REINGANUM (MAX). Pressure Differences produced by Isothermal Distillation . . . . . ii, 202
MÜLLER-ERZBACH (WILHELM). Vapour Pressure of Compounds of Calcium Chloride with Water . . . . . ii, 203
NOYES (ARTHUR AMOS) and H. M. GOODWIN. Internal Friction of Mercury Vapour . . . . . ii, 203
LE CHATELIER (HENRI LOUIS). Some Peculiarities of Solubility Curves . ii, 203
WOHL (ALFRED). Law of Contraction on dissolving Sugar in Water . . ii, 204

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

LXI.—Explosion of Chlorine Peroxide with Carbonic Oxide. By Harold Baily Dixon, M.A., F.R.S., and Edward John Russell, B.Sc. 605

LXII.—Hydrolysis of Perthiocyanic Acid. By F. D. Chattaway, M.A., Christ Church, and H. P. Stevens, B.A., St. John's College, Oxford 607

LXIII.—Monochlorodiparaconic Acid. By Henry C. Myers . 614

LXIV.—Halogen-substituted Acidic Thiocarbimides, and their Derivatives; a Contribution to the Chemistry of the Thiohydantoins. By Augustus Edward Dixon, M.D. . 617

LXV.—On the Circumstances which Affect the Rate of Solution of Zinc in Dilute Acids, with Especial Reference to the Influence of Dissolved Metallic Salts. By John Ball, Ph.D., A.R.S.M. 641

LXVI.—The Composition of Cooked Fish. By Miss Katharine I. Williams, Associate of University College, Bristol . 649

LXVII.—Oxidation Products of $\alpha\gamma$-Dimethyl-α'-chloropyridine. By Miss Emily Aston, B.Sc., and J. Norman Collie, Ph.D., F.R.S. 653

LXVIII.—Corydaline. Part V. By James Johnston Dobbie, M.A., D.Sc., and Fred. Marsden, Ph.D., M.Sc. . . . 657

LXIX.—The Reactions between Lead and the Oxides of Sulphur. By Henry C. Jenkins and Ernest A. Smith, Metallurgical Department, Royal College of Science, London . . . 666

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

Part I.

Organic Chemistry.

Kerp (Wilhelm). Conversion of Nitrites into Cyanides . . . . i, 261

Noyes (Arthur Amos) and C. W. Tucker. Formation of Diacetenyl (Butadiine) from Copper Acetylene . . . . . i, 261

Schramm (Max). Action of Hydrogen Bromide on Methylbutallylcarbinol i, 261

Stoehr (Carl). Cyclic Ethers from Polyatomic Phenols . . . . i, 262

Suringar (H.) and Bernhard Tollens. Amount of Pentosan in Cotton Wool . . . . . i, 263

PAGE

SCHREFELD. Solubility of Cane-sugar in Dilute Alcohol . . . . . i, 263
PARTHEIL (ALFRED) and H. VON BROICH. Brominated Bases of the Fatty Series . . . . . i, 263
DEGNER (OTTO) and HANS VON PECHMANN. Behaviour of Diazomethane towards Nitramines . . . . . i, 264
VAILLANT (VICTOR). Metallic Derivatives of Dithioacetylacetone . . i, 265
RICHARDSON (GEORGE M.) and PIERRE ALLAIRE. Specific Gravities of Aqueous Solutions of Formic acid . . . . . i, 266
MARIE (THEOD.). Oxidation of the acids derived from Fats . . . . . i, 266
MARIE (THEOD.). Chlorides, Amides, and Nitriles of Cerotic and Melissic acids . . . . . i, 266
PAULY (HERMANN). Condensation of Acetone with Ethylic Acetoacetate i, 266
KERP (WILHELM). Substituted Amido-acids and Imides of the Asymmetric Dimethylsuccinic acids . . . . . i, 267
BISCHOFF (CARL ADAM). Formation of Carbon Chains. XIII. Diethyldisulphonemethane and Ethylic Diethoxymalonate . . . . . i, 267
FISCHER (EMIL). Constitution of Caffeine, Xanthine, Hypoxanthine, and Allied Bases . . . . . i, 267
FISCHER (EMIL). New Synthesis of Uric acid, Hydroxycaffeine and Amidodioxypurine . . . . . i, 268
KERP (WILHELM) and KARL UNGER. Substituted Amides of Oxalic acid . . . . . i, 269
KERP (WILHELM) and KARL UNGER. Semioxamazide . . . . . i, 270
CALLENBACH (JOHANN ANTON). Hagemann's Ethylic Methylcyclohexenonecarboxylates and their conversion into an Isomeride of Camphor . . i, 271
KASTLE (J. H.) and W. A. BEATTY. Effect of Light on the Displacement of Bromine and Iodine from Organic Bromides and Iodides . . . i, 272
JACKSON (CHARLES LORING) and H. A. TORREY. Oxide of Dichlorodimethoxyquinol Dibenzoate . . . . . i, 272
VORLÄNDER (DANIEL). Synthesis of Hydrogenised Derivatives of Resorcinol . . . . . i, 272
VORLÄNDER (DANIEL). Synthesis and Hydrolysis of Dihydroresorcinol . i, 272
VORLÄNDER (DANIEL). Alkyldihydroresorcylic acids . . . . . i, 272
VORLÄNDER (DANIEL) and JOH. ERIG. Alkyldihydroresorcinols . . . i, 275
HODUREK (O.). Constitution of Bromophenacetin . . . . . i, 276
KUNCKELL (FRANZ). Phenacyl compounds . . . . . i, 276
NIETZKI (RUDOLF) and HANS HAGENBACH. Reduction of Picramide. Unsymmetrical Tetramidobenzene. . . . . i, 277
HANTZSCH (ARTHUR RUDOLF). Behaviour of Isomeric Diazoacetates towards Benzoic Chloride . . . . . i, 278
GOLDSCHMIDT (HEINRICH) and AUGUST MERZ. Dynamical Researches on the Formation of Azo-dyes . . . . . i, 278
KJELLIN (CARL) and K. G. KUYLENSTJERNA. β-Orthonitrobenzylhydroxylamine . . . . . i, 279
KNIGHT (N.). Constitution of Benzanilide . . . . . i, 279
WHEELER (HENRY LORD) and PERCY T. WALDEN. Action of acid Chlorides on the Imido-ethers and Isoanilides: Structure of the Silver Salts of the Anilides . . . . . i, 280
MEULEN (P. HOJONIDES VAN DER). Isoimides . . . . . i, 281
KUNCKELL (FRANZ). Halogenised Ketones . . . . . i, 282
JORISSEN (W. P.). Formation of Benzoic and Propionic Peroxides by Active Oxygen . . . . . i, 282
BUCHNER (EDUARD). Pseudophenylacetic acid . . . . . i, 282
KYM (C.). Paranitrophenoxyacetic and Paramidophenoxyacetic acids and their Derivatives . . . . . i, 283
HOWARD (CURTIS C.). Paramidophenoxyacetic acid . . . . . i, 283
LIEBERMANN (CARL THEODOR). Tautomerism of Orthoaldehydic acids. III. . . . . i, 284
VORLÄNDER (DANIEL) and ARTHUR KNÖTZSCH [and in part KARL HOBOHM]. δ-Ketonic acids . . . . . i, 285

PAGE

BAMBERGER (EUGEN) and C. HINDERMANN. Molecular rearrangement of Phenylsulphonamic acid . . . . . i, 286
ERDMANN (ERNST) and HUGO ERDMANN. Constitution of "Patent-blue" . i, 286
BAMBERGER (EUGEN). Action of Nitrogen Oxides on Mercurydiphenyl and on Nitrosobenzene . . . . . i, 288
ASCHAN (OSSIAN). Zinc Dust in the presence of Acetic acid as an Oxidising Agent . . . . . i, 288
BIÉTRIX (ALEXANDRE). Action of Nitrosodimethylaniline on certain Bromoderivatives of Gallic acid . . . . . i, 289
BAMBERGER (EUGEN). Action of Alphylhydrazines on β-Naphthaquinone i, 289
HOOPER (DAVID). Camphor Leaf Oil . . . . . i, 289
MANASSE (OTTO). Hydroxycamphor . . . . . i, 290
CIAMICIAN (GIACOMO LUIGI) and PAUL G. SILBER. High Boiling Point Constituents of Oil of Celery . . . . . i, 291
CIAMICIAN (GIACOMO LUIGI) and PAUL G. SILBER. Products of Decomposition of Sedanonic acid . . . . . i, 292
HERZIG, JOSEF. Luteolin . . . . . i, 292
LIEBERMANN (CARL THEODOR) and HUGO VOSWINCKEL. Cochineal dye . i, 292
SCHIFF (ROBERT) and C. BERTINI. Synthesis of Ethereal Salts of substituted Diketodihydropyrrolinecarboxylic Acids by means of Ethylic Oxalacetate and Aldehydoamido bases . . . . . i, 293
HARRIES (CARL D.). Stereochemical researches in the Piperidine series . i, 293
AHRENS (FELIX B.). Syntheses in the Piperidine series . . . . . i, 296
CLAUS (ADOLPH) and WILHELM GÜNTHER. Tetrahydroquinoline-1-sulphonic acid . . . . . i, 296
PATEIN (GUSTAVE). Constitution of the compounds of Antipyrine with Phenols . . . . . i, 297
WALTHER (REINHOLD). Dinitrilophenylhydrazones and the products of their Intramolecular change . . . . . i, 297
MARCOURT (E.). A condensation product of Formaldehyde with Antipyrine i, 298
AHRENS (FELIX B.) and GEORG MEISSNER. Dimethylpyrazine . . . . i, 298
STOEHR (CARL) [and in part P. BRANDES and W. DETERT]. Pyrazines and Piperazines. VII. . . . . i, 298
BUSCH (MAX) and ALBERT RAST. Cinnoline . . . . . i, 300
FORTMANN (G.). Methylanthranilic acid and some Quinazoline-derivatives i, 301
OSTROGOVICH (ADRIANO). Imidomethyloxytriazine . . . . . i, 301

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

LXIX.—The Reactions between Lead and the Oxides of Sulphur. By HENRY C. JENKINS and ERNEST A. SMITH, Metallurgical Department, Royal College of Science, London. (*Continued.*) 669

LXX.—The Action of Bromodiphenylmethane on Ethylic Sodioacetoacetate. By GEORGE GERALD HENDERSON, D.Sc., M.A., and MATTHEW ARCHIBALD PARKER, B.Sc. 676

LXXI.—Some New Gold Salts of Hyoscine, Hyoscyamine, and Atropine. By HOOPER ALBERT DICKINSON JOWETT, D.Sc. 679

Pasteur Memorial Lecture. By PERCY FRANKLAND, Ph.D., B.Sc., F.R.S., Professor of Chemistry in Mason College, Birmingham 683

LXXII.—Dalton's Law in Solutions (Molecular Depression of Mixtures of Two Non-electrolytes). By MEYER WILDERMAN, Ph.D. 743

LXXIII.—Thermal Phenomena attending the Change in Rotatory Power of freshly prepared Solutions of certain Carbohydrates, with some Remarks on the Cause of Multirotation. By HORACE T. BROWN, F.R.S., and SPENCER U. PICKERING, F.R.S. 756

LXXIV.—Thermo-chemistry of Carbohydrate Hydrolysis. By HORACE T. BROWN, F.R.S., and SPENCER U. PICKERING, F.R.S. 783

LXXV.—Experimental Verification of Van't Hoff's Constant in very Dilute Solution (Law of Molecular Depression). By MEYER WILDERMAN, Ph.D. 796

LXXVI.—Apiin and Apigenin. By ARTHUR GEORGE PERKIN, F.R.S.E. 805

LXXVII.—Rhamnazin. By ARTHUR G. PERKIN, F.R.S.E., and H. W. MARTIN 818

LXXVIII.—The Molecular Refraction of Dissolved Salts and Acids. Part II. By DR. JOHN HALL GLADSTONE, F.R.S., and WALTER HIBBERT, F.I.C. 822

LXXIX.—Reduction of Perthiocyanic Acid. By F. D. CHATTAWAY, M.A., Christ Church, and H. P. STEVENS, B.A., St. John's College, Oxford 833

LXXX.—Production of some Nitro- and Amido-hydroxypicolines. By A. LAPWORTH, D.Sc., and J. NORMAN COLLIE, Ph.D., F.R.S. 838

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

	PAGE
SABATIER (PAUL) and JEAN BAPISTE SENDERENS. Action of Nickel on Ethylene	i, 305
HABER (FRITZ) [and in part H. SAMOYLOWICZ]. Decomposition of Hexane and Trimethylethylene by Heat	i, 305
SCHINDELMEISER (IWAN ROBERT). Derivatives of Diamylene and of Isodibutylene	i, 308
SÖDERBAUM (HENRIK GUSTAV). Action of Acetylene on Cupric Salts	i, 309
SZARVASY (EMERICH). Magnesium Methoxide	i, 309
HOFMANN (KARL A.) and W. O. RABE. Reaction of Mercaptides with Alkylic Iodides	i, 310
CAVALIER (JACQUES). Allylic Phosphates	i, 310
SUBASCHOW (EUNM). Separation of Galactose and Arabinose	i, 311
PETIT (PAUL). Carbohydrates in Beer	i, 311
ROUVIER (GASTON). Action of Iodine on Starch	i, 312
PRIOR (EUGEN). A third Diastase-achroodextrin and the Isomaltoses	i, 312
AHRENS (FELIX B.). Electrolytic Conversion of Nitriles into Amines	i, 313
GABRIEL (SIEGMUND) and GEORG ESCHENBACH. Dibromodiethylamine	i, 313
KNORR (LUDWIG). Amidoethylic Alcohol (1 : 2-Ethanolamine)	i, 313
KNORR (LUDWIG). Diethanolamine [Dihydroxydiethylamine]	i, 314
KNORR (LUDWIG). Triethanolamine [Trihydroxytriethylamine]	i, 314
COLSON (ALBERT). Action of Free Bases on Salts	i. 314
JEFFREYS (ELIZABETH). Preparation of Higher Amines of the Fatty Series: Pentadecylamine	i, 315
HARTMANN (HILDERICH). Action of Trimethylamine and Pyridine on Chlorhydrins	i, 315
RAIKOW (P. N.). Condensation of Acetone on Boiling with Excess of Zinc Chloride	i, 316
FILETI (MICHELE) and GIACOMO PONZIO. Conversion of Ketones into α-Diketones	i, 317
SCHALL (JOH. FRIEDRICH CARL). Electrolysis of Salts of Organic acids	i, 317
EPSTEIN (BOLESLAS). Action of Bromine and Hydrogen Bromide on Ethylic Acetate	i, 317
FRIEDEL (CHARLES). Fatty Substances found in Egyptian Tombs at Abydos	i, 318
MARIE (THEOD.). Formulæ of Cerctic and Melissic acids	i, 318
MARIE (THEOD.). Bromo-derivatives of Cerotic and Melissic acids	i, 319
MARIE (THEOD.). Comparison of the derivatives of Cerotic and Melissic acids with those of the Fatty acids	i, 320
GRASSI-CRISTALDI (GIUSEPPE). Decomposition of Ethoxalic Chloride [Ethylic Chloroglyoxylate] with elimination of Carbonic Oxide	i, 320
MARIE (THEOD.). Hydroxy- and Amido-derivatives of Cerotic and Melissic acids	i, 320
CONRAD (MAX) [and in part ANTON KREICHGAUER and RUPPERT]. Derivatives of Methylic Bromodimethylacetoacetate	i, 321
BERTHELOT (MARCELLIN) and GUSTAVE ANDRÉ. Transformations of Sugars: Levulinic acid	i, 322
CONRAD (MAX). Synthesis of α-Dimethyl-levulinic acid	i, 323
BLAISE (EDMOND). Action of Potassium Cyanide on 1 : 4-Olides [Lactones]	i, 323
MARIE (THEOD.). Cyanide and a Dibasic acid and its Amide, derived from Cerotic acid	i, 323
WINTHER (CHR.). Optical behaviour of Malic acid	i, 324
EMERY (WILLIAM ORREN). Ketocarboxylic acids: Acetylglutaric acid	i, 325

PAGE

BERTRAND (GABRIEL). Lyxonic acid and Lyxitol . . . . . i, 326

LACHMANN (ARTHUR). Cryoscopic determination of the constitution of Amides . . . . . i, 326

ANDREASCH (RUDOLF). Thiohydantoins. IV. . . . . i, 327

RUSPAGGIARI (G.). Mercurocarbamide and its Salts . . . . . i, 328

ALVISI (UGO). Triethylsulphine Metaluminate . . . . . i, 329

MARKOWNIKOFF (WLADIMIR B.). Some New Constituents of Caucasian Naphtha . . . . . i, 329

VAUBEL (WILHELM). The Benzene Nucleus . . . . . i, 330

BERTHELOT (MARCELLIN). Absorption of Nitrogen by Carbon compounds under the influence of the Silent Electric Discharge . . . . . i, 330

LÖB (WALTHER). Electrolytic Reduction of Aromatic Nitro-compounds . i, 331

ELBS (KARL). Electrolytic Oxidation of Paranitrotoluene . . . . . i, 332

JACKSON (CHARLES LORING) and MARTIN H. ITTNER. Coloured compounds obtained from Sodium Ethoxide and Aromatic Nitro-compounds . . i, 332

LACHMANN (ARTHUR). Action of Zinc Ethyl on Phenylic Iododichloride . i, 333

HAEUSSERMANN (CARL) and EUGEN BAUER. Derivatives of Phenylic Ether . . . . . i, 333

CAZENEUVE (PAUL). Some derivatives of Dinitro-orthocresol . . . i, 334

URBAN (LEO C.). Halogen derivatives of Thymol and Carvacrol . . i, 334

AUWERS (KARL). Constitution of Dibromo-ψ-cumenol Bromide and similar compounds . . . . . i, 335

AUWERS (KARL). Action of Bromine on Phenol-alcohols . . . . . i, 336

AUWERS (KARL). A Class of Remarkable Nitration Products of the Phenols . . . . . i, 336

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

LXXX.—Production of some Nitro- and Amido-hydroxypicolines. By A. Lapworth, D.Sc., and J. Norman Collie, Ph.D., F.R.S. (*Continued*) 845

LXXXI.—Connection between the Crystallographical Characters of Isomorphous Salts and the Atomic Weight of the Metals contained. A Comparative Crystallographical Study of the Normal Selenates of Potassium, Rubidium, and Cæsium. By Alfred Edwin Tutton, Assoc. R.C.S. . . . 846

LXXXII.—The so-called Hydrates of Isopropylic Alcohol. By Thos. Edward Thorpe, LL.D., F.R.S. 920

LXXXIII.—The Theory of Osmotic Pressure and the Hypothesis of Electrolytic Dissociation. By Holland Crompton 925

LXXXIV.—Molecular Rotations of Optically Active Salts. By Holland Crompton 946

LXXXV.—Heats of Neutralisation of Acids and Bases in Dilute Aqueous Solution. By Holland Crompton . . . 951

LXXXVI.—Optical Inversion of Camphor. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope . . 956

LXXXVII.—Derivatives of Camphoric Acid. Part II. Optically Inactive Derivatives. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope 962

LXXXVIII.—Racemism and Pseudoracemism. By Frederic Stanley Kipping, Ph.D., D.Sc., and William Jackson Pope 989

LXXXIX.—The Carbohydrates of the Cereal Straws. By C. F. Cross, E. J. Bevan, and Claude Smith 1001

XC.—On the Properties of Nitrobenzene. By Richard J. Friswell 1010

XCI.—A Space Formula for Benzene. By J. Norman Collie, Ph.D., F.R.S. 1013

XCII.—The Isomeric Dibromethylenes. By Thomas Gray, B.Sc. 1023

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

PAGE

MABERY (CHARLES FREDERIC) and EDWARD J. HUDSON. Butanes and Octanes in American Petroleum . . . . . i, 389

BILTZ (HEINRICH) [with STEPHAN WERNER]. Di-iodacetylene and Tetriodethylene . . . . . i, 389

MATIGNON (CAMILLE). Sodium Carbide and Monosodacetylene . . . i, 390

LANCE (DENIS). Ammonium Cyanide and its Manufacture . . . . . i, 390

JACKSON (CHARLES LORING) and ARTHUR MESSINGER COMEY. Hydrocobaltocobalticyanic acid and its Salts . . . . . i, 390

FONZES-DIACON. Action of Mercuric Chloride on Alcohols . . . . i, 391

MICHAELIS (CARL ARNOLD AUGUST) and THEODOR BECKER. Constitution of Phosphorous acid . . . . . i, 391

TANRET (CHARLES). Molecular Modifications and Multirotation of the Sugars . . . . . i, 391

KÜNNMANN (O.) and ALBERT HILGER. Chemistry of Honey . . . . i, 392

DELÉPINE (MARCEL). Preparation of Primary Amines . . . . . i, 394

GABRIEL (SIEGMUND) and GEORG ESCHENBACH. Preparation of Allylamine i, 395

MICHAELIS (AUGUST) and PAUL GRAENTZ. Thionyl derivatives of the Aliphatic Diamines . . . . . i, 395

FIREMAN (PETER). Action of Ethers on Phosphonium Iodide . . . . i, 395

KOHN (LEOPOLD). Condensation products of Isovaleraldehyde. II. . . i, 396

BERTRAND (JOSEPH). Fatty Ketones of High Molecular Weight . . . i, 396

DAVID. Conversion of Oleic acid into Stearolactone and Hydroxystearic acid . . . . . i, 396

SCHÖTTLER (A.). Hazel nut Oil . . . . . i, 397

WISLICENUS (WILHELM) and WALTER BECKH. Action of Ammonia and Amines on Ethylic Oxalacetate . . . . . i, 397

MJÖEN (J. ALFRED). Polymethacrylic acid . . . . . i, 399

ESCHWEILER (WILHELM). Constitution of the acid Amides . . . . i, 399

HANTZSCH (ARTHUR RUDOLF). Acidyl Amides . . . . . i, 399

OECHSNER DE CONINCK (WILLIAM). A Higher Homologue of Carbamide . i, 400

MARKOWNIKOFF (WLADIMIR B.). Remarks on Zelinsky's "Researches in the Hexamethylene Series" . . . . . i, 400

MARKOWNIKOFF (WALDIMIR B.) [and in part H. KARPOWITSCH, RETZOFF and KRASCHENINNIKOFF]. Action of Hydriodic acid on some Cyclic Compounds at a high temperature . . . . . i, 401

MARKOWNIKOFF (WALDIMIR B.) [and in part MICHAIL I. KONOWALOFF and MILLER]. Methylcyclopentanes of different Origin and some of their derivatives . . . . . i, 401

HEUSLER (FRIEDRICH). Removal of Thiophen from Benzene by means of Aluminium Chloride . . . . . i, 402

TAYLOR (S. F.). Mass Law Studies. I. [Solubility of Benzene in Aqueous Alcohol] . . . . . i, 402

HAYWOOD (J. K.). Sulphur and Toluene . . . . . i, 402

JANNASCH (PAUL) and W. HEUBACH. Action of Sodium on Dibromomesitylene . . . . . i, 403

GRINDLEY (HARRY SANDS) and J. L. SAMMIS. Action of Mercaptides on Quinone . . . . . i, 403

GRIMAUX (EDOUARD). Anethoil . . . . . i, 403

MOUREU (CHARLES) and A. CHAUVET. Anethoil and two of its Homologues i, 403

HENRICH (FR.). Two Modifications of Nitroso-orcinol [Oximido-orcinol] . i, 404

PAGE

VOTOČEK (EMIL). Condensation of Methylfurfuraldehyde with Phloroglucinol . . . . . i, 405
LUTTER (EDUARD). Metanitrobenzyl derivatives . . . . . i, 406
CLOËZ (CH.). Cholesterol . . . . . i, 406
PAAL (CARL) and BR. HILDENBRAND. Carbamide Derivatives of Orthamidobenzylamine . . . . . i, 407
HIRSCH (BENNO). Halogenated Diazonium Chlorides . . . . . i, 407
HANTSCH (ARTHUR RUDOLF). Acid Diazonium Chlorides . . . . . i, 408
CAUSSE (HENRI EUGÈNE). Two Isomeric Triethylidenediphenylhydrazines . . . . . i, 408
RUPE (HANS) and JOH. VŠETEČKA. Unsymmetrical Phenylhydrazine derivatives . . . . . i, 409
ARNOLD (AUGUST). The Ketonehydrazones of Aromatic Hydrazines . . i, 409
HOLLEMAN (ARNOLD FREDERIK). Phenylnitromethane [exo-Nitrotoluene] i, 409
SWARTZ (S. E.). Action of Sodium Ethoxide on Bromamides . . . i, 410
REMSEN (IRA). Hydrolysis of Acid Amides ... . i, 412
PIUTTI (ARNALDO). Orthobromoparethoxyphenylsuccinimide . . . i, 412
GNEHM (ROBERT) and EMIL BÄNZIGER. 2 : 5-Dichlorobenzaldehyde . i, 413
BLAU (FRITZ). Salicylaldehyde . . . . . i, 413
RIVALS (PAUL). Some derivatives of Salicylaldehyde . . . . . i, 413
GABRIEL (SIEGMUND) and GEORGE ESCHENBACH. Derivatives of Acetophenone . . . . . i, 414
MEULEN (P. HOJONIDES VAN DER). Action of Alcohols on Isoimides . i, 414
KOWALSKI (M.) and STEFAN VON NIEMENTOWSKI. Amidines of the Anthranilic acids . . . . . i, 416
RUPE (HANS). Anthranilic acid derivatives . . . . . i, 416
WISCHO (FRITZ). Melilotol . . . . . i, 417
REISSERT (ARNOLD). Action of Ethylic Oxalate and Sodium Ethoxide on Nitrotoluenes: Synthesis of Nitrated Phenylpyruvic acids . . . i, 417
KLOBB (CONSTANT TIMOTHÉE). Homologues of α-Cyano-β-benzoylpropionic acid . . . . . i, 419
BIÉTRIX (ALEXANDRE). Action of Phenylhydrazine on Gallic acid and on Dibromogallic acid . . . . . i, 419
SALZER (THEODOR). Norhemipinates, and the Author's Water of Crystallisation Theory . . . . . i, 420
BRETSCHNEIDER (W.). Action of Sulphurous Anhydride on Aromatic Hydroxylamines . . . . . i, 420
KIPPENBERG (HEINRICH). Some Aromatic Amido-alcohols and their derivatives . . . . . i, 421
MCCOY (HERBERT N.). Action of Aluminium Chloride on the Chlorides of Dicarbodiphenylimide . . . . . i, 422
VOLHARD (JAKOB). Ethylic Diphenylacetoacetate . . . . . i, 422
PRUD'HOMME (MAURICE). Oxidation of the Rosanilines by Lead Dioxide . i, 424
FRIEDLÄNDER (PAUL) and JULIUS NEUDÖRFER. Flavone derivatives. V. Ketocoumaran and some of its Condensation Products . . . . . i, 424
KOSTANECKI (STANISLAUS VON). 3′ : 4′-Dihydroxybenzylideneindanedione . i, 425
WALLACH (OTTO). Condensation Products of Cyclic Ketones. III. . . i, 425
ORNDORFF (WILLIAM RIDGELY) and C. B. MOYER. Naphthalene Tetrabromide . . . . . i, 426
NIETZKI (RUDOLF) and TH. KNAPP. Derivatives of Dihydroxynaphthalene i, 426
GRAEBE (CARL) and SIEGFRIED BLUMENFELD. Derivatives of Anthracene and of Anthraquinone . . . . . i, 427
WALLACH (OTTO). Terpenes and Ethereal Oils . . . . . i, 427
BRAUN (R.). Oil of *Levisticum officinale* . . . . . i, 428
DUPONT (JUSTIN) and JACQUES GUERLAIN. French Oil of Basil . . i, 429
ODDO (GIUSEPPE). ββ-Dicamphor . . . . . i, 430
SCHLAGDENHAUFFEN (FREDERIC) and E. REEB. Coronilla and Coronillin i, 433
WISCHO (FRITZ). Rutin . . . . . i, 433

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

XCII.—The Isomeric Dibromethylenes. By THOMAS GRAY, B.Sc. (*Continued*) 1029

XCIII.—Camphoroxime. Part II. The Ethers of Camphoroxime. By MARTIN ONSLOW FORSTER, Ph.D. 1030

XCIV.—The Action of Nitrogen Trioxide and Tetroxide on Alcohols. Part I. By JULIUS BEREND COHEN, Ph.D., and HARRY THORNTON CALVERT, B.Sc., The Yorkshire College . 1050

XCV.—The Action of Nitrogen Tetroxide on Ortho- and Para-nitrobenzylic Alcohols. By JULIUS BEREND COHEN, Ph.D., and WILLIAM HUDSON HARRISON, B.Sc., The Yorkshire College 1057

XCVI.—The Action of Aromatic Amines on Diacetyltartaric Anhydride. By JULIUS BEREND COHEN, Ph.D., and WILLIAM HUDSON HARRISON, B.Sc., The Yorkshire College . . 1060

XCVII.—Interaction of Ethylenic Chloride, Ethylic Malonate, and Sodium Ethoxide. By BEVAN LEAN, D.Sc., B.A., and FREDERIC H. LEES 1062

XCVIII.—Studies on Citrazinic Acid. Part V. By WILLIAM JAMES SELL, M.A., F.I.C., and FREDERICK WILLIAM DOOTSON, B.A. 1068

XCIX.—The Condensation of Chloral with Resorcinol. (Second Communication.) By JOHN THEODORE HEWITT, M.A., D.Sc., Ph.D., and FRANK G. POPE 1084

C.—On β-Oxycellulose. By BENJAMIN SAMUEL BULL, M.A., B.Sc., Ph.D., A.I.C. 1090

CI.—On the Action of Sodium Hyponitrite on Mercuric Solutions. By PRAFULLA CHANDRA RÂY, D.Sc. (Edin.), Professor of Chemistry, Presidency College, Calcutta . . 1097

CII.—On a New Method of Preparing Mercuric Hyponitrite. By PRAFULLA CHANDRA RÂY, D.Sc. (Edin.), Professor of Chemistry, Presidency College, Calcutta 1105

CIII.—A New Synthesis of Phloroglucinol. By DAVID SMILES JERDAN, B.Sc. 1106

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

CONTENTS.

PAPERS READ BEFORE THE CHEMICAL SOCIETY.

PAGE

CIII.—A New Synthesis of Phloroglucinol. By DAVID SMILES JERDAN, B.Sc. (*Continued*) 1113

CIV.—Phenanthrone. By FRANCIS R. JAPP, F.R.S., and ALEXANDER FINDLAY, M.A., B.Sc. 1115

CV.—The Crystalline Structure of Gold and Platinum Nuggets and Gold Ingots. By A. LIVERSIDGE, LL.D., F.R.S. . . 1125

CVI.—The Yellow Colouring Principles of various Tannin Matters. By A. G. PERKIN, F.R.S.E. 1131

ABSTRACTS OF PAPERS PUBLISHED IN OTHER JOURNALS:—

PART I.

Organic Chemistry.

PAGE

BERTHELOT (MARCELLIN P. E.) and PAUL VIEILLE. Acetylene Solutions and their Explosive Properties . . . . . i, 501

BERTHELOT (MARCELLIN P. E.) and PAUL VIEILLE. Propagation of Decomposition in Pure Acetylene Solutions . . . . . i, 502

ARTH (GEORGES). Action of Acetylene on Silver Nitrate . . . . i, 503

PRUNIER (L. LÉON A.). Preparation of Ether . . . . . i, 503

PRUNIER (L. LÉON A.). Formation of Sulphonic derivatives in the preparation of Ether . . . . . i, 504

DELÉPINE (MARCEL). Action of Potash on Formaldehyde . . . . i, 504

DELÉPINE (MARCEL). Trioxymethylene and Paraformaldehyde . . . i, 505

DELÉPINE (MARCEL). Action of Water on Formaldehyde as related to the *rôle* of this substance in Plants . . . . . i, 505

MASSOL (GUSTAVE). Magnesium Malonate . . . . . i, 505

MASSOL (GUSTAVE). Zinc Malonate . . . . . i, 506

KENRICK (FRANK B.). Racemic Transformation of Acid Ammonium Malate i. 506

FREUNDLER (PAUL). Preparation of Furfuran . . . . . i, 506

ZINCKE (E. C. THEODORE). Action of Chlorine on Orthamidophenols and Orthodiamines . . . . . i, 507

ZINCKE (E. C. THEODORE), F. BERGMANN, and BRUNO FRANCKE. Action of Chlorine on Orthamidoparacresol and Orthotolylenediamine: 1-Methylpentachloro-3 : 4-diketo-R-hexene, and its Products of Change . . i, 507

PAGE

ZINCKE (E. C. THEODORE) and WILHELM PRENNTZELL. Action of Chlorine on Trichlororthodiamidotoluene : 1-Methyl-2 : 3-diketopentachloro-R-hexene and its Products of Change . . . . . i, 509

ZINCKE (E. C. THEODORE) and BRUNO FRANCKE. Action of Chlorine on Metamido-orthohydroxymetaxylene and orthodiamidometaxylene : 1 : 3-Dimethyl-4 : 5-diketotetrachloro-R-hexene and its Products of Change i, 511

ZINCKE (E. C. THEODORE) and FRANZ HODES. Action of Chlorine on Orthodiamido-ψ-cumene . . . . . i, 512

VORLÄNDER (DANIEL) and FRITZ KALKOW. Hydrogenation of Orcinol . i, 513

HALLER (ALBIN) and EDMOND MICHEL. Purification of Hydrocarbons from Thiophen, its Homologues, and other Impurities by means of Aluminium Chloride : Purification of Benzene and Toluene . . . i, 513

BIALOBRZESKI (M.) Tertiary Parabutyltoluene and its Nitro-derivatives . i, 514

GENVRESSE (P.). Trihydroxyphenylenic Bisulphide . . . . . i, 514

ROGOFF (M.). Phthalyl and Succinyl Ethers of Eugenol . . . . . i, 514

PECHMANN (HANS VON). Mixed Amidines . . . . . i, 515

PECHMANN (HANS VON) and BERTHOLD HEINZE. Mixed Amidines . . i, 515

LAUTH (CHARLES). Amidoamidines . . . . . i, 516

HEWITT (JOHN T.) and FRANK G. POPE. Compounds of Hydrogen Chloride with Azophenols . . . . . i, 517

WILLGERODT (HEINRICH CONRAD CHRISTOPH). Azimido-, Aznitroso-, Oxazimido-, Oxazonitroso-, and Nitrosoazimido-compounds . . . i, 518

VILLE (JULES) and JOSEPH MOITESSIER. Combination of Phenylhydrazine with Metallic Chlorides . . . . . i, 518

CAZENEUVE (PAUL) and MOREAU. Symmetrical Carbamides of the Benzene Series . . . . . i, 519

SCHALL (JOH. FRIEDRICH CARL). Pentaphenylbiguanide . . . . . i, 519

GATTERMANN (LUDWIG) and J. A. KOCH. New Synthesis of Aromatic Aldehydes . . . . . i, 519

KIRPAL (ALFRED). Reduction of Aromatic Nitro-derivatives . . . i, 520

NENCKI (MARCELLUS). Organic Syntheses depending on Elimination of Halogen Hydride by means of Ferric Chloride . . . . . i, 520

NENCKI (MARCELLUS) and E. STOEBER. Action of Acidyl Chlorides on Benzene and Monhydric Phenols in presence of Ferric Chloride . . i, 521

KUNCKELL (FRANZ). Halogen substituted Ketones . . . . . i, 521

KUNCKELL (FRANZ) and FRIEDRICH JOHANNSEN. Action of Chloracetic Chloride on Phenol and its Ethers . . . . . i, 522

COLLET (A.). Action of α-Bromobutyric Chloride on Benzene in the presence of Aluminium Chloride . . . . . i, 522

WALTHER (REINHOLD) and P. G. SCHICKLER. Condensation of Ethylic Salts and Cyanides by means of Sodium Ethoxide . . . . . i, 522

ASTRE (CHARLES). Quinone-orthamidobenzoic acid . . . . . i, 525

ASTRE (CHARLES). Action of Orthamidobenzoic acid on Trichloroquinone i, 525

ASTRE (CHARLES) and H. STÉVIGNON. Action of Orthamidocinnamic acid on Trichloroquinone . . . . . i, 525

STOERMER (RICHARD) [and in part GIESEKE, H. SCHMIDT, and SCHRÖDER]. Syntheses of Coumarone and of Coumarone Derivatives from Phenoxyacetals . . . . . i. 526

STOERMER (RICHARD). Further Syntheses of Coumarone Derivatives . i, 528

PLÖCHL (JOSEF) and BERTRAM MAYER. Phenylglyceric acids . . . . i, 528

CAZENEUVE (PAUL) and E. HADDON. Caffetannic acid . . . . . i, 529

KUNZ-KRAUSE (HERMANN). Caffetannic acid (Glucosylcaffeic acid) and its decomposition into Caffeic acid, Vinylcatechol, and Catechol . . i, 530

BOUVEAULT (LOUIS). Syntheses of Aromatic acids and Aldehydes by means of Aluminium Chloride . . . . . i, 530

BIALOBRZESKI (M.) and MARCELLUS NENCKI. Acetylsalicylic acid . . i, 531

KLOBB (CONSTANT TIMOTHÉE). Diphenacylcyanacetic acid . . . . . i, 531

GUTHZEIT (MAX). An additive compound of Aniline with Ethylic Dicarboxyglutaconate . . . . . i, 532

RABAUT (CH.). Benzenesulphonamides . . . . . i, 532

PAGE

OTTO (ROBERT) and FRITZ STOFFEL. The second Stilbene . . . . i, 533
BILTZ (HEINRICH). Phenyl derivatives of Ethane and Ethylene . . . i, 533
TROEGER (JULIUS) and F. BOLM. Sulpho-ketones of the Naphthalene series . . . . . i, 536
BARBIER (PHILIPPE) and GEORGES LESER. A Menthoglycol . . . i, 537
BARBIER (PHILIPPE) and LOUIS BOUVEAULT. Compounds of the *iso*-Geranaldehyde (*iso*-Citral) series. Preparation and constitution of Ionone . i, 537
BLANC (G.) Isolauronolic acid . . . . . i, 538
LIEBERMANN (CARL T.) and HUGO VOSWINCKEL. Cochineal Dye . . i, 539
MILLER (WILHELM VON) and GEORG ROHDE. Carminic acid . . . i, 540
PINCUSSOHN (LUDWIG). Metallic compounds of Pyridine and the Electrolysis of Pyridine . . . . . i, 540
VARET (RAOUL). Compounds of Pyridine, Piperidine, and Quinoline with Metallic Salts . . . . . i, 542
CIAMICIAN (GIACOMO LUIGI) and ANTONIO PICCININI. 1-Methylpyrrolidine i, 542
PATEIN (GUSTAVE) and E. DUFAU. Action of Antipyrine on Trihydric Phenols . . . . . i, 543
CAUSSE (HENRI E.). Action of Chloral Hydrate on Phenylhydrazine: Diphenylglyoxazole and its derivatives . . . . . i, 543
BUSCH (MAX). Orthamidobenzylamines. IV. . . . . i, 543
OECHSNER DE CONINCK (WILLIAM). Solubility of Ecgonine . . . i, 544

PART II.

General and Physical Chemistry.

GIBSON (JOHN). Chemical Action of Light . . . . . ii, 437
GAUTIER (ARMAND) and H. HÉLIER. Action of Light on Gaseous Mixtures with special reference to Hydrogen and Chlorine . . . . . ii, 437
GUYE (PHILIPPE A.). Isomerism of Position and Rotatory Power . . ii, 437
DRUDE (PAUL). Two Methods for the Measurement of the Dielectric Constant, and Electrical Absorption with Rapid Vibrations . . . ii, 438
GORE (GEORGE). Influence of Proximity of Substances on Voltaic Action . . . . . ii, 438
RICHARDS (THEODORE W.) and JOHN TROWBRIDGE. Effect of Great Current-strength on the Conductivity of Electrolytes . . . . . ii, 439
BURNIE (WILLIAM BECKIT). Thermo-electric Properties of some Liquid Metals . . . . . ii, 439
MILNER (S. ROSLINTGON). Heats of Vaporisation of Liquids . . . ii, 439
PETROVITCH (MICHEL). Dynamics of Homogeneous Endothermic and Exothermic Chemical Reactions . . . . . ii, 439
DUHEM (PIERRE). Gradual Change and Thermodynamics . . . . ii, 439
PONSOT (A.). Reduction of the Freezing Point of an Aqueous Solution . ii, 440
PONSOT (A.). Means of recognising a good method of Cryoscopy . . ii, 440
MASSOL (GUSTAVE). Heat of Formation of Zinc Hydroxide . . . . ii, 440
MATIGNON (CAMILLE). Thermochemistry of the Sodio-acetylenes . . ii, 440
FORCRAND (ROBERT DE). Heat of Formation of Sodio-acetylenes . . ii, 441
ARTH (GEORGES). Calculation of the Calorific Power of Coals by Dulong's Law . . . . . ii, 442
SPERBER (JOACHIM). Calculation of the Co-efficient of Expansion of Gases based on a Theory of Valency . . . . . ii, 442
MILNER (S. ROSLINGTON). Variation of the Dissociation Co-efficient with Temperature . . . . . ii, 442
MEYERHOFFER (WILHELM). Non-concentrating Solutions . . . . . ii, 442
MYLIUS (FRANZ) and ROBERT FUNK. Solubilities of several readily Soluble Salts . . . . . ii, 442

PAGE

SCHIFF (HUGO). Influence of Water on the Solubility in Ether of certain Compounds . . . . . ii, 444
TAMMANN (GUSTAV). Velocity of Solidification . . . . . ii, 444
MEYERHOFFER (WILHELM). Application of the Laws of Chemical Equilibrium to Complex Inorganic Compounds . . . . . ii, 445
LACHAUD (MARCEL). Precipitation of Organic Compounds by Bases . . ii, 445
LACHAUD (MARCEL). Precipitation of Dextrin by Soils . . . . . ii, 445
LACHAUD (MARCEL). Study of Capillary Affinity . . . . . ii, 445
TRYLLER (HEINRICH C.). A new Laboratory Turbine . . . . . ii, 446
DIEPOLDER (EMIL). A new Extraction Apparatus . . . . . ii, 446

Inorganic Chemistry.

MOISSAN (HENRI) and JAMES DEWAR. Liquefaction of Fluorine . . ii, 446
HENTSCHEL (W.). Composition of Nitrogen Chloride . . . . . ii, 447
BESSON (JULES ADOLPHE). Action of Water on Phosphoryl Chloride . ii, 447
WEINSCHENK (ERNST). Graphite, Graphitite, and Graphitoid . . . ii, 447
MURMANN (ERNST). Purification of Commercial Potash and Soda . . ii, 448
LE CHATELIER (HENRI LOUIS). Lithium Borate . . . . . ii, 448
SENDERENS (JEAN BAPTISTE). Action of Hydrogen on Solutions of Silver Nitrate: Purification of Hydrogen . . . . . ii, 448
OSMOND (FLORIS). Alloys of the Silver-Copper Group . . . . . ii, 449
OSMOND (FLORIS). Silver-Copper Alloys . . . . . ii, 449
MOURELO (JOSÉ RODRIGUEZ). Phosphorescent Strontium Sulphide . . ii, 450
TASSILLY. Basic Salts of Cadmium . . . . . ii, 451
ATHANASESCO (NICOLES). Basic Nitrates . . . . . ii, 451
HARTH (THEODOR). Mercury Haloid Double Compounds . . . . . ii, 451
WYROUBOFF (GRÉGOIRE) and AUGUSTE VICTOR LOUIS VERNEUIL. Purification of Cerium . . . . . ii, 452
GRANGER (A.). Compounds of Phosphorus with Iron, Nickel, and Cobalt ii, 453
JÖRGENSEN (SOFUS MADS). Constitution of Cobalt, Chromium, and Rhodium Bases . . . . . ii, 453
SABANÉEFF (ALEXANDER P.). Colloidal Tungstic Acid . . . . . ii, 456
KRÜSS (GERHARD). Thorium . . . . . ii, 456
COSSA (ALFONSO). Constitution of Platosemiamine Compounds . . . ii, 457

Mineralogical Chemistry.

THADDÉEFF (KONSTANTIN). Composition and Specific Gravity of Sulfoborite . . . . . ii, 457
IGELSTRÖM (LARS J.). Gersbyite and Munkrudite . . . . . ii, 458
PIRSSON (LOUIS V.). [Augite from Montana] . . . . . ii, 458
FEDOROW (E. VON). Garnet from the Turjinsk mines . . . . . ii, 458
MIRAT (SANTIAGO BONILLA). Analysis of a Meteoric Stone which fell at Madrid, February 10th, 1896 . . . . . ii, 458

Chemistry of Vegetable Physiology and Agriculture.

GÉRARD (ERNST) and P. DAREXY. Fatty Matter of Beer Yeast . . . ii, 459
LINDNER (PAUL). Formation of "Fruit Ethers" by Yeasts in Green Malt and in Worts . . . . . ii, 459
MAZÉ. Fixation of Free Nitrogen by the Bacillus of Leguminous Nodules ii, 459
GERBER (C.). Function of Tannin in Plants and especially in Fruits . . ii, 460
PY (G.). Analysis and Composition of Stick Liquorice . . . . . ii, 461
STONE (WINTHROP E.). The Carbohydrates of Wheat, Maize, Flour and Bread . . . . . ii, 461

PAGE

STONE (WINTHROP E.). Action of Enzymic ferments on Starches of different origin . . . . . ii, 461

WEISBERG (J.). Origin of Silica in Incrustations and Deposits of the Beet-root Sugar manufacture. Solubility of Calcium Silicate in Saccharine Solutions . . . . . ii, 462

BÖGGILD (B.). Analyses of Spurrey . . . . . ii, 462

WOHLTMANN (FERDINAND) and H. KRATZ. Soils of Cameroon, Senegambia and German East Africa. Improved methods of Soil Analysis . . ii, 463

GAUTIER (ARMAND). The function of Humic substances in the Fertility of Soils . . . . . ii, 463

Analytical Chemistry.

VIGNON (LÉO). Apparatus for the Industrial Analysis of Gases . . . ii, 463

MUTHMANN (WILHELM) and E. SCHRÖDER. Separation of Tellurium from Antimony . . . . . ii, 463

RIEGLER (E.). Extremely sensitive Reagent for Detection and Colorimetric Estimation of Nitrous acid . . . . . ii, 464

MURMANN (ERNST). Combustion Boat with Partitions . . . . . ii, 464

MEUNIER (JEAN). Precipitation of Zinc as Sulphide . . . . . ii, 464

RÖSSING (ADELBERT). Employment of Ammonium Carbonate in Water Analysis . . . . . ii, 465

ROMIJN (GYSBERT). Iodometric Estimation of Sugars . . . . . ii, 465

SQUIBB (EDWARD R.). Volumetric Estimation of Acetone . . . . ii, 466

ARGENSON (G.). Estimation of Acetone in Urine . . . . . ii, 467

DENIGÈS (GEORGES). Extension of Legal's reaction to Compounds containing the Acetyl group and their derivatives . . . . . ii, 467

BITTÓ (BÉLA VON). Colour Reactions of the Aldehydes and Ketones . . ii, 468

GIRARD (AIMÉ). Analysis of Wheat . . . . . ii, 468

DONOGÁNY (ZAKARIÁS). Hæmochromogen as a Test for Blood . . ii, 468

PAWLEWSKI (BRONISLAW). The uncertainty of the Guaiacum Reaction for Active Diastase . . . . . ii, 468
